MOTIF

Cave Temple of Hadimba

Traditionally a Hidimbi Devi Temple, generally called and famous as Hadimba Temple, is located in Manali, an internationally famous hill station of Kullu district of Himachal Pradesh in north India. It is an ancient cave temple dedicated to Hidimbi Devi, sister of demon named Hidimba known character in the Indian epic of Mahabharata. The temple surrounded by a cedar forest locally called as Dhoongri is built over a huge rock jutting out of the ground. Since Hadimba who meditated at Dhoongri the Temple is also known as Dhoongri Devi Temple. The Dhoongri Temple dedicated to Goddess Hadimba (or Hirma Devi), the wife of Bhima of Mahabharata fame is just within a walk able distance from the Manali town. The structure was built in 1553 AD by Raja Bahadur Singh, son of Raja Sidh Singh.

Hadimba temple at Dhoongri has a pagoda shaped roof of thick deodar shingles. The square are in tiers of diminishing size above which is a kind of circular wooden cave, which is again surrounded by a brass ball and trident. Verandahs occupy three side of the temple. The doorway faces the east and is extremely decorated by carved wood work depicting elephants, tigers, birds etc. Hadimba is held in great veneration throughout and even beyond Kullu valley. She is still being worshipped by the local people by offering occasional sacrifice of animals, chiefly as a propitiatory measure for the amelioration of ailments and natural calamities. Presently the Temple is under the control of archaeological survey of India.

Foreword

The District Census Handbook DCHB is an important publication of the Census Organization since 1951. It contains both Census and non-Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and ward of the District. The Primary Census Abstract PCA part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House listing and Housing Census. The non-Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (C.D. Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of Census 2001, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio-gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/Common Service Centre, Private Courier Facility,

Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System (PDS) Shop, Mandis/Regular Market, Weekly Hat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums, respectively. C.D. Block wise data of Village Directory and Village PCA have been presented in DCHB of Census 2011 as presented in earlier Census.

6. The data of DCHB Census 2011 have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in Census 2011.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Sh. Balbir Tegta, Director of Census Operations, Himachal Pradesh. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full co-operation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract PCA. The work of preparation of DCHB, Census 2011 has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

Preface

The Census is the biggest source of comprehensive data on demography, economic activity, literacy and education, housing and household amenities, urbanization, fertility, mortality, Scheduled Caste and Schedule Tribes, language, religion and migration at village, town and ward level. District Census Hand Book (DCHB) is series of such Census publication and is the most important district level publication which provides reliable data at grass root level for the purpose of planning, administrative requirements as well as of academic development in socio-demographic field. The DCHB contains the salient results on the data gathered at the actual enumeration of head-count and in addition contain a wealth of other non-census information in respect of each village and town of the district.

Following the Census tradition, the 2011 series of the District Census Handbooks is also comprised of two parts. Part-A contains Village and Town Directory data which provides information on infrastructural amenities and land use data at village level. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. Now DCHB 2011 will also present the newly added amenities which have been discussed in the foreword of this volume along with the information pertaining to name and location of villages, area, population, number of households, important civic amenities/ facilities available in villages like educational, medical, drinking water, post, telegraph and telephone, commercial and co-operative banks, agricultural & non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town by distance, power supply, newspaper/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part-B contains village and town-wise Primary Census Abstract (PCA) along with Housing amenities data which provides information on area, number of households, sex-wise total population, child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and division of workers into four economic categories i.e. cultivators, agricultural labourers, workers in household industries, other workers and special tables on Housing data in respect of each village and town of the district.

Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages, conditions of housing, assets available with households and demographic profile of population at Sub-District/C.D. Block level which are of much utility for demarcation of areas of surplus and deficit to reorient the planning process.

The District Census Handbook is a joint venture of the Government of Himachal Pradesh and the Census Organization of the Government of India. The design of 2011 District Census Handbooks is evolved centrally by the Registrar General and Census Commissioner, India and accordingly these books have been prepared at Directorate level. The data so supplied by the field level officers have been cross checked with the data obtained from various departments and an attempt had been made to reconcile the discrepancies to make it more reliable. I am grateful to all Heads of Departments of the State Government, officers and staff engaged in the conduct of Census 2011 for their co-operation to accomplish this task.

The compilations of such a huge amount of varied data in a single volume requires proper planning and close monitoring. I owe special thanks to Dr. C. Chandramouli, I.A.S., the Registrar General and Census Commissioner, India for his enlightened guidance and encouragement. I am also thankful to Shri Deepak Rastogi, Additional Registrar General of India, Dr. R.C. Sethi, Ex Additional Registrar General of India, Dr. A.P. Singh, Deputy Registrar General (Map), Shri P.K. Banerjee, Deputy Registrar

General (C&T), Shri A.K. Samal, Additional Director, Shri M.S. Thapa, Additional Director, Dr. Pratibha Kumari, Assistant Registrar General (SS) and Shri A.K. Arora, Joint Director for providing technical guidance and finalising this report.

The Census 2011 Operations in Himachal Pradesh were carried out under the able guidance and the dynamic supervision of Shri Balbir Tegta, I.A.S., the then Director of Census Operations. I owe my deep sense of gratitude to him.

The data presented in the District Census Handbook required a concerted team work of officers and staff members of this Directorate who were involved whole heartedly at various stages of its planning, supervision, field work, and computerization, preparation of manuscript, maps and printing. I express my appreciation for the painstaking and dedicated services rendered by all of them. Special mention is made of Shri R.K. Ram, former Joint Director, Shri Ashish Chauhan, Assistant Director, Shri R.S. Negi, Assistant Director and Shri Ramesh Kumar Sharma, Statistical Investigator Gr.-II (Rtd.), Shri Narender Kumar Sharma, Sr. Compiler, Shri Ratan Kumar Lalmani, Statistical Investigator Gr.-II, Shri Anil Kumar Maurya, Compiler, Shri Ramesh Kumar, Compiler and Smt. Sunita Rani, Sr. Compiler. Primary Census Abstract (PCA) included in this publication was scrutinized by Census Section under the supervision of Shri Narpat Ram, Statistical Investigator Gr.-I, Shri Mohar Singh Chauhan, Statistical Investigator Gr.-I, Shri Ramesh Chand Chandel, Statistical Investigator Gr.-II, Ms. Archana Nahar, Statistical Investigator Gr.-II, Shri Anil Thakur, Sr. Compiler, Shri Rajender Singh Chandel, Sr. Compiler and Shri Bhikham Ram, Compiler. Maps appearing in this publication are prepared by Map Section under the guidance of Smt. Veena Thakur, Research Officer (Map). The whole manuscript of the District Census Handbook is edited and finalised by me. I express my appreciation for the dedicated services rendered by them and all other my colleagues in the Directorate associated with this project.

I hope this volume will readily come to the expectation of the data users.

History and Scope of the District Census Handbook

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of Census and non-Census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both Census and non-Census data of urban as well as rural areas for each district. The Census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non-Census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 Census DCHB provided a descriptive account of the district, administrative statistics, Census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to Tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (C.D. Block) level presentation of village directory and PCA data instead of the traditional Tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking and (vii) Civic & other amenities in Slums. C.D. Block wise data of Village Directory and Village PCA have been presented in DCHB of Census 2011 as presented in earlier Census. The data of DCHB Census 2011 have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the parts have been published in separate volumes in Census 2011.

Brief History of the District

Ancient people regarded Kullu as the farthest limit of human habitation and in the traditional folklore; it is often referred to as Kulanthpith means the end of habitable world. The original name of Kullu was Kulata which finds mention in the Vishnu Purana, Ramayana and other Hindu mythological literatures. Kullu was most probably the most ancient state next to Kashmir and Kangra. The Chinese pilgrim, Hiuen Tsiang (A.D.629-645) described the country of Kiu-lu-to (Kullu) situated at 117 miles to the north-east of Jalandhar which exactly corresponds with the position of Kulata.

Kullu has been one of the oldest principalities of Punjab Hills. According to the known history, it was founded in the first century of Christian era by one Behangamani Pal whose forefathers originally came from Tripura and had migrated from there to Allahabad and then to Mayapuri near Hardwar. Many legends are associated with the name of Behangamani Pal. It appears that the people of the higher valley of Kullu at that time were suffering under the repressive regime of the Thakurs of Spiti and their keen desire to overthrow the Thakurs was smoldering in their hearts. Behangamani Pal organized what may be rightly called the upper valley's first revolution sparked off at Jagatsukh. A renowned astrologer of village Paljhot is believed to have helped him a lot and his endeavours duly blessed by the powerful Goddess Hadimba, were crowned with success. This goddess upto now is respected as the 'grandmother and the patron-deity' by the Rajas of Kullu. Pal dynasty was thus established. It's original capital was established at Jagatsukh and nearly ten generations ruled from there, till it was shifted to Naggar which remained as the seat of the Government for as many as 1,400 years till it was finally moved to Kullu.

Their rule continued till about 1,450 when reference is available of Raja Kelas Pal. After this, there was long break of about 50 years. It appears that the Thakurs and the Ranas might have captured power during this period, forcing the Pal Rajas to flee from the valley. It was again in the fifteenth century that the name of the Sidh Singh appears as the Raja of Kullu. There is almost identical legend about Sidh Singh as marked the name of Behangamani Pal. He too rallied the people against the Thakurs and established the old Pal dynasty, duly blessed by the goddess Hadimba.

Reference may be made to Raja Jagat Singh (1637-1672) who conquered the fort of the Madankot which belonged to Jhina Rana, above Manali and also that of Baragarh opposite to Naggar, where Rana Bhosal held his sway. It was during his regime that the famous idol of Raghunathji was brought from Ayodhya and installed at the temple of Raghunathji at Sultanpur Kullu. This of course a historic turn of events, in-as-much as the Rajas who had till then Shaiv and Shktik adopted Vaishnava Dharma. Not only this, the Raja gave away the whole kingdom to Raghunathji by placing the image on the 'gaddi' (throne) and himself became the vice-regent of Raghunathji. Since then, the Rajas of Kullu ruled the State in the name of Raghunathji. Since then, all local gods of Kullu once in a year at the time of Dussehra pay their homage to Raghunathji in open compound of Dhalpur near Sultanpur.

Jagat Singh was succeeded by his equally capable son Bidhi Singh who conquered some areas in the north and also the tract of Lahul. His son Man Singh was also one of outstanding ruler of the state. He ruled from 1688 to 1719 A.D. During this period, he fought many battles with ruler of Mandi and completed the conquest of outer Saraj as well as annexed Chhota and Bara Banghal from Mandi state. The ruler of Ladakh was forced to fix boundary between Kullu and Ladakh at Lingti. The territorial jurisdiction of Kullu at his time covered an area of about 25,600 sq. kms. In addition to Kullu proper, it was comprised of Lahul & Spiti, Bara and Chhota Banghal and towards south the jurisdiction extended nearly to Shimla and the town Mandi. Like other hill states, Kullu had its ups and downs till it was ceded to British in 1846 alongwith other trans-Satluj states. The Raja of Kullu and his successors had to remain contented with Jagirs. In the year of 1849 Kullu was made a sub-division of the then Kangra district by the British government. Prior to 30th July, 1963, it was sub-division of the Kangra district and it was the then Punjab government which upgraded this sub-division to the status of district. The jurisdictions of this

district remained the same as of the erstwhile sub-division of that name. On the reorganization of composite Punjab on the 1st November, 1966 Kullu district alongwith some other districts was transferred to Himachal Pradesh. In Census 1971, this district was comprised of one tahsil of Kullu and three sub-tahsils of Banjar, Ani and Nermand besides two towns of Kullu (MC) and Manali (NAC). The total number of villages was 169 in the district.

During the decade of 1971-81, no jurisdictional changes took place at district level. However, some minor changes in the jurisdiction of tahsils in the district were effected during 1971-81. Three phattis from Tahsil Banjar were transferred to Kullu tahsil. Banjar and Nermand which were sub-tahsils in Census 1971 attained the status of Tahsils in Census 1981. During the decade Bhuntar comprising the parts of Phattis Khokhan, Silihar and Shamshi was declared Notified Area Committee thereby raising number of towns to three in the district. However, at the time of Census 1981, the number of tahsils and villages remained unchanged.

