MOTIF

Cave Temple of Hadimba

Traditionally a Hidimbi Devi Temple, generally called and famous as Hadimba Temple, is located in Manali, an internationally famous hill station of Kullu district of Himachal Pradesh in north India. It is an ancient cave temple dedicated to Hidimbi Devi, sister of demon named Hidimba known character in the Indian epic of Mahabharata. The temple surrounded by a cedar forest locally called as Dhoongri is built over a huge rock jutting out of the ground. Since Hadimba who meditated at Dhoongri the Temple is also known as Dhoongri Devi Temple. The Dhoongri Temple dedicated to Goddess Hadimba (or Hirma Devi), the wife of Bhima of Mahabharata fame is just within a walkable distance from the Manali town. The structure was built in 1553 AD by Raja Bahadur Singh, son of Raja Sidh Singh.

Hadimba temple at Dhoongri has a pagoda shaped roof of thick deodar shingles. The square are in tiers of diminishing size above which is a kind of circular wooden cave, which is again surrounded by a brass ball and trident. Verandahs occupy three side of the temple. The doorway faces the east and is extremely decorated by carved wood work depicting elephants, tigers, birds etc. Hadimba is held in great veneration throughout and even beyond Kullu valley. She is still being worshipped by the local people by offering occasional sacrifice of animals, chiefly as a propitiatory measure for the amelioration of ailments and natural calamities. Presently the Temple is under the control of archaeological survey of India.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th. July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly

added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System (PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Sh. Balbir Tegta, Director of Census Operations Himachal Pradesh. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

Preface

The Census is the biggest source of comprehensive data on demography, economic activity, literacy and education, housing and household amenities, urbanization, fertility, mortality, Scheduled Caste and Schedule Tribes, language, religion and migration at village, town and ward level. District Census Hand Book (DCHB) is series of such Census publication and is the most important district level publication which provides reliable data at grass root level for the purpose of planning, administrative requirements as well as of academic development in socio-demographic field. The DCHB contains the salient results on the data gathered at the actual enumeration of head-count and in addition contain a wealth of other non-census information in respect of each village and town of the district.

Following the Census tradition, the 2011 series of the District Census Handbooks is also comprised of two parts. Part-A contains Village and Town Directory data which provides information on infrastructural amenities and land use data at village level. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. Now DCHB 2011 will also present the newly added amenities which have been discussed in the foreword of this volume along with the information pertaining to name and location of villages, area, population, number of households, important civic amenities/ facilities available in villages like educational, medical, drinking water, post, telegraph and telephone, commercial and co-operative banks, agricultural & non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town by distance, power supply, news paper/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part-B contains village and town-wise Primary Census Abstract (PCA) along with Housing amenities data which provides information on area, number of households, sex-wise total population, child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries, other workers and special tables on Housing data in respect of each village and town of the district.

Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages, conditions of housing, assets available with households and demographic profile of population at Sub-District/C.D. Block level which are of much utility for demarcation of areas of surplus and deficit to reorient the planning process.

The District Census Handbook is a joint venture of the Government of Himachal Pradesh and the Census organisation of the Government of India. The design of 2011 District Census Handbooks is evolved centrally by the Registrar

General and Census Commissioner, India and accordingly these books have been prepared at Directorate level. The data so supplied by the field level officers have been cross checked with the data obtained from various departments and an attempt had been made to reconcile the discrepancies to make it more reliable. I am grateful to all Heads of Departments of the State Government, officers and staff engaged in the conduct of 2011 Census for their co-operation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. I owe special thanks to Dr. C. Chandramouli, I.A.S., the Registrar General and Census Commissioner, India for his enlightened guidance and encouragement. I am also thankful to Shri Deepak Rastogi, Additional Registrar General of India, Dr. A.P. Singh, Deputy Registrar General (Map), Shri P.K. Banerjee, Deputy Registrar General (C & T), Shri A.K. Samal, Additional Director, Shri M.S. Thapa, Additional Director, Dr. Pratibha Kumari, Assistant Registrar General (SS) and Shri A.K. Arora, Joint Director for providing technical guidance and finalising this report.

The 2011 Census Operations in Himachal Pradesh were carried out under the able guidance and the dynamic supervision of Shri Balbir Tegta, I.A.S., the then Director of Census Operations. I owe my deep sense of gratitude to him.

The data presented in the District Census Handbook required a concerted team work of officers and staff members of this Directorate who were involved whole heartedly at various stages of its planning, supervision, field work, and computerization, preparation of manuscript, maps and printing. I express my appreciation for the painstaking and dedicated services rendered by all of them. Special mention is made of Shri R.K. Ram, former Joint Director, Shri Ashish Chauhan, Assistant Director, Shri R.S. Negi, Assistant Director and Shri Ramesh Kumar Sharma, Statistical Investigator Gr.-II (Rtd.), Shri Narender Kumar Sharma, Sr. Compiler, Shri Ratan Kumar Lalmani, Statistical Investigator Gr.-II, Shri Anil Kumar Maurya, Compiler, Shri Ramesh Kumar, Compiler and Smt. Sunita Rani Compiler. Primary Census Abstract (PCA) included in this publication was scrutinized by Census Section under the supervision of Shri Narpat Ram, Statistical Investigator Gr.-I, Shri Mohar Singh Chauhan, Statistical Investigator Gr.-I, Shri Ramesh Chand Chandel, Statistical Investigator Gr.-II, Kumari Archana Nahar, Statistical Investigator Gr.-II, Shri Anil Thakur, Sr. Compiler, Shri Rajender Singh Chandel, Sr. Compiler and Shri Bhikam Ram, Compiler. Maps appearing in this publication are prepared by Map Section under the guidance of Smt. Veena Thakur, Research Officer. The whole manuscript of the District Census Handbook is edited and finalised by me. I express my appreciation for the dedicated services rendered by them and all other my colleagues in the Directorate associated with this project.

I hope this volume will readily comes to the expectation of the data users.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity'

manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief history of the district

Ancient people regarded Kullu as the farthest limit of human habitation and in the traditional folklore; it is often referred to as Kulanthpith means the end of habitable world. The original name of Kullu was Kulata which finds mention in the Vishnu Purana, Ramayana and other Hindu mythological literatures. Kullu was most probably the most ancient state next to Kashmir and Kangra. The Chinese pilgrim, Hiuen Tsiang (A.D.629-645) described the country of Kiu-lu-to (Kullu) situated at 117 miles to the north-east of Jalandhar which exactly corresponds with the position of Kulata.

Kullu has been one of the oldest principalities of Punjab Hills. According to the known history, it was founded in the first century of Christian era by one Behangamani Pal whose forefathers originally came from Tripura and had migrated from there to Allahabad and then to Mayapuri near Hardwar. Many legends are associated with the name of Behangamani Pal. It appears that the people of the higher valley of Kullu at that time were suffering under the repressive regime of the Thakurs of Spiti and their keen desire to overthrow the Thakurs was smoldering in their hearts. Behangamani Pal organized what may be rightly called the upper valley's first revolution sparked off at Jagatsukh. A renowned astrologer of village Paljho is believed to have helped him a lot and his endeavours duly blessed by the powerful Goddess Hadimba, were crowned with success. This goddess is upto now is respected as the 'grandmother and the patron-deity' by the Rajas of Kullu. Pal dynasty was thus established. It's original capital was established at Jagatsukh and nearly ten generations ruled from there, till it was shifted to Naggar which remained as the seat of the Government for as many as 1,400 years till it was finally moved to Kullu.

Their rule continued till about 1,450 when reference is available of Raja Kelas Pal. After this, there was long break of about 50 years. It appears that the Thakurs and the Ranas might have captured power during this period, forcing the Pal Rajas to flee from the valley. It was again in the fifteenth century that the name of the Sidh Singh appears as the Raja of Kullu. There is almost identical legend about Sidh Singh as marked the name of Behangamani Pal. He too rallied the people against the Thakurs and established the old Pal dynasty, duly blessed by the goddess Hadimba.