During the decade of 1981-91 no new area was added to district but a sub-tahsil Sainj was created by annexing 11 Phattis from Banjar tahsil and 3 from Kullu (2 partly and 1 fully). Ani and Nermand, the other two tahsils of the district were also slightly readjusted. One Phatti Palehi of Nermand tahsil was transferred to Ani and a partly Phatti Karsai Gad of Ani transferred to Banjar Tahsil. Banjar N.A.C. was also created from Bihar Phatti of Banjar tahsil. At the time of Census 1991 Kullu district were having 5 tahsils/sub-tahsils and 4 towns. On account of transfer of partly villages from one tahsil to other, the number of villages has increased to 172 in 1991 against 169 in 1981.

After 1991 Census, one new tahsil of Manali with its headquarters at Manali has been carved out of Kullu tahsil by transferring its 19 villages and Manali town in 1998. In Census 2001 Kullu district was comprised of four tahsils and two sub-tahsils, four towns and 172 inhabited villages. This district does not have any uninhabited village since its inception up till 2001. During the decade of Census 2001 to 2011 the district has not undergone any change in its boundary but due to on-going settlement the number of villages in Manali and Kullu tahsils was increased from 19 to 75 and 65 to 163, respectively. In Census 2011 Kullu district is comprised of four tahsils, two sub-tahsils, 326 villages, 4 statutory towns and one Census town.

ANALYTICAL NOTE

Analytical Note

(i) Physical features:

Location and size:

Kullu district is located in the eastern part of central Himachal Pradesh. The district lies between 31°20' 25" to 32° 25' 0" north latitude and 76° 56' 30" to 77° 52' 20" east longitude. It is bounded on the north and east by Lahul & Spiti district, on the south-east by Kinnaur district, on the south by Shimla district, on the south-west and west by Mandi district and on the north-west by Kangra district.

The headquarters of the district is situated at an altitude of 1,200 metres above the mean sea level on the confluence of Sarvary rivulet and Beas river. The total area of the district is 5,503 Sq. kms. District ranks 5th in order of area and 9th in order of population among the districts of the state. The area of district constitutes 9.88 per cent of the total area of the state while it contains 6.38 per cent of the total population.

Physiography:

Kullu district forms a transitional zone between the Lesser and the Greater Himalayas and presents a typical rugged mountainous terrain with moderate to high relief. The altitude varies between 1,089 metres to over 6,632 metres from the mean sea level. The high reaches are bestowed with magnificent snow peaks and glaciers. The important glaciers in this district are Kalihen, Beas Kund, Saraomaga, Trichu, Parvati, Dibbi and Mantalai. These vary in length from 3 to 16 Kms. and from 500 to 800 metres in width.

Geology:

The rock types found in the district are phyllite, slate, quartzite lime stone, schists and granites and have been classified on the basis of their physical characters, mode and period of formation. These are named either on rock types or after local names where these were first studied. These groups are central gneiss, Kullu formation, Banjar formation and tourmaline granites. Central gneiss presumably the oldest rocks made over 1,500 million years comprised various types of gneissic rocks within layers of quartzite, granites and pegmatites. The large formation contains thick layers of grey dolomite and pink limestone besides slate phyllite and quartzite. The tourmaline granites are inferred to occur as intrusive and are the probable source of high radio activity in the area where many hot water springs have occurred in this area.

On the basis of physiography, climate, soil cover, geology and natural vegetation, the district has been divided into 5 sub-micro regions which are given as below:

1. Kullu Valley: The valley mainly spreads on the both banks of Beas river and also on the lower parts of its major tributaries like Parvati and Tirthan rivers. It covers maximum parts of Manali, Kullu tahsils and Sainj sub-tahsil and a small part of Banjar tahsil. This region is surrounded by Kullu forests from almost all corners. Mandi district forms its south-western limit. This valley is mainly formed by Beas river and is narrow in the north and becomes more wider in Kullu and in the central and southern parts of Manali tahsils whereas the parts of this valley falling in Sainj sub-tahsil and Banjar tahsil are undulating.

This region in the district is comparatively plain and fertile and the elevation varies from 1,089 metres and 2,980 metres above the mean sea level. Slope rises gradually as one move away from the river banks and these slopes are densely covered with apple orchards. Most of the area of this region falls below 2,000 metres. Beas river rises in the Pir Panjal range near Rohtang pass and it enters the region

near Rohla from the north. This river flows through central part of the region towards southern direction upto Aut. The Tirthan river, after meeting with the Koki and Sainj khads join Beas river from south and then the combined course flows towards west. Major tributary of the Beas river in this region is Parvati river which also receives the water of Malana Nalla and Tos Nalla and joins then Beas on its left Bank near Bhuntar town. Other minor tributaries are Manalsu, Solang, Phojal, Debar, Sanjoin, Siriv Nalla and Sarwari Khad on the right side and Chaki, Pakhnoj, Duhangan, Aliaini and Hurla Nalls on the left side. The climate of this valley is warm during summers and cool during winters. Upper areas of this valley receive snow fall during the month of December and January. Snow clad peaks look very beautiful. The geology of this region is mainly composed of middle Proterozoic formations. The northern fringe of this region contains Granites (unclassified), while south-eastern part has shali-Deoban and Largi groups and Rampur-Banjar formations. Soils of this region are mainly covered with orthents-ochrepts (58) while in the northern extreme; it contains Udalfs (20) type of soil. Higher slopes of this region are covered with mixed vegetation mainly of Deodars. This valley in the state, with its natural charm and grandeur is famous for the scenic beauty beyond expression.

2. Kullu Forests: This region is formed by the area surrounding Kullu valley which spreads over parts of Manali, Kullu and Banjar tahsils and Sainj sub-tahsil.

The topography of the region is rugged and undulating with an altitude varying from 2,800 metres to 4,953 metres above the mean sea level. It contains many Dhars and rivulets/streams originating from the higher reaches of the region and all of them ultimately merge with the Beas river from both sides. The climate of this region is cool and dry. During winter the high reaches receive snowfall.

Geology of this region is mainly composed of Jutogh group/Vaikrita group and central gneiss and granites (unclassified) while in central and southern parts, geological formations of Nagthat, Mulh and Manikaran quartzites are also observed. Soils of this region are mainly covered with orthents-ochrepts (58) type while Udalfs (20) and glaciers and Snow cap (103) types of soils occur in the northern and eastern parts of this region.

Except few patches in the western part adjoining Kangra district, the whole area of this region is densely covered by forests. Thickness of the forests is more on the higher altitude while it decreases with the lower altitude. Most part of these forests extends between the elevations of 2,800 metres to 4,000 metres. The forests contain species like Chir, Kail, Silver Fir, Walnut, Horse chestnut, Oak and Deodar. These forests play an important role to improve the economy of the district as these forests provide valuable timber, medicinal herbs, resin and fire woods etc.

3. Kullu Greater Himalaya: This region comprises the crest of greater Himalaya which passes through north and eastern Kullu district. It covers eastern parts of Kullu and Manali tahsils, north-eastern tip of Sainj Sub-tahsil and northern, eastern and south-eastern parts of Banjar tahsil. This region is surrounded by Lahul & Spiti district from north to east, by Shimla district and Satluj basin from south and by Kullu forests from west. It's south-eastern boundary is formed by Kinnaur district.

This region is very rugged and mountainous and also has many Dhars. Some of the important Dhars are Ali Ratni Dhar (5,269 metres), Ghodil Dhar (4,220 metres), Sirkhand Dhar (5,159 metres) and Dharing Dhar (4,183 metres). Elevation in this region varies between 4,012 metres and 6,632 metres above the mean sea level. Pin Parvati Pass (5,319 metres) is an important physical feature in this region and is situated on the boundary line between Kullu and Lahul & Spiti districts in the east. The region contains many glaciers viz. Dudhon glacier, Parvati glacier, Tichu glacier, Sara Umga glacier and Dibi ka glacier on the north and north-eastern parts. Parvati river which originates from the Parvati glacier, is the major tributary of Beas river in this region. Another tributary Tirthan river also takes birth in the region from Sirkhand Dhar. The climate of this region is severe and dry.

The main geological structure of this region is Granites (unclassified), Haimanta group and Jutogh group and central gneiss. The region is covered by udalfts (20), orthents-ochrepts (58) and glaciers and snow cap (103) types of soils. The region has no vegetation cover.

This region covers a huge unmeasured and uninhabited area due to its rugged terrain and unfavourable climatic conditions.

4. Satluj Basin: This region embraces the southern part of Kullu district including entire Ani and Nermand tahsils. It is bounded by Kullu forests and Kullu Greater Himalaya in the north, Mandi district in the west while Shimla district encloses it from south to east.

The region is hilly and also has two important Dhars, Jalori Dhar and Sirkhand Dhar which run along the northern boundary of Ani and Nermand from west to north-east direction. Altitude of this region varies between 1,059 metres and 5,148 metres above the mean sea level.

Slope rises in this region from the bed of Satluj river and its tributaries. Maximum height of 5,148 metres is attained at the boundary line between Nermand and Banjar tahsils in the extreme north of the region. Satluj river, the second main river of the district enters the region at Kindla in the north-east and runs along the southern boundary of the region and separates it from Shimla district. It leaves the region at Behna in the south-west. The whole water is drained by the rivulets/streams viz. Ani, Khuddi, Beha and Kurpan Khads etc., which originate from these two Dhars and flow from north to south direction and ultimately merge in Satluj river in this region.

The climate is hot in summers and cool in winters. Maximum rainfall is received during monsoon. Higher reaches receive snowfall during winter.

Geologically speaking western parts of this region are mainly formed by Jutogh group/vaikrita group and central Gneiss formations while in eastern part, the geological structure is formed by Nagthat, Muth and manikaran formations. Udalfts-ochrepts (24) types of soils are found in the western part of this region while Orthents-Ochrepts (58) type of soils cover the south and eastern parts. In this region, upper areas are covered with densely mixed jungles mainly chir, kail, oak and deodar.

5. Pir Panjal: This region is situated in the extreme northern and north-western parts of the district and occupying only a small part of Manali tahsil. It makes its boundary with Kangra district in the west, Lahul & spiti district in the north and east and Kullu forests in the south while Kullu Greater Himalaya touches it from the south-east direction.

The region is characterized with high snow covered mountains, glaciers and passes. The altitude of this region varies between 3,685 metres and 5,932 metres above the mean sea level. Maximum height of 5,932 metres in this region is attained by Hanuman Tibba which is situated on the boundary line between Kullu and Kangra districts in the west. Rohtang pass (3,978 metres) is situated in the northern part, is one of the major Physical feature of this region besides other passes viz., Thanod, Taintu Ka Jot (4,996 metres) and Hamta Jot (4,268 metres). This region contains many Dhars. Some of these are Beas Kund Dhar, Shiti Dhar, Kara Dhar, Rohan Dhar and Satbehui Dhar. Western part of this region is comparatively higher in elevation than eastern part. Beas river which is the main river of Kullu district, originates in the Pir Panjal range from Beas Rishi spring near Rohtang pass and flows towards south.

The geological structure of this region is mainly formed by granites (unclassified) formations and it has Udalfts (20) type of soil cover which is high base status of humid regions. The region is without vegetation cover.

This region covers very small unmeasured area of the district and is un-inhabited due to its tough and rugged terrain and climatic conditions. The only motorable road is border road which connects this

region as well as district with Lahul & Spiti district. Rohtang pass in this region is a place of tourist interest as the crest of this pass affords a wide spread panorama of mountain scenery.