Reference may be made to Raja Jagat Singh (1637-1672) who conquered the fort of the Madankot which belonged to Jhina Rana, above Manali and also that of Baragarh opposite to Naggar, where Rana Bhosal held his sway. It was during his regime that the famous idol of Raghunathji was brought from Ayodhya and installed at the temple of Raghunathji at Sultanpur Kullu. This of course a historic turn of events, in-as-much as the Rajas who had till then Shaiv and Shktik adopted Vaishnava Dharma. Not only this, the Raja gave away the whole kingdom to Raghunathji by placing the image on the 'gaddi' (throne) and himself became the vice-regent of Raghunathji. Since then, the Rajas of Kullu ruled the State in the name of Raghunathji. Since then, all local gods of Kullu once in a year at the time of Dussehra pay their homage to Raghunathji in open compound of Dhalpur near Sultanpur.

Jagat Singh was succeeded by his equally capable son Bidhi Singh who conquered some areas in the north and also the tract of Lahul. His son Man

Singh was also one of outstanding ruler of the state. He ruled from 1688 to 1719 A.D. During this period, he fought many battles with ruler of Mandi and completed the conquest of outer Saraj as well as annexed Chhota and Bara Banghal from Mandi state. The ruler of Ladakh was forced to fix boundary between Kullu and Ladakh at Lingti. The territorial jurisdiction of Kullu at his time covered an area of about 25,600 sq. kms. In addition to Kullu proper, it comprised of Lahul & Spiti, Bara and Chhota Banghal and towards south the jurisdiction extended nearly to Shimla and the town Mandi. Like other hill states, Kullu had its ups and downs till it was ceded to British in 1846 alongwith other trans-Satluj states. The Raja of Kullu and his successors had to remain contented with Jagirs. In the year of 1849 Kullu was made a sub-division of the then Kangra district by the British government. Prior to 30th July, 1963, it was sub-division of the Kangra district and it was the then Punjab government which upgraded this sub-division to the status of district. The jurisdictions of this district remained the same as of the erstwhile sub-division of that name. On the reorganization of composite Punjab on the 1st November, 1966 Kullu district alongwith some other districts was transferred to Himachal Pradesh. In 1971 Census, this district was comprised of one tehsil of Kullu and three sub-tehsils of Banjar, Ani and Nermand besides two towns of Kullu (MC) and Manali (NAC). The total number of villages was 169 in the district.

During the decade of 1971-81, no jurisdictional changes took place at district level. However, some minor changes in the jurisdiction of tehsils in the district were effected during 1971-81. Three phattis from Tehsil Banjar were transferred to Kullu tehsil. Banjar and Nermand which were sub-tehsils in 1971 Census attained the status of Tehsils in 1981 Census. During the decade Bhuntar comprising the parts of Phattis Khokhan, Silihar and Shamshi was declared Notified Area Committee thereby raising number of towns to three in the district. However, at the time of 1981 Census, the number of tehsils and villages remained unchanged.

During the decade of 1981-91 no new area was added to district but a sub-tehsil Sainj was created by annexing 11 Phattis from Banjar tehsil and 3 from Kullu (2 partly and 1 fully). Ani and Nermand, the other two tehsils of the district were also slightly readjusted. One Phatti Palehi of Nermand tehsil was transferred to Ani and a partly Phatti Karsai Gad of Ani transferred to Banjar Tehsil. Banjar N.A.C. was also created from Bihar Phatti of Banjar tehsil. At the time of 1991 Census Kullu district was having 5 tehsils/sub-tehsils and 4 towns. On account of transfer of partly villages from one tehsil to other, the number of villages has increased to 172 in 1991 against 169 in 1981.

After 1991 Census, one new tehsil of Manali with its headquarters at Manali has been carved out of Kullu tehsil by transferring its 19 villages and Manali town in 1998. In 2001 Census Kullu district was comprised of four tehsils and two sub-tehsils, four towns and 172 inhabited villages. This district does not have any uninhabited village since its inception up till 2001. During the decade of 2001-2011 Census the district has not undergone any change in its boundary but due to on-going settlement the number of villages in Manali and Kullu tehsils was increased from 19 to 75 and 65 to 163 respectively. In 2011 Census Kullu district is comprised of four tehsils, two sub-tehsils, 326 villages, 4 statutory towns and one census town.