Drainage-(River System):

Beas is the principal river of the district. Satluj river however touches the fringes of the district boundary in the Nermand and Ani tahsils and the entire drainage of the district is received by these two rivers. The Beas river originates from the Beas Kund a small spring of Pir Panjal Ranges at Rohtang Pass at a height of 3,900 metres approximately and flows southwards for about 120 kms., till it reaches Larjee. In this area tributaries are on the east bank spread out in the shape of a fan based on the length of the river between Bhuin and Larjee. On the right of west bank of the main affluent are Solang, Manalsu, Sujoin and Fozal nallas and the Sarvari at Kullu. Parvati river also receives the water of the Malana nalla at Jari and other tributaries of the Parvati are also on its right bank. Parvati river after flowing in the north-westerly direction takes a south-westerly course before merging with Beas. Between its basin and that of the Sainj nalla lies the Hurlagad which rises from a glaciated area. It joins the Beas opposite Bajaura. Sainj khad originates from Supa Kuni a high peak located on the boundary of Spiti and after running through the Sainj valley, it merges with Beas river at Larjee. Tirthan stream joins the Sainj khad a little above the junction of the latter with Beas river. The flow of Beas river and its tributaries are at its lowest during the winter months of December, January and February and highest during June, July and August. In July and August these rivers and their tributaries are in flood and over-flow their banks.

Satluj river which forms the southern boundary of the district and separating it from Shimla district rises from Mansarover and touches the district in Nermand tahsil opposite to Rampur tahsil of Shimla district. Its main tributaries from Kullu district are Kurpan and Ani khad which originate from Bashleo and Jalori Peaks. These rivers and their tributaries are the life line of district and these are useful for generation of electric power and raising fishery activities.

Climate:

The climate of the district is cool and dry. There are three broad seasons viz. cold season from October to February, hot season from March to June and rainy season from July to September. Snowfall generally occurs in December and January at higher hills and most of the regions are cut off from the district headquarters since the mountain passes are closed. The district receives moderate rainfall and bulk of it is received during the months of July, August, December and January. August is the wettest month throughout the district. From climatic point of view the most enjoyable altitude is between 1,500 to 1,800 metres as this range is neither too hot nor too cold.

Statement-A shows the comparative data of average annual rainfall for three years of district as well as for Himachal Pradesh. Highest average annual rainfall in the district i.e.1215.3 millimetres was recorded during the year 2008 where as in 2007 it was recorded as 886.6 millimetres. Of the three years 2009 has shows the minimum average rainfall 825.1 millimetres in the district.

STATEMENT-A
Average Annual Rainfall for Five Years (In mm)

Sl. No.	Year	Average Rainfall (millimetres)	
		Himachal Pradesh	Kullu
1	2	3	4
1	2007	1000.5	886.6
2	2008	1141	1215.3
3	2009	907.9	825.1

Statement-B shows month wise maximum and minimum temperature recorded in Celsius degree during the year 2010. The selected center is Bhuntar which is just 9 kms. from district headquarter. Wind characteristics depend upon season, as it is hot during the months of May, June and coldest in the months of December, January. During the monsoon season the land becomes fresh and green and small water channels in the hills begin to swell.

STATEMENT-B
Maximum and Minimum Temperature at Nearest Selected Center Bhuntar (Kullu)-2010

(in °Celsius)		
Month	Maximum Temperature	Minimum Temperature

Land, Land Use Pattern and Tenancy:

The district is comprised of many fertile valleys as well as high elevation areas. The cultivation is possible in small terraces of holdings in the high hills and the stream/khad basins in most parts of the district. In the valleys, the cultivation is spread over a vast area. The cultivation of crops is confined mostly to flat valley areas while orchards cover the upper slopes of the valleys and river basins. Except the valley area and stream/khad basins most of the land is either under shrub forests or grassy land with Chil trees up to the height of 1,500 metres from the mean sea level and Kail, Deodar, Spruce, Poplar on the higher altitudes. It is only in the valleys that the land is mostly flat and fertile and the cultivation of cereals is done.

Settlement operations in the district were carried out at different times. Prior to land reforms, most of the holdings are in the hands of land-lords who had leased out the same to the tenants on payment of rent in kind or cash. With the framing of tenancy laws, the land-lordism has almost been abolished and after the implementation of Himachal Pradesh Tenancy and Land reforms Act most of the cultivators have become the owners of the land held by them on tenancy except in the case of minors, widows, disabled and service personnel. Before the introduction of Land Reform Laws, the tenants in addition to paying different types of rents also used to render services to the land-lords. With the introduction of land reform laws the tenants have been relieved of the miserable plight to a greater extent and there has been a marked change in their social and economic status.

Statement-C Showing comparative information for number of operational holdings and area operated by size of holdings during agricultural census of 2000-01 and 2005-06. In comparison to 2000-01 agricultural Census the statement shows a slight increase in total number of holdings during 2005-06 agriculture Census. During 2000-01 and 2005-06 agriculture census the total number of holdings were

62,625 and 67,753, respectively. Out of the total holdings majority of the operational holdings were occupied by the marginal farmers having less than 1 hectare of land. In the agricultural Census of 2000-01 and 2005-06 marginal farmers were having 50,331 and 55,414 holdings, respectively.

The Statement-D given below depicts the comparative information about land utilization (in '000 hectares) for the years 2006-07, 2007-08 and 2008-09. Out of the total 64,300 hectare of total cropped area, 27,000 hectares comes under the area sown more than once while 5,800 were put-under non-agricultural uses during the year 2008-09.

STATEMENT-D
Land Utilization

(In '000 Hect)												
Year	Geographical Area by Village Papers	Forest Land	Misc.Tree Crops & Groves (Not included in Net Area Sown)	Permanent Pastures & Other Grazing Lands	Culturable Waste	Land put to Non- Agriculturable Uses	Barren & Unculturable Land	Current Follows	Other Follows	Net Area Sown	Area Sown More Than Once	Total Cropped Area

Agriculture:

The economy of the district basically depends on Agriculture, and more than 80 per cent of the workers are engaged in Agricultural activities. The elevation of Kullu district ranges from 914 metres to 4,084 metres above sea level with varied Agro-climatic conditions. The texture of soil ranges from sandy loam to clay loam and the colour of the soil also vary from brown to dark brown. Generally the sandy soil is acidic in nature and the terrain except in the valley is hilly. Depth of the soil varies from 50 to 150 cms. But despite this all the agro climatic conditions provide a range of potentialities for growing cash crops like off season vegetables, seed potatoes, pulses and temperate fruits apart from the cereals, millets and oil seeds. Among the cereals, wheat, maize, paddy and barley are extensively grown.

The holdings are small and cultivation is done by traditional techniques of farming leading to low production. The mechanization of agricultural operation is not possible due to small size and terraced fields.

Statement-E shows area under different crops. Since the economy of the district basically depends on agriculture hence majority of the workers are engaged in agricultural activities. Despite the hilly topography of the district the agro climatic conditions provide a range of potentialities for growing cash crops like off season vegetables, potatoes, pulses and temperate fruits apart from cereals and millets. Among the cereals wheat and maize are extensively grown. The comparative data of area under different crops and production thereof for the years of 2006-07, 2007-08 and 2008-09 is given below as Statement E and F, respectively.

STATEMENT - E
Area Under Different Crops

(In Hect)

Fertilizer:

Fertilizer is a vital input which plays a major part to increase the agricultural as well horticultural production. The comparative statement for the state and the district for fertilizer consumption in metric tonnes for the year 2008-09 is given below as Statement-G which shows the total consumption of 4,369 metric tonnes (MT) in district in comparison to 57,363 MT for the state.

STATEMENT - G
Fertilizer Consumption for 2008-09

(In M.T.)				
State/ Concerned District	Nitrogenous (N)	Phosphatic (P)	Potassic (K)	Total (N+P+K)
1	2	3	4	5

Kullu	2085	1022	1262	4369

Source: Directorate of Agriculture, H. P.

As stated above the economy of Himachal Pradesh largely depends on agriculture hence government has provided many safeguards to the farmers of the state. One of the schemes launched by the government is crop insurance scheme.

Crop Insurance Scheme:

In order to provide insurance to all crops and to all farmers, the Government has introduced 'Rashtriya Krish Bima Yojna' in the state from the Rabi season of 1999-2000. At the initial stage only maize, paddy, barley and potato crops were covered under the scheme. But up to the year of 2010-11 other crops like ginger and tomato were also included under the scheme. From the Rabi season of 2007-08 subsidy from 10 per cent was increased to 50 per cent to all the small and marginal farmers. The project of subsidy is being run by the 'Bharat Krishi Bima Company'. Under the scheme all the loanees and non-loanees farmers are covered.

Irrigation:

To increase the crop production the importance of irrigation is well established. Multiple cropping and to accelerate the growth in production depends upon irrigation. The sources of irrigation are Kuhls, lifts and tanks where rain water is stored. During the year 2008-09 the total net irrigated area in kullu district was 2,553 hectares. In order to increase agricultural production steps like opening of new Kuhls, supply of improved seeds and fertilizers etc. are being taken by the state government.

The major source of irrigation in the district is Kuhls and lift irrigation where water is lifted from the streams/rivers by electric motor. The other sources of irrigation are not in use due to the hilly terrain. More than half of the total irrigated area falls in Kullu and Manali Tahsils which constitutes the main Kullu valley.

The following Statement-H shows the comparative area under irrigation for the state as well as for the district during 2008-2009.

STATEMENT - H
Net Irrigated Area by Source for 2008-09

						(Hectares)
State / District	Canal	Tanks	Other Wells	Tube Wells	Other	Total

Horticulture:

Horticulture occupies an important place in the economy of the district. Agro-climatic conditions prevailing in the district offer a great scope for the production of temperate and sub-tropical fruits especially apple, peach, apricot, chestnut, almonds, japonica phal, cherries, goose berries and olive. With a view to augment income of farming community, special efforts are being made to bring more area under orchards in the valley and in the higher ranges also.

In order to meet the increasing demand for improved fruit plants a number of progeny-cum-demonstration orchards besides some private nurseries have been set up at various places. Regional Horticulture Research Station of Dr. Y.S. Parmar University of Horticulture and Forestry at Bajaura has done a commendable job to achieve the target in the horticulture field. All these efforts have been successful to improve the economic conditions of the people.

During the year 2007-08 and 2008-09 the area under different fruits and production of fruits are given below as Statement-K & L, respectively.

STATEMENT-K
Area Under Different Fruits

H.P.M.C.-a state public undertaking is marketing fresh fruits and vegetables, processing the unmarketable surplus and marketing the processed products.

Co-operative societies:

Co-operative societies have an important role in socio-economic growth of the people of the district. During 2007-08 and 2008-09 number of primary agricultural credit co-operative societies and non-agricultural credit co-operative societies is given in Statement M & N, respectively.

STATEMENT-M

Minerals:

The district does not possess minerals of commercial significance and reserves of a few minerals are found in the parts of district but their mining is not economically viable. The following minerals are found in the districts which are used locally:

i) **Beryl:** White and bluish coloured crystals of beryl are found in Saraouga valley and north-east of Dando Dee Thack in the Parvati valley. Beryl is the source of beryllium and its transparent green variety emerald is a precious gem stone.

ii) **Building Stone:** The area abounds in variety such as quartzite and granite. A Number of slate quarries producing roofing slate for local use which is located in the rocks of the central gneiss Kullu and Banjar formations.

iii) Kyanite: It is a silicate of aluminium and is used for refractory bricks. The mineral occurs at a number of places in Parvati valley. It is found in the form of blue blades and associated with central gneiss formations.

iv) Copper: Occurrence of copper ore is reported from Chashikni, Jhari, Maol, Saon and Satgahr but deposit of copper ore is not in large quantity.

v) Limestone: Limestone is the main raw material for cement. It occurs in the Larji formation in southern parts of Kullu valley and also in the Garsha saiji valleys. Limestone found in this district is yet to be exploited for commercial use as no cement plant has been set-up in the district or nearby area.

Soil:

The texture of soil ranges from sandy loam to clay loam and the colour of the soil also vary from brown to dark brown. The soil is acidic in nature and terrain is hilly except in the valleys. The soils of the district have been classified into three groups. First group is comprised of Orthents-Ochrepts (58) soils and are recently formed soils having shallow black, brown and alluvial characteristics. These soils cover major areas of the district embracing western, central and south-eastern parts of the district. Udalfs and Udalfs-Ochrepts types of soils are found in northern and southern fringes of the district. The glaciated and snow cap type of soils are found in very high altitude areas of western Kullu and Manali tahsils.

Forests:

Forests occupy a prominent place in the economy of the district and these are administered by the forest division Kullu. Extensive tracts of forests exist throughout the district which is richly wooded. Forests constitute a major proportion of the total land. The forests of Kullu district are rich in various kinds of medicinal herbs like Karu, Dhoop, Muswala and Kakar Singi. Mushrooms are also available in plenty and extracted in large quantity.

Deodar attains considerably dimensions in the upper Beas and Parvati valleys. All the higher ranges have dense forests while in the valleys as one descends lower, the growth of forests is less. Deodar, Kail, Chil, Walnut, Horse chestnut and oak are better classes of trees found in abundance in the forests. Rae, Tosh and Ardar which stand beautiful from artistic point of view are also available in plenty. But these are not useful for building purposes because the timber gets rotten when exposed to rain.

The Kullu forests considerably resemble those in the adjacent parts of Kangra and Mandi with the exception that in quality these are better. Chil, Pine is found best in quartzite rock and it is available in the Parvati and Tirthan valleys. Wild olive and mulberry are found on lower levels. Extensive forests of common Himalayan oak are found largely in the Hurla valley above 2,400 metres elevation. Spruce and silver fir forests also exist. The oak, spruce and silver fir trees attain a height of about 61 metres. Hazel, Hornbeam, Yew and Bird Cherry are also found. Birch, Moru, Ban and Rhododendron are found in greater quantity along with willows, Ash, Wild Apple and Juniper. Tree growth is replaced by Alpine pastures ascending to the limit of vegetation and snow line. These grazing grounds are used for grazing sheep and goats during the summer and also by the ponies where the slope is not too steep. During winter when these uplands are snow covered, the forest work ceases till return of spring. There are many shrubs and plants which provide food, medicines and dyes. Wild strawberry, raspberry and barberry are also found.

As per the classification of forest area by legal status the forest in Himachal Pradesh cover an area of 37,033 square kilometres and form about 66.5 per cent of the total geographical area of the state. Accordingly the district has an area of 4,952 square kilometres under its forest.

The Statement-O shows classification of forest area by its legal status for the district is given below:-

STATEMENT-O
Classification of Forest Area By Legal Status

(In Sq.kms.)						
Year	Reserved Forest	Demarcated Protected Forest	Un-demarcated Forest	Unclassified Forest	Other Forest	Total

Flora:

The following various species of the plants and forest trees are generally found in Kullu district:

Botanical Name	Local Name
Cedrela serrata	Duri or Dari
Aesculus indica	Gun or Khaner
Acer caesium	Mandar
Pistacia integerrima	Kakraim or Kakar
Rhus cotinus	Tung
Rhus wallichii	Rikhal, Arkhal
Dalbergia sissoo	Tali or Shih and Shishu
Pyrus pashia	Kainth or Shegal
Pyrus lanta	Pala
Prunus padus	Paja
Prunus padus	Jaman
Prunus armeniaca	Shari
Prunus persica	Aru, Malaru
Contoneaster bacillaris	Reunsh
Prinsepia utilis	Bhekhhal
Rubus ellipticus	Anchu, Achla
Rubus paniculatus	Thisri
Pieria evalifolia	Ailan or Arban
Rhododendron campanulatum	Shargar, Kashmiri Pata
Fraxinus floribunda	Angu
Buxus sempervirens	Shamshad
Ulmus villosa	Maran
Morus indica	Chun, Chimo
Ficus rxburghii	Trembala or Trimul
Ficus palmate	Phagra
Populus ciliata	Phalsh
Alnus nepalensis	Koi or Kosh
Quercus semecarpifolia	Kreu or Kharshu
Taxus baccata	Phatish or Rakhal
Cedrus deodara	Kelon or Kelo
Abies webbiana	Tos
Picea morinda	Rai
Cupressus terulea	Dedididar

Fauna:

The district provides habitation and sustenance for numerous fauna. The mountains, forests and streams, abundant food, shelter, water and large stretches of uninhabited and comparatively inaccessible area provide favourable condition for sheltering many kinds of wild life.

Brown and black bear, the spotted and white leopard, musk deer, wild cat, flying squirrel, hyaena, wild pig, jackal, fox and marten are found in the district. The climatic conditions prevailing in the district are most favourable for their regeneration. Hill pheasant and monal are found in the higher ranges. The white crested pheasant, koklas and the cheer, red jungle fowl, black and wood partridge, chukor are very common in lower hills. Snipe, wood cock and teal are also found. In winter the snow pheasant and snow partridge are also found along with the wild duck and geese. Eagles, vultures, kites and hawks inhabit the upper fastnesses and occasional specimens have been secured by bird fanciers. Due to considerable pressure on the forests and reckless felling of trees many places have been denuded resulting in the fast disappearance of wild animals and birds.

Fisheries:

Most of the habitation in Kullu district is found in the interior valleys having rivers, streams and nallas which provide ample scope for development of pisciculture in the district. The main source of these rivers/streams and nallas are perennial snow covered peaks of inner Himalayas. The crystal clear water of these rivers containing lot of minerals is most favourable for the growth of fisheries. The most favoured fish is trout which was introduced in this district far back in 1909 by G.C.L. Hovel and General Orborn. Since then this variety of fish has spread to larger areas in the main river Beas and its tributaries.

A hatchery was set up at Chhaki Nalla near Naggar at Mahili. Looking at the successful experiment of trout fish, other farms at Sujain Nalla and Patli Kuhl were also established in the years 1941 and 1943, respectively. These cold water hatcheries of Kullu proved as models not only for the state but for the country as a whole.

Ova fisheries are being supplied to other states like Uttar Pradesh, Sikkim, Arunachal Pradesh etc. In addition to trout, Himalayan Barbel and Gurgoli are also found in the river waters of this area.

The Government of India had not only increased substantially the subsidy component being paid to the beneficiaries under the on going fish farming development schemes but also initiated number of new schemes. The beneficiary now is entitled for the financial assistance of maximum Rs. 80,000/- per hectare for general Category farmers & Rs. 1, 00,000/- per hectare for SC/ST farmers for construction of new pond, Rs. 15,000/- per hectare for general Category farmers & 18,750/- per hectare for SC/ST for renovation of pond, Rs. 10,000/- per hectare for general Category farmers & Rs. 12, 500/- per hectare for SC/ST for the 1st year inputs, assistance for setting up fish feed unit in Rs. 1.50 lakh on a unit cost of Rs. 7.50 lakh and integrated units including hatcheries for Ornamental Fishes-Unit cost Rs. 15 lakhs which includes hatchery of 5-10 million capacity.

Statement-P shows the comparative data for the state as well as district for the year 2008-09 for fish production (Prawn Cultivation). The total fish production in district was 304.41 metric tonnes whose value was Rupees 233.30 lacs.

STATEMENT-P

Animal Husbandry:

Livestock is an important source of income. Every household invariably keeps a few cows, buffaloes, sheep, goats etc. Besides providing a source of income, livestock also serves as a source of balanced diet for the people. Milk, meat and eggs provide protein for the human diet and manure for the fields. Bullocks are utilized for ploughing the fields as mechanisation of farming activities is not much possible due to small holdings and hilly terrain.

Sheep and goats are also found in quite good number in the district. These animals are very useful for milk, meat, wool and manure purposes. The exotic varieties of sheep found in the district are Russian marina Rambulitlee which yield more wool of better quality. To boost the income of farmers, rabbit farming is being popularized in the district yielding superior quality of wool. The department of Animal Husbandry is also making efforts for improving the local variety of cow, sheep etc. The local cattle fairs play an important role in bringing a distinct improved breed of cattle to the knowledge of the people.

Statement-Q depicts the number of livestock and Poultry during animal Census of 2007 for the state and as well as for the district.

For prevention of common infectious diseases of livestock, veterinary aid is of paramount importance. The district has wide net of veterinary institutions and has 18 veterinary hospitals, 89 dispensaries, one polyclinic and 2 other institutions during 2009-10. These institutions are providing veterinary aid for common ailment and also helping in prevention and control of contagious diseases. The district has five artificial insemination centres and two poultry and sheep breeding farms.

The Himachal Pradesh State Co-operative milk producer's Federation is implementing dairy development activities in the state. This Federation has several milk collecting centers and is engaged in processing and distribution of milk and milk products in the market.

Handicrafts:

Art of weaving occupies a place of pride in the crafts of the district. This household industry is certainly of the very ancient origin in the state. The state is rich in producing wool, the wool spinning and weaving is important industry of many households in this district.

In the series of weaving, Kullu shawls are famous among the handicrafts of district. Kullu caps and mufflers are considered popular gifts of this district and are much in demand in the state and in others parts of the country. Plain shawls of Pashmina locally known as 'Loi' are woven by all households. Shawls are of two kinds, one is plain and other is of variety of designs. The shawls are woven from home-spun yarn as well as from the imported yarn called "*Ruffle*". The designed shawls known as "*Phulwali*" are of recent origin and their prices depend on the quality of material used and design pattern woven on them by the craftsman.

Another allied craft is the weaving of Pattoos and tweed cloth (Patti). '*Patti*' is used for making coats, long coats (*Cholas*) and caps etc. Kullu caps are made of coloured woollen cloth with a velvety circular band of shaneel etc. around it. '*Pullans*', foot wear like the bed room slippers made of fibres and wool are other products of handicrafts of upper riches of inner and outer Seraj '*Pattoos*' are also made of local wool. These are thicker and heavier than shawls. Ordinary thick and soft one is called "*Dohru*" are mostly used as bed blankets. The "*Pattoos*" woven of fine wool with coloured strips are used by women folk as a dress in the rural areas.

The weavers of Kullu district have also formed Co-operative Society namely Bhutti weavers co-operative society to encourage the export of handicraft goods. It is one of the oldest co-operative societies which provides technical and financial assistance to its members and has opened sale outlets in different parts of the state.

Basketary:

Basketary is another handicraft of the district which plays a vital role in fruit economy of the district. Baskets are made of a high altitude species of bamboo called 'Nargal' Baskets and Kilta, are useful for collection of fruits in the orchards as well as for packing and day to day working also

Industries:

Though district is centrally located yet it is locked from almost all directions by lofty mountains. Besides this, the district is not having any basic raw materials and minerals except lime stone for setting of large and medium scale industrial unit. The district has bright potential for establishing industrial units for processing of fruit products as Kullu district is one major producer of apple and other quality fruits in the state. However, the district is known for some of its beautiful traditional handicrafts in weaving. multi coloured caps and shawls of Kullu are well known in the country. M/s. D.S. Foods Ltd. Raison is medium scale industrial unit of the district.

The Statement-R shows the comparison of number of registered factories in district and worker engaged in these factories with respect to state for the year 2007, 2008 and 2009. During the year 2009 in kullu district there were 177 registered factories and 1,433 working manpower engaged in these factories as compared to 3,657 registered factories and 2,18,309 working manpower in these factories in state:

STATEMENT-R
Number of Registered Factories and Workers

State / District	Year					
	2007		2008		2009	
	No. of Factories	No. of Worker	No. of Factories	No. of Worker	No. of Factories	No. of Worker

Kullu	175	1,363	176	1,413	177	1,433

Source: Chief Inspector of Industries, N.P.

Tourism:

Tourism in Himachal Pradesh has been recognized as one of the most important sectors of the economy as it is being realized as a major engine for growth for future. Himachal Pradesh as a whole is endowed with all the basic resources necessary for thriving tourism activity like geographical and cultural diversity, clean, peaceful and beautiful streams, sacred shrines, historic monuments, lush green forests and above all friendly and hospitable people. Tourism industry in Himachal Pradesh has been given very high priority and has developed appropriate infrastructure for its development which include provision of public utility services, road, communication network, airports, transport facilities, water supply and civic amenities etc. The district has also created its impact in tourism sector and attracted number of tourists to its fold.

Statement-S shows number of registered hotels/guest houses and tourists visited the district during the year 2008 and 2009.

STATEMENT-S
Number of Registered Hotels/ Guest Houses and Tourist Visited

Year	No. of Hotels/ Guest Houses	Bed Capesity	Tourist Arrival (In Lacs)		
			Domestic	Foreigner	Total

Source: Directorate of Tourism, H.P.