Administrative set-up

Kullu district forms the eastern part of central Himachal Pradesh micro region and is a centrally located district of the state with its headquarters at Kullu. The area of the district is 5,503 Sq.kms. as per Survey of India which remained unchanged since its creation in 1963. The district has 4 tehsils namely Manali, Kullu, Banjar and Nermand and 2 sub-tehsils of Ani and Sainj with their administrative headquarters at the same places as the names of tehsils/sub-tehsils are named after their headquarters. From the developmental point of view, the district has been divided into 5 community development blocks, namely Naggar, Kullu, Banjar, Ani and Nermand and headquarters of C.D. blocks are also known by the same names.

The district has total number of 326 villages spread over 4 tehsils and two sub-tehsils. Manali is comprised of 75 villages, Kullu (163 villages), Banjar (31 villages), Sainj (14 villages), Ani (17 villages) and Nermand (26 villages). There are four statutory towns in the district namely Banjar Nagar Panchayat, Bhuntar Nagar Panchayat, Kullu Municipal Council and Manali Nagar Panchayat and one Census Town namely Shamshi.

During the decade of 2001- 2011, Kullu district has not undergone any jurisdictional changes at district level.

For administrative purpose, the Deputy Commissioner is administrative head of the district. He is responsible for general administration and maintenance of law and order. He is assisted by one Additional Deputy Commissioner and Assistant Commissioner and other district officers. For administrative convenience, the district has been divided into four sub-divisions viz. Manali, Kullu, Banjar and Ani and each sub-division is headed by Sub-divisional Officer (Civil). Each tehsil is under the charge of Tehsildar while the incharge of sub-tehsil is Naib-tehsildar assisted by Office Kanungo.

Besides this, Block Development Officer is posted in each community development block to supervise and co-ordinate the development works assigned to Gram Panchayats in rural areas.

The head of the district police force is Superintendent of Police assisted by Additional Superintendent of Police and two Deputy Superintendents of Police besides Sub- Divisional Police Officers of Dy.SP rank at sub-division level. In addition to these, every department maintains its districts officers to implement the schemes pertaining

District Highlights of 2011 Census

- Kullu district has the lowest number of 326 villages among the 12 districts of the state.
- Kullu district occupies the 9th rank among the districts in terms of population.
- Kullu district occupies the 7th position in terms of sex ratio among the districts of the state with 942 females per 1,000 males as compared to 972 females per 1,000 males of state average.
- Kullu district stands at 7th position in terms of its working force having total workers of 269,084 persons against 3,559,422 working persons of the state.
- Kullu district stands at 4th positions in terms of decadal population growth (2001-2011) of 14.8 per cent persons in comparison to state decadal population growth of 12.9 per cent persons.
- In terms of density of population per sq.km., Kullu district with 80 persons per sq.km. stands at 10th rank in the state.
- Kullu district occupies 9th rank among the districts of the state in terms of literate population. It has a literate population of 307,672 persons.
- The economy of Kullu district is mainly depends on agriculture. It has returned 197,141 persons as cultivators and holds the 4th position among the districts of the state.
- All the in-habited villages of the district enjoy the facility of electricity and potable drinking water.
- Kullu district is also known for its attractive tourist destinations. Kullu, Manali, Nagar and Manikaran are the famous places of tourist interest in the district.
- Kullu valley is also known as Land of Gods or in other words Dev Bhumi as each of its village has its own deity known as Deo, Devta or Devi. Famous Hadimba Devi Temple is situated in Manali town.

- Kullu is also known for its international fame Dussehra Festival.
- District has place of pride in its beautiful traditional handicrafts in weaving. Multicoloured Kullu caps, shawls, pattoos and patties (local tweed) are the famous souvenir of the district.
- Kullu is linked by air with the airport at Bhuntar town.
- District is also known for Hydro Electric Projects. Various projects were commissioned during the last decade.

Section - I

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite of several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 along with a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their states/Uts. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in

place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The

term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