Transport:

The district headquarters is situated on National Highway No. 21. It also served better by state highway No. 11 and 14 and other metalled and unmetalled roads. Total road length in the district was 1,636 kms. by the end of 2009. Out of which double lane Motorable road length were only 128 kms. while single lane Motorable road length was 1,455 kms. and Jeepable & less than Jeepable road length was 53 kms. in the district. Kullu is well connected with the different places of the state and other places outside the state. Himachal Road Transport Corporation Kullu started its operation during the year 1976-77. The H.R.T.C., private buses, private taxis and Airways are the main source of transport within and outside the state. The following long route services were introduced by H.R.T.C.:

Manali-Amritsar, Manali-Delhi, Manali-Chandigarh, Kullu-Nermand, Manali-Jawalaji, Manali-Dehradun, Manali-Shimla, Manali-Chamba, Kullu-Shimla, Kullu-Trilokinath, Manali-Jammu, Kullu-Leh, Kullu-Keylong etc.

Volvo Luxury A.C. Buses and A.C. Buses: The Himachal Road Transport Corporation has fleet of Volvo Buses and A.C. Buses which are plying in district from Manali to Shimla, Chandigarh and Delhi.

H.R.T.C. has also introduced some new schemes for the benefit of the people of the state as detailed below:

(i) Smart Card Scheme: HRTC has introduced “Smart Card”. Under this scheme, a smart card holder is allowed 10% concession in fare for travelling in HRTC buses. The senior citizen as a special gesture is allowed 20% concession in fare. The general public can purchase Smart Card against a payment of Rs. 50/- having its validity for one year.

(ii) Group Discount Scheme: A group of 10 or more passengers is allowed a discount in fare @10%.

(iii) Yellow Card Scheme: Under this scheme, the card holder is allowed 20% discount in fare within the radius of 40 kms. from place of issue of card or place opted by him. Yellow Card can be purchased against a payment of of Rs. 50/- having its validity for one year.

Bhuntar Airport, alternatively known as Kullu Manali Airport located at Bhuntar just 9 kms. from district headquarter is the only source of air connectivity in the district. The district is not connected with railway line and the nearest railway station is at Jogindarnagar on the Pathankot - Jogindarnagar narrow - gauge line which is 130 kms. from the district headquarters. However, this district has network of roads where regular buses ply. Number of Motor vehicles registered during 2009 supplied by Registration & Licensing authorities of Himachal Pradesh, is shown in Statement T.

STATEMENT- T

Trade, Commerce and Banking:

Kullu remained a trade centre from the ancient days when it used to serve as a trade route with Yarkand. Trade and Commerce activities are mainly related to the export of surplus items. The main items are timber, potatoes, off season vegetables apple and other fruits. In addition, herbs, Kullu caps, coats ‘Patti’ and shawls are also being exported from the district. The import includes essential goods such as food grains, cloth, salt and sugar.

The banking services have a great role in economic growth by financing agricultural, industrial and other self employment activities etc. The district has adequate banking facilities. Most of the banks are concentrated at district, tahsil and block headquarters.

There are 57 branches of commercial and co-operative banks functioning in the district by the end of 2009 which are catering to the needs of the district. The Punjab National Bank has been declared as a lead bank in the district. The lead bank prepares the credit plan of the district to be implemented for the developmental activities by various government agencies and also identifies places for the opening of new

branches. It also acts as a liaison between the public and other banks on the one hand and between government and beneficiaries on the other.

The Statement-U shows comparison of deposit and advances and population per bank in district with respect to state during the year 2009. In 57 banks of district Kullu, a total deposit was Rs. 1,176 crores. Credit deposit ratio was 54 as compared to 40.71 of state while average population per bank was 6,694 persons.

STATEMENT-U
Deposit and Advances, Population Per Bank in - 2009

(Rs. in Crores)					
State / District	No. of Banks	Deposits	Credits	Credit Deposit Ratio	Average Population Per Bank
1	2	3	4	5	6
Himachal Pradesh	980	25,086	10,213	40.71	6,202
Kullu	57	1,176	635	54.00	6,694

Source: Quarterly statistical Book on Banking-2009

Electricity and Power:

The development of agriculture and industries can hardly be accelerated without the availability of power. The electricity for domestic purpose has become essential.

Before independence the electricity was confined to only few towns of the district. Himachal Pradesh Electricity Board was set up in September, 1971. In the field of rural electrification, the state has made remarkable achievements, inspite of the fact that Himachal Pradesh was a late starter in the field of rural electrification and also because of very difficult and mountainous terrain; it is a matter of satisfaction that all the inhabited villages of the state were electrified by the end of June, 1988. Intensive rural electrification schemes are also in operation for electrification of houses. All the villages and urban areas of the district stood electrified long back.

The state has a vast hydel power generation potential. The following Hydel projects are going on in the district:

- i) Largi Hydel Project (126 MW): This Project has been commissioned in 2003-2004.
- ii) Parvati Hydel project (2,051 MW): Parvati Hydel Project is being installed on Parvati river, a tributary of Beas river. The Parvati Hydel project proposes to harness the river in three Stages: Stage I-750 MW, Stage II-800MW, and Stage III- 501 MW.
- iii) Malana Hydel- electriect Project (86 MW): The MOU for execution of the Project was signed between HP Govt. and M/s Rajasthan Spinniing and Weaving Mills (RSWM), New Delhi on 28-08-93. The company started the project works on 27-09-98. The project started generating electricity w.e.f 05-07-2001.
- iv) Malana-II Hydel- electriect Project (100 MW): Malana-II Hydel- electriect Project (HEP) has been contemplated a power generation development on Malana, a tributary of Beas river in Kullu. The Project is slated for commissioning in 2011-12.
- v) Sainj HEP (100 MW): Sainj Hydel- electriect Project has been contemplated as a run of the river development on river Sainj, a tributary of Beas river in Kullu. The Project comprises of a diversion barrage on the river Sainj near village Niharni. The likely date of commissioning the Project is April, 2014.

Gram Panchayat

There was 204 Gram Panchayats in the district by the end of 2009. Each Gram Panchayat consists of one Gram Pradhan, one Up-Pradhan and five members duly elected by voters of that Gram Panchayat. Number of members varies according to the population of Gram Panchayat.

In view of the provisions of the constitutional 73rd amendment Act and Himachal Pradesh Panchayati Raj Act, 1994, the Panchayati Raj institutions have been devolved functions, powers and responsibilities relating to 15 departments of the State Government. As such Panchayats are involved in large number of civil works viz; construction of school rooms, paths, irrigation and water supply schemes, culverts etc. and lot of funds is being released to the Panchayats for execution of these works. These developmental works are being executed by the Gram Panchayats with very little technical help from the Junior Engineer of the concerned development block who are not able to supervise each work. In addition, the State Govt. has decided that the Gram Panchayats shall prepare micro plans proposing development interventions that reflect the felt needs in their area by way of improving rural connectivity, planning in connection with education, health and veterinary care facilities, drinking water, sanitation etc. It has also been decided that every Gram Sabha shall hold four general meetings in each year on 1st Sunday of January, April, July and October.

Keeping in view manifold increase in the functions of Gram Panchayats, it has been decided to provide them technical assistance by creating a post of Technical Sahayak for every 2 to 3 Panchayats. The technical assistant will be the employee of the Gram Panchayat who will be paid honorarium from the Sabha funds for which Gram Panchayats have been allowed to charge one per cent contingency for the works executed through them pertaining to any scheme.

The functionaries of the Panchayati Raj Institutions have to discharge various administrative, judicial and financial functions. In order to make them aware about their functions, powers and responsibilities, periodical trainings have been imparted to them.

The funds to the Panchayati Raj Institutions are being provided as per the recommendation of 1st state Financial Commission. With a view to strengthen the financial position of the Panchayati Raj Institutions and to raise resources through taxes and levies, the State Government on 1st November, 1999 have empowered the Gram Panchayats to levy taxes and fees at their own level for which maximum rates of such taxes, fees and duties have been notified by the Government under the provision of Section 100 of the Himachal Pradesh Panchayati Raj Act, 1994.

(ii) Census concepts

Building: A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses: Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of

the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutchha houses: Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutchha house.

Dwelling Room: A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House : A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village: The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un-surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area: The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns: All places with a municipality, corporation, cantonment board or notified town area committee, etc. are known as statutory towns.

(b) Census towns: All other places satisfying the following three criteria simultaneously are treated as Census Towns:

- i) A minimum population of 5,000;
- ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and
- iii) A density of population of at least 400 persons per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

Urban Agglomeration: An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc. may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(i) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(ii) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the Census 2001. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG): The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc. and physically contiguous with the core town of the UA.

City: Towns with population of 100,000 and above are called cities.

Household: A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household: A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggar's homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes:-

The list of SCs and STs applicable in the State/UT is given hereunder:-

List of Castes & Tribes in Census 2011

Code	Scheduled Castes	Code	Scheduled Castes
001	Ad Dharmi	036	Lohar
002	Badhi, Nagalu	037	Marija, Marecha
003	Balmiki, Bhangi, Chuhra, Chura, Chuhre	038	Mazhabi
004	Bandhela	039	Megh
005	Bangali	040	Nat
006	Banjara	041	Od
007	Bansi	042	Pasi
008	Barad	043	Perna
009	Barar, Burar, Berar	044	Phrera, Pherera
010	Batwal	045	Rehar, Rehara
011	Bauria, Bawaria	046	Sanhai
012	Bazigar	047	Sanhal
013	Bhanjra, Bhanjre	048	Sansi, Bhedkut, Manesh
014	Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasia, Mochi	049	Sansoi
015	Chanal	050	Sapela
016	Chhimbe, Dhobi	051	Sarde, Sarera, Sarare, Siryare, Sarehde
017	Dagi	052	Sikligar
018	Darain	053	Sipi
019	Darai, Daryai	054	Sirkiband
020	Daule, Daole	055	Teli
021	Dhaki, Toori	056	Thathiar, Thathera
022	Dhanak	057	Barwala
023	Dhaogri, Dhuai	490	Generic Castes etc.
024	Dhogri, Dhangri, Sigg	Code	Scheduled Tribes
025	Doom, Doomna, Dumna, Dumne, Mahasha	501	Bhot, Bodh
026	Gagra	502	Gaddi
027	Gandhila, Gandil Gondola	503	Gujjar
028	Hali	504	Jad, Lamba, Khampa
029	Hesi	505	Kanaura, Kinnara
030	Jogi	506	Lahaula
031	Julaha, Julahe, Kabirpanthi, Keer	507	Pangwala
032	Kamoh, Dagoli	508	Swangla
033	Karoack	509	Beta, Beda
034	Khatik	510	Domba, Gara, Zoba
035	Kori, Koli	990	Generic Tribes etc.

Language and Mother tongue: As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate: A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate: Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level: The highest level of education a person has completed.

Work: Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker: A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker: A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker: A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator: For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like-tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under "other workers".

Agricultural labourer: A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker: Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker: A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate: Percentage of Workers (Main + Marginal) to total population.

Population density: Population density is the number of persons inhabited per square kilometer of the area.

Age: Age is measured in terms of the completed number of years.

Sex Ratio: Number of females per 1,000 males in a population.

(iii) Non-Census Concepts:

Civic status of urban units: Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

Size class of U.A./town: Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population is classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area: The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city : The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population

size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 million and above population have been treated as Mega cities and the same criterion of population has been adopted in Census 2011.

Concepts used in VD and TD of DCHB:

1. Educational Amenities: The type of different educational facilities available in the village is given in numbers. Government and private educational facilities/institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

1.1 Pre-primary (PP): Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from pre-primary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P): Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

Secondary School (S): Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College: (i) **Arts/Science/Commerce:** These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) **Engineering College (E):** It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii) **Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D. or equivalent in the above branches of medicine.

1.7. Management College/Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There is Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities:

2.1 Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there are hospitals providing facilities under different systems of medicines such as, Allopathic, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathic: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) Ayurveda: Ayurveda means ‘Science of life’. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements is represented in the form of Tridosha: Vat, Pitta and Kapha. These three ‘doshas’ are physiological entities of living beings. Ayurveda developed into eight distinct specialties, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) Unani: Treatment of Unani consists of three components, namely, preventive, primitive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homoeopathy: Treatment in Homoeopathy, which is holistic in nature, focuses on an individual’s response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centers are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas

and 1, 20,000 populations for plain areas. CHC is a 30-bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centers. It has a medical officer and para medical staff.

2.4 Primary Health Sub-Centre (PHS): A Primary Health Sub-center is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 populations in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female health worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counselling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre: Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary: Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10 Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counseling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home: A nursing home is a long-term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies, treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops

and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as 'Tap water from treated source'.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from un-treated source'.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube well / Borehole (TW): Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self-explanatory.

4. Community Toilet Complex: Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes are subjected to decomposition, bio-gas could be produced under favorable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities:

7.1 Post Office (PO): Self-explanatory.

7.2 Sub-Post Office (SPO): Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self-explanatory

7.6 Mobile Phone Coverage: Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighbouring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District Roads (ODR): These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development headquarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: - Banking facility means a place where a person can operate a bank account.

8.1 Commercial Bank (CB): These may be banks wholly owned by the Government of India or by Indian or Foreign Companies.

8.2 Co-operative Banks (Coop. B): A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Co-operative banks are often created by persons belonging to the some local or professional community or sharing a common interest. These banks are registered under the Co-operative Societies Act. The co-operative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.

8.3 Agricultural Credit Society (ACS): Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.

8.4 Non-Agricultural Credit Society (NCS): These societies include consumer co-operative societies and also credit co-operative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities:

9.1 Self-help Group (SHG): Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9.2. Public Distribution System (PDS) shop: The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. Mandis/Regular Market: These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. Weekly Haat: These are those clusters of shops with or without fixed premises which are open once a week.

9.5. Agricultural Marketing Society: It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. Nutrition Centre: Integrated Child Development Services (ICDS): The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. Anganwadi Centre: Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. Accredited Social Health Activist (ASHA): ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. Sports Club/Recreation Centre: Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. Cinema/Video Hall (CV): If regular cinema houses licensed by Government are available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11. Public Library: Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. Public Reading Room: Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. Newspaper Supply: The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. Availability of Electricity/Power. If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use patterns in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage: Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

(i) Pit System: The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

(ii) Flush/pour flush: A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used).

(iii) Service Latrine: Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under “Others” category.

14. Protected Water Supply-Source and capacity of Storage system: There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for [intake screens](#). Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanage is the name to describe a residential institution devoted to the care of orphans-children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a ward of the state, and orphanages are a way of providing for their care and housing.

17. Working women's hostel: These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. Old Age Home: There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. Stadium: A stadium is a place, or venue, for (mostly) outdoor sports, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised

(iv) Census 2011 Findings - Population, its Distribution:

(a) Distribution of population in Rural-Urban Areas: According to Census 2011, the total population of Kullu district is 4,37,903 comprising 2,25,452 males and 2,12,451 females. This population of the district forms 6.38 per cent of the state population and ranks at 9th place among the districts. Out of the total population of the district 90.5 per cent lives in rural areas while 9.5 per cent lives in urban areas. Rural population of the district is distributed among 6 tahsils, sub-tahsils and urban population is spread over in 4 towns and one newly created census town namely, Shamshi. The total urban population in the district is 41,391 persons comprising 22,183 males and 19,208 females. The total rural population in this district comprises 3,96,512 persons with 2,03,269 males and 1,93,243 females as per Census 2011. In the district due to enforcement of jurisdictional changes number of villages has been increased from 172 to 326, where 12 villages are uninhabited, 314 villages are inhabited and the majority of villages are of large size consisting of several hamlets. The concentration of villages is mainly along the valleys of rivers and streams.

(b) Size class and Civic Status of towns: The statement below gives the position and number of urban units according to size class of population as per Census 2011:

Sl. No.	Size class of town	Name and civic status of town	Urban Population		
			P	M	F
1	2	3	5	6	7
1	V	Manali M CI	8,096	4,717	3,379
2	IV	Kullu M CI	18,536	9,608	8,928
3	VI	Bhuntar NP	4,475	2,364	2,111
4	V	Shamshi CT	8,870	4,746	4,124
5	VI	Banjar NP	1,414	748	666

Population Growth, Density and Sex-ratio:

Population Growth:

Kullu district witnessed a positive growth rate in each decade with 4.4, 7.7, 4.4, 6.2, 5.0, 25.8, 24.1, 26.7, 26.2 and 14.8 per cent during the period 1901 to 2011 except the year 1921 when there was decline in growth rate which was 2.2 per cent. According to Census 2001 the total population of the district was 3,81,571. There has been net addition of 56,332 persons during 2001-2011. The decadal growth rate of the district comes to 14.8 per cent. The growth rate for the rural and urban areas of the district is 12.8 and 37.5 per cent, respectively. The growth rate of rural population is slow in the district due to interior location of the district and lack of industrial development. In term of population the district ranks 9th in the state. The higher growth rate in urban population is mainly due to creation of newly Census Town Shamshi during 2001-2011.

Density:

The density of population in Kullu district is 80 persons per Sq. Km. against the state average of 123 persons. At tahsil/sub-tahsil level, the density of population varies between 190 persons in Ani sub-

tahsil and 46 persons in Banjar tahsil. In rural areas of the district it comes to 72 persons per Sq. Km. while in urban areas it comes to 2,416 persons. In urban areas, the density of population varies between 2,775 persons in Kullu M.C.I. and 634 persons in Banjar Nagar Panchayat.

Sex Ratio:

There are 942 females for every thousand males in Kullu district. The sex ratio figures for rural and urban areas of the district are 951 and 866, respectively. It is also observed that, the proportion of females in rural areas is higher than that of urban areas. Sex-ratio in age-group 0-6 comes to 962 in the district as a whole. In rural areas, this proportion is 968 while in urban areas the sex-ratio of Child population works out to 891.

Work Participation Rate:

The work participation rate is defined as percentage of total workers to total population. According to Census 2011, the total workers including main and marginal workers constitute 61.4 per cent of total population of the district. Of the total workers the share of the main workers is 44.3 per cent and marginal workers is 17.2 per cent. The remaining 38.6 per cent of population belongs to the category of non-workers.

As per Census 2011 participation rate among the male main workers in the district is 52.8 per cent and corresponding proportion of females is 35.2 per cent. The proportion of female marginal workers is substantially higher than males, as the females are attending to one or other economic activities in addition to their household duties to improve the family income. Majority of the workers are engaged in agricultural activities. Of the total 2,69,084 workers in the district 73.3 per cent of these total workers are categorized as cultivators, 4.6 per cent agricultural as labourers, 1.0 per cent are in household industries and 21.1 per cent are in other services.

Literacy:

A person who can read and write in any language is taken as literate in Census. All children of age below 7 years are treated as illiterate.

As per Census 2011 Kullu district has reported 3,07,672 persons as literates constituting 79.4 per cent of the total population excluding the population of 0-6 years. The proportion of male and female literates in the district is 87.4 and 70.9 per cent, respectively. The literacy rate of males is much higher than that of females. The difference of male/female literacy rate is of 16.5 points in the district.

The total literacy rate of rural and urban area is 78.5 and 88.1 per cent, respectively. The proportion of male and female literates in rural areas is 87.0 and 69.5 per cent, respectively. In urban areas this proportion is 91.2 and 84.6 per cent respectively. The difference between male and female literacy rates in urban areas is about 6.6 points as against 17.5 points in rural areas. It is thus clear that females are better educated in urban areas than their counterparts in rural areas.

Religion:

During Census 2011 out of the total population of 4,37,903 persons of the district 4,15,669 (94.92 per cent) persons have reported their religion as Hindu followed by 15,377 (3.51 per cent) persons as Buddhist, 2,974 (0.68 per cent) persons as Muslim, 1,568 (0.36 per cent) persons as Christian and 1,396 (0.32 per cent) persons as Sikh. Remaining 94 persons are Jain, 83 persons have Other Religions and 742 persons have not stated any religion.

Availability of University Education in the District:

There are four Govt.Arts/Science/Commerce degree colleges in the district out of which two are situated in Kullu and Banjar towns while other two in Ani and Haripur.

Mother Tongue:

During Census 2001 the district has returned 3,81,571 persons as its total population of which 3,10,460 (81.36 per cent) persons reported their mother tongue as Hindi followed by 40,974 (10.74 per cent) persons as Kashmiri. Remaining mother tongues have negligible percentage. Among the rural population of 3,51,478 persons of the district 2,88,650 (82.12 per cent) persons has returned Hindi as their mother tongue and 40,161 (11.43 per cent) persons reported their mother tongue as Kashmiri. Out of urban population of 30,093 persons, 21,810 (72.48 per cent) persons returned their mother tongue as Hindi and 2,609 (8.67 per cent) as Punjabi.

Scheduled Castes and Scheduled Tribes Population 2011:

Of the 4,37,903 total population of the district 28.0 per cent of the total population belong to Scheduled Castes and 3.8 per cent to Scheduled Tribes. The percentages of Scheduled Castes population constitute 29.1 per cent in rural areas and 17.3 per cent in urban areas of the district. The proportion of Scheduled Tribes is 3.1 and 10.5 in rural and urban areas respectively. The Scheduled Tribes population in the district is mainly concentrated in Mandi and Kullu tahsils.

(v) Brief analysis of PCA data based on inset table 1 to 35.

Table 1 : Decadal Change in Population of Tahsils by Residence, 2001-2011

Table 1: The growth rate of each tahsil/sub-tahsil in Kullu district for total, rural and urban areas and the percentage of urban population to total population are given in the table. The decadal growth rate of the district is 14.76 per cent during 2001-2011. In absolute terms, the population of district has increased from 3,81,571 in 2001 to 4,37,903 in Census 2011 resulting in net increase of 56,332 persons. The rural and urban growth rate of district is 12.81 and 37.54 per cent, respectively. Out of the total population of the district 90.55 per cent lives in the rural areas while 9.45 per cent in the urban areas of the district. The urban population is concentrated mostly in Manali and Kullu tahsils. Sub-tahsils Sainj, Ani and tahsil Nermand are entirely rural. Sainj Sub-tahsil has shown the highest decadal growth rate of 25.27 per cent while Nermand tahsil has shown the lowest growth rate of 10.79 per cent. The highest growth rate of urban population is 41.28 per cent recorded in Kullu tahsil during 2001-2011.

Table 2: It presents the number and percentage of inhabited villages in specified population size ranges with the related population of 2011. The Census 2011 presents data upto the C.D. block level. Kullu district has 5 C.D. blocks, namely Naggar, Kullu, Banjar, Anni and Nirmand. As per Census 2011 out of 326 villages in the Kullu district 314 villages are inhabited with a rural population of 3,96,512 persons comprising of 2,03,269 males and 1,93,243 females.

Among the C.D.blocks, Kullu claims the highest population i.e. 1,24,750 persons residing in 55 villages which is followed by Naggar with 1,01,550 persons living in 174 villages, Banjar with 60,206 persons residing in 42 villages, Ani and Nirmand follow the suit with 56,917 persons in 17 villages and 53,089 persons distributed in 26 villages, respectively.

Regarding the distribution of villages by population ranges, 61 villages or 19 per cent of total villages fall in population range of less than 200 persons. 67 or 21 per cent of villages are covered by population range of 200-499 persons, 46 or 15 per cent villages by population range of 500-999 persons, 73 or 23 per cent villages by range of 1,000-1,999 persons, 57 or 18 per cent villages fall in the range of 2000-4999, 9 or 3 per cent villages in population range of 5,000-9,999 persons. There is a solitary village relating to Naggar C.D. block in the district, which falls in population range of 10,000 & above. The majority of villages in district are of larger size as compared to other districts.

Table 3: New towns, de-notified, declassified and merged town in Census 2011

(a)	New	
	(i) Statutory town	-
	(ii) Census town	Shamshi
(b)	Denotified	
	(i) Statutory towns of Census 2001 denotified and also did not satisfy the criteria to be treated as Census towns.	-
	(ii) Statutory towns of Census 2001 denotified but identified as Census towns based on demographic and economic criteria.	-
	(iii) Census towns of Census 2001 are notified as statutory town in Census 2011.	-
(c)	Declassified	-
(d)	Wholly merged with other town(s).	-

*Declassified means the census towns of Census 2011 which failed to satisfy the demographic and economic criteria.

Table 3: This table relates to new towns added, towns declassified or wholly merged with other town during the Census 2001. In Kullu district one new town namely, Shamshi has been created as Census Town during the decade 2001-2011.

* Sexwise population for 1901 Census is not available

Note: Sex ratio has been defined here as the number of females per 1,000 males.

Table 4: This table reflects the pattern of sex ratio since 1901 in the state and district. Sex ratio is defined as the number of females per thousand males. In Kullu district there are 942 females for every thousand of males. This is lower than that of state average sex ratio of 972 as per Census 2011. In rural and urban area this ratio comes to 951 and 866 in the present Census, respectively.

From the above statement it is observed that the rural sex ratio of Kullu district was above the equality line from 1911 to 1931 but in subsequent decades it declined and it varies from 930 to 952 during the period 1941 to 2011. In case of urban areas, the sex ratio has slight increasing trend though it could not cross the value of 900 in any of the decade. Urban population was recorded first time in 1951 with sex ratio of 716 f against the sex ratio of 866 in 2011. But between this period, it has up and down swings.

As regards the sex ratio at the state level it has increased by 83 points whereas the sex ratio at the district level declined by 67 points during last 100 years. Similarly sex ratio for the rural areas at the state level increased by 81 points and at the district level it decreased by 58 points. But in case of urban areas for the state as a whole for the last 50 years it has increased by 203 points whereas in case of district level it has increased by 96 points only.

Table 5: Sex ratio by Sub-district, 2011

Sl.No.	Name of Sub-district	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	00117-Manali	864	895	716
2	00118-Kullu	948	955	907
3	00119-Sainj	942	942	-
4	00120-Banjar	965	968	890
5	00121-Ani	957	957	-
6	00122-Nermand	966	966	-
District: 026-Kullu		942	951	866

Table 5: It shows the proportion of female per 1,000 males for each sub-district and town of the district. The overall sex ratio for the rural area comes to 951 whereas the sex ratio for urban area comes to 866. Regarding rural areas Banjar sub-district comes at the top with 968 and is followed by Nermand sub-district with 966 females. Ani sub-district with 957 females, Kullu with 955, Sainj sub-district with 942 and Manali sub-district at the last with 895 females. As regard urban areas Kullu sub-district comes at the top with 907 followed by Banjar sub-district with 890 and Manali sub-district with 716. The remaining sub-district are entirely rural.

Table 6: Sex ratio by CD Blocks, 2011

Sl.No.	Name of CD block	Sex ratio
1	2	3
1	0025-Naggar	941
2	0026-Kullu	944
3	0027-Banjar	960
4	0028-Anni	957
5	0029-Nirmand	966
Total		951

Table 6: This shows the proportion of female per 1,000 males for each C.D. block. The overall sex ratio for all the C.D. blocks comes to 951. Among the C.D. blocks, Nirmand with 966 comes at top and is followed by Banjar with 960, Anni with 957 females, Kullu block with 944 and Naggar with 941.

Table 7: Sex ratio of rural population by ranges, 2011

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2011	Percentage distribution of population
1	2	3	4	5
Less than 700	12	3.82	1,263	0.32
700 - 749	5	1.59	3,938	0.99
750 - 799	9	2.87	2,333	0.59
800 - 849	13	4.14	9,171	2.31
850 - 899	30	9.55	26,616	6.71
900 - 949	67	21.34	1,20,354	30.35
950 - 999	99	31.53	1,77,207	44.69
1,000 - 1,099	62	19.75	51,407	12.96
1,100+	17	5.41	4,223	1.07
District: Kullu (026)	314	100.00	3,96,512	100.00

Sex ratio District (Rural):951

Table 7: It reflects the sex ratio of rural population by ranges based on Census 2011. The maximum number of villages i.e. 99 of total inhabited villages accounting for 31.53 per cent falls in the sex ratio range of 950-999. It is followed by 67 villages constituting 21.34 per cent of villages falling in the sex ratio range of 900-949. There are 62 villages comprising of 19.75 per cent of villages which falls in the sex ratio range of 1,000-1,099, 30 villages or 9.55 per cent of villages in sex ratio range of 850-899, 17 villages or 5.41 per cent of villages in sex ratio range of 1,100+, 13 villages or 4.14 per cent of village in sex ratio range of 800-849 females, 12 villages or 3.82 per cent of villages in sex ratio range of less than 700, 9 villages or 2.87 per cent of village in sex ratio range of 750-799. There are only 5 villages or 1.59 percent of villages which are covered in sex ratio range of 700-749.

The highest population 1,77,207 or 44.69 per cent of population relates to sex ratio range of 950-999 while second position is occupied by the sex ratio range of 900-949 with 1,20,354 persons or 30.35 per cent to total rural population and the lowest number of population 1,263 or 0.32 per cent of population relates to sex ratio range of less than 700.

Table 8: Sex ratio of towns, 2011

Sl.No.	Name of town	Urban status of town	Sex ratio
1	2	3	4
1	800100-Manali (M CI)	(M CI)	716
2	800101-Kullu (M CI)	(M CI)	929
3	800102-Bhuntar (NP)	(NP)	893
4	012896-Shamshi (CT)	(CT)	869
5	800103-Banjar (NP)	(NP)	890
Sex ratio (Urban) district:			866

Table 8: The table shows the sex ratio in each town of the district. The sex-ratio in urban areas of the district comes to 866. The highest sex-ratio 929 has been reported in Kullu Municipal Council and lowest being 716 in Manali Municipal Council. The main reason for low sex ratio in urban areas is possibly due to influx of male workers engaged in various services who do not bring their families.

Table 9: Sex ratio of population in the age group 0-6 for Sub-district, 2011

Table 9: It depicts the presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each sub-district of the district as per Census 2011. There are 6 sub-districts in Kullu district. Total population in age-group 0-6 is 50,431 persons comprising 25,707 males and 24,724 females. The total sex-ratio in this age-group works out 962 in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 968 and 891 in this age-group respectively. Of all the sub-districts (rural area) Nermand & Banjar sub-districts heads in sex ratio with 1,024 followed by Kullu sub-district with 960, Sainj sub-district with 949 and Manali sub-district with 945, lastly, Ani sub-district comes at the bottom with 927. Of the urban areas Kullu (M CI) & Bhuntar (NP) which falls in Kullu sub-district tops the district in sex ratio with 905 followed by Banjar (NP) which is located in Banjar sub-district with 893 and Manali (NP) which falls in Manali sub-districts with 841.

Table 10: Sex ratio of population in the age group 0-6 for CD Blocks, 2011

Sl.No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

Table 10: It shows the C.D. block wise sex ratio of population in the age group 0-6. The overall sex ratio for rural area of the district comes to 968. The sex-ratio of C.D. block in the age-group 0-6 varies between 927 and 1,024. It is highest in Nirmand with 1,024 and is followed by Banjar with 1,007, Kullu block with 955, Naggar block with 954 and Anni block with 927. The sex-ratio of Nirmand and Banjar C.D. blocks are higher than the district rural (968) while in remaining three C.D. blocks it is below the average of the district.

Table 11: Sex ratio of rural population in the age group 0-6 by ranges, 2011

		Rural	3,96,512	1,15,514	12,463	29.13	3.14
		Urban	41,391	7,145	4,359	17.26	10.53

Table 13: It depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at sub-district level in rural and urban areas of the district. Of the 4,37,903 total population of the district, 28.01 per cent of the total population belongs to the Scheduled Castes and 3.84 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 29.13 per cent in rural population and 17.26 per cent in urban population of the district. As regards rural and urban population, the proportion of Scheduled Tribes comes to 3.14 and 10.53, respectively. It is clear from the table that the concentration of Scheduled Castes is more in rural population while concentration of Scheduled Tribes is more in urban population.

At sub-district level, the highest percentage of 44.99 Scheduled Castes population is recorded in Nermand sub-district and is followed by Ani sub-district with 30.29, Sainj sub-district with 29.38 while lowest is found in Manali sub-district with 15.94 per cent. The highest percentage of Scheduled Tribes is

recorded in Manali sub-district with 10.62 and is followed by Kullu sub-district with 5.23 while the lowest is found in Banjar sub-district.

Table 14: Number and percentage of Scheduled Castes and Scheduled Tribes (rural) population in CD Blocks, 2011

Total		3,96,512	1,15,514	12,463	29.13	3.14

Table 14: This table depicts number and percentage of Scheduled Castes and Scheduled Tribes population in C.D. blocks. In Kullu district Scheduled Castes and Scheduled Tribes constitute 29.13 per cent and 3.14 per cent of the total rural population, respectively. The percentage of Scheduled Castes is higher in Nirmand (44.99 per cent) and Anni (30.29 per cent) C.D. blocks than district rural average of 29.13 per cent. Naggar C.D. block has lowest proportion of 21.98 per cent Scheduled Castes and is followed by Kullu C.D. block (28.13 per cent) and Banjar (28.00 per cent) C.D. block. The proportion of Scheduled Tribes is higher in Naggar C.D. block (8.57 per cent) and Kullu (2.62 per cent). The other C.D. blocks have negligible proportion of Scheduled Tribes population.

Table 15: It depicts the proportion of Scheduled Castes population to total population in the villages. 47 villages accounting for 14.97 per cent of total 314 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 20 villages (6.37 per cent). In 21 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 59 villages constituting 18.79 per cent of the total villages. The ranges of 21-30 and 31-40 per cent contain 67 and 49 villages, respectively, both these ranges together account for 36.95 per cent villages of the district. 27 villages fall in the range of 41-50 while 21 villages fall in the range of 51-75 per cent. There are only 3 villages containing 0.18 per cent Scheduled Castes population of the district where the proportion of Scheduled Castes is more than 75 per cent. In the rural areas of district the

Scheduled Castes population at the time of Census 2011 is 1,15,514. The maximum number of Scheduled Castes population i.e. 32,624 or 28.24 per cent of total population is covered by the range of 31-40 whereas the lowest population i.e. 208 or 0.18 per cent of total population is recorded in the range of less than 5 per cent.

Table 16: It depicts the proportion of Scheduled Tribes population to total population in the villages. 146 villages accounting for 46.50 per cent of total 314 inhabited villages in the district do not have any Scheduled Tribes population. Among the remaining 168 villages, the share of Scheduled Tribes population is less than 5.0 per cent in 84 villages or 26.75 of villages, 5-10 per cent in 34 villages or 10.83 of villages, 11-20 per cent in 33 or 10.51 of villages, 21-30 per cent in 12 or 3.82 of villages, 41-50 per cent in 4 villages or 1.27 of villages, 51-75 per cent in 1 village or 0.32 of villages. None of the villages fall in the percentage of 31-40 and 76 and above, Out of Scheduled Tribes population of 12,463 persons, the maximum number of 4,395 or 35.26 per cent is covered by the range of 5-10 followed by 3,859 (30.96 per cent) in the range of 11-20 whereas the lowest population i.e. 249 or 2.0 per cent of total population is recorded in the range of 51-75 per cent.

Table 17: Number and percentage of Scheduled Castes and Scheduled Tribes population in towns, 2011

District (Urban) : 026-Kullu		41,391	7,145	4,359	17.26	10.53

Table17: This table depicts the number and percentage of Scheduled Castes and Scheduled Tribes population in the towns. Scheduled Castes and Scheduled Tribes in the towns constitute 17.26 per cent and 10.53 per cent, respectively of the district urban population. The percentage of Scheduled Castes is higher in Shamshi (CT) (20.53), Banjar (NP) (19.24) and Kullu M CI (18.19) than the district urban average of 17.26 per cent. Manali (M.CI.) has the lowest proportion of 11.43 per cent Scheduled Castes followed by Bhuntar (NP). The proportion of Scheduled Tribes is higher in Shamshi (CT) 19.05 followed by Manali (M CI) 11.39 per cent, Kullu (M CI) 8.16 per cent whereas Banjar (NP) with 0.28 per cent comes at the bottom.

Table 18: Sex ratio among Scheduled Castes and Scheduled Tribes (rural) in CD Blocks, 2011

Sl.No.	Name of C.D.block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

Total		958	972

Table 18: Table represents the C.D. block wise sex ratio for the Scheduled Castes and Scheduled Tribes in rural areas of the Kullu district. The sex ratio for the Scheduled Castes for the district (rural) as a whole is 958 in Census 2011. It is 967 in Banjar C.D. block which is the highest in the district whereas the lowest sex ratio of 948 has been recorded in Anni C.D. block. In case of Scheduled Tribes the sex ratio for the district (rural) as a whole is 972. It is 1,069 in C.D. block Nirmand which is the highest in the district whereas the lowest sex ratio is 805 in Anni C.D. block.

Table 20: It deals with the sub-district wise literacy rate separately for males and females excluding the children in the age-group 0-6 years besides the number of literates and illiterates. The general literacy rate for the district as a whole comes to 79.4 per cent. It is higher than the rural literacy rate of 78.47 per cent for the district and lower than the urban literacy of 88.15 per cent for the urban areas of the district. At district level, literacy rate for males is 87.39 per cent and for females 70.91 per cent whereas it is 86.96 per cent for males and 69.52 per cent for females in rural areas. In urban areas of the district, it is 91.18 per cent for males and 84.63 per cent for females.

The gap in male/female literacy rate for the district as a whole is 16.48 per cent. For rural areas it is 17.44 per cent and for the urban areas it is 6.55 percent. Among the sub-districts, the highest gap in male/female literacy rate is found in the Nermand sub-district with 18.5 per cent and it is lowest in Manali sub-district with 15.23 per cent. Urban literacy for the districts higher than the rural as well as district rate of literacy. At sub-district level, Manali with 80.79 per cent literacy comes at the top followed by Banjar with 80.46 per cent literacy, Kullu with 80.02 per cent literacy, Ani with 78.41 per cent literacy, Sainj with 78.1 per cent literacy and Nermand with 76.49 per cent literacy, there is no urban area in Ani and Nermand.

Table 21: Reveals number of literates, illiterates and the literacy rate in the rural areas at C.D. block level in the district. 78.47 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 86.96 and 69.52 per cent, respectively, which shows a wide gap of 17.44 per cent between male and female literacy. At C.D. block level Banjar C.D. block has the highest rural literacy rate of 79.69 per cent while 88.07 per cent males and 70.89 per cent females are literates in the block. The lowest literacy in the rural areas is noted in Nirmand C.D. block with 76.49 per cent. There is wide variation in male and female literacy in all C.D. blocks of the district. The maximum difference of 18.5 point is found in Nirmand C.D. block while lowest 16.62 is found in Naggar C.D. block.

Table 22: Distribution of villages by literacy rate range, 2011

District: Kullu(026)	314	100.00	3,96,512	100.00
Literacy rate for District:		78.47		

Table 22: It depicts distribution of villages by literacy rate ranges in the district. In the rural areas of the district maximum number 164 or 52.23 per cent of villages with a population of 2, 30,808 (58.21 per cent of population) falls in the literacy range of 71-80 per cent. 95 villages or 30.25 per cent of villages with a population of 1, 42,230 (35.87 per cent of population) fall in the literacy rate range of 81-90. Another 36 villages or 11.46 per cent of villages with a population of 19,963 (5.03 per cent of population) fall in the

literacy rate range of 61-70, 5 villages or 1.59 per cent of villages with a population of 21 only (0.01 per cent of population) fall in the literacy rate range of 100 per cent. 4 villages each or 1.2 per cent of villages with a population of 1,018 (0.26 per cent of population) and 624 (0.16 per cent of population) respectively fall in the literacy rate of 91-99 and 51-60. 3 villages or 0.96 per cent of villages with a population of 111(0.03 per cent of population) falls in the literacy rate range of 41-50 while 1 village each or 0.32 per cent of villages with a population of 1,722 (0.43 per cent of population), 8 and 7 (0.0 per cent of population) falls in the literacy rate range of 31-40, 11-20 and 21-30, respectively. Literacy ranges below 11.0 per cent do not have any village within their limit. There is much improvement in rural literacy and the proportion of rural literate comes to 78.47 per cent, as a whole, in the district.

Table 24: It reveals the number and percentage of Scheduled Castes literates and illiterates by sex at the C.D. block level in the district. The total literacy rate of the Scheduled Castes population in the rural areas of the district is 74.66 per cent with male literacy having 83.4 per cent and female literates accounting for

65.51 per cent. It shows the wide gap of 17.89 points in male-female literacy rates. The literacy rate of Scheduled Castes among C.D. blocks in the district varies between 73.04 per cent in Kullu and 76.8 per cent in Anni. Three C.D. blocks fall above and two below the district average literacy rate of 74.66 per cent in Scheduled Castes population. There is wide variation in male and female literacy in all the C.D. blocks. The maximum variation of 19.19 points is found in Naggar C.D. block which is followed by Nirmand (18.81), Kullu (18), Banjar (17.84) and Anni with 14.85 points. In other words, females are lagging behind males in literacy in all the C.D. blocks.

District Scheduled Castes Literacy rate:		74.66		

Table 25: It reflects the distribution of villages by literacy rate ranges for Scheduled Castes population (Rural) in the district. Out of 314 inhabited villages in the district there are 267 inhabited villages having Scheduled Castes population. Among these 267 inhabited villages, the largest number of 144 villages (53.93 per cent) having 72.78 per cent of Scheduled Castes population fall in the literacy range of 71-80 followed by 50 villages (18.73) having 13.36 per cent of Scheduled Castes population fall in the literacy range of 61-70, 39 villages (14.61 per cent) having 11.07 per cent of Scheduled Castes population fall in the literacy range of 81-90. In other 19 villages (7.12 per cent) having 2.62 per cent of Scheduled Castes population fall in the literacy range of 41-50, 6 villages (2.25 per cent) having 0.06 per cent of Scheduled Castes population fall in the literacy range of 14-50, 5 villages (1.87 per cent) having 0.02 per cent of Scheduled Castes population fall in the literacy range of 100 per cent. 3 villages (1.12 per cent) having 0.08 per cent of Scheduled Castes population fall in the literacy range of 91-99. Literacy ranges below 31.0 per cent do not have any village within their limit.

Table 26: It reveals the number and percentage of Scheduled Castes literates and illiterates by sex in town. The total literacy rate of the Scheduled Castes population in the urban areas of the district is 81.33 per cent. The corresponding proportion of males and females comes to 86.24 per cent and 76.04 per cent, respectively. It shows the gap of 10.2 per cent between male and female literacy rate. At town level Banjar (NP) has the highest literacy rate of 91.39 per cent where 95.12 per cent males and 87.6 per cent females are literates in the town. The lowest literacy rate in urban area is noted in Bhuntar (NP) with 73.81 per cent where 78.55 males and 68.94 females are literates in the town. There is variation in male and female literacy in all the towns of the district. The maximum variation of 14.7 points is found in Shamshi (CT) while the lowest of 7.29 is found in Manali (M CI).

Table 27: It relates to number and percentage of Scheduled Tribes literates and illiterates at C.D. block level. During Census 2011, the total rural literacy rate of Scheduled Tribes population of district comes to 81.44 per cent, as a whole. Male literates constitute to 89.22 per cent while female literates account for 73.51 per cent. Among C.D. blocks, Banjar has shown the highest literacy rate of 86.96 per cent followed by Naggar 82.95 per cent and lowest is found in Nirmand with 71.25 per cent. Male literacy is highest in Banjar C.D. block with male literacy accounting for 97.47 per cent and female literacy 76.83 per cent. The gap in male-female literacy rate for the rural area of the district is 15.71 per cent. Among C.D. blocks, gap between male and female literacy is highest in Banjar C.D. block (20.64 per cent) followed by Naggar (17.23 per cent) and lowest is found in Nirmand C.D. block with 11.01 per cent.

Literacy rate for District:		81.44		

Table 28: It depicts the distribution of the villages by literacy rate ranges for Scheduled Tribes population in the district. There is no literate among the Scheduled Tribes in 4 (2.38 per cent) villages having Scheduled Tribes population of 6 persons in the district while 26 (15.48 per cent) villages have all the literate Scheduled Tribes population having 125 persons (1.0 per cent) only. The largest number 59 (35.12 per cent) villages fall in the literacy rate range of 81-90 per cent having population of 6,941 persons (55.69 per cent) and is followed by 36 (21.43 per cent) villages in literacy rate range of 71-80 per cent having population of 3,168 (25.42). 13 villages (7.74 per cent) fall in literacy rate range of 91-99 per cent, 12 villages each of (7.14 per cent) in literacy rate range of 41-50 & 61-70 per cent and 3 villages (1.79 per cent) in 51-60 per cent. The proportion of Scheduled Tribes living in the above category of villages is 8.06, 1.49, 5.71 and 2.44 per cent, respectively.

Table 29: It reveals number and percentage of Scheduled Tribes literates and illiterates by sex in towns. According to Census 2011, 87.91 per cent of the total urban population excluding the age group 0-6 years is literate in the district. The corresponding proportion of males and females comes to 93.01 per cent and 82.92 per cent, respectively. This shows a gap of 10.09 per cent between male and female literacy in the district. At the town level Banjar (NP) has the highest urban literacy of 100.0 per cent where all the males and females are literate in the town followed by Kullu (M CI) having literacy rate of 90.62 per cent, Bhuntar (NP) with 88.64 per cent and Shamshi (CT) (83.87 per cent). The lowest literacy in the urban areas is noted in Manali (M CI) where 85.19 per cent are literate. There is a variation in the male and female literacy in all the towns except Banjar (NP). The maximum difference of 12.02 point is found in Bhuntar (NP) followed by Shamshi (CT) 11.39 point, Manali (M CI) with 9.97 point and in Kullu (M CI) it is 8.66 point.

Table 30: This table presents number and percentage of main workers, marginal workers and non-workers by sex at sub-district level in the district as per Census 2011. Out of total population of 4,37,903 persons in the district 1,93,876 or 44.27 per cent have been classified as main workers, another 75,208 persons or 17.17 per cent as marginal workers. In other words 2,69,084 or 61.45 per cent of the population of the district has been returned as total workers and 1,68,819 or 38.55 per cent as non-workers. Sex wise analysis of working population shows that among the males 52.81 per cent are main workers and 13.21 per cent marginal workers. While among the females 35.22 per cent are main workers and 21.38 are marginal workers.

A glance at the sub-district wise position of working population shows that the proportion of main workers to total population varies from 40.3 per cent to 48.95 per cent. In case of males it varies from 49.74 per cent to 58 per cent whereas in case of females it varies between 26.4 and 45.51 per cent.

The participation in the marginal activities of work is 17.17 per cent in the district. Among males, 13.21 per cent and among females, 21.38 per cent have been returned as marginal workers. Predominance

of females in the marginal activities of work, in comparison to their men folks, may be seen in the light of fact that apart from attending to domestic chores they also assist in agricultural operations.

Table 31: It shows number and percentage of main workers, marginal workers and non-workers by sex in C.D. blocks. In the district, as a whole, 45.01 per cent of rural population constitutes main workers which include 52.68 per cent male workers and 36.93 per cent female workers. At C.D. block level, Naggar has 44.06 per cent workers, males and females break-up being 54.97 per cent and 32.48 per cent, respectively. In Kullu C.D. block the main workers are 45.10 per cent of the total population, males/females break-up being 52.72 per cent and 37.03 per cent, respectively. In Banjar C.D. block, the total main workers are 46.81 per cent of the total population and males/females break-up being 51.69 per cent and 41.74 per cent, respectively. In Anni C.D. block the total main workers are 48.95 per cent, males being 52.25 per cent and females 45.51 per cent respectively. In Nirmand C.D. block the total main workers are 40.30 per cent, males being 49.74 per cent and females 30.52 per cent, respectively. 18.59 per cent of the rural population of the district have been recorded as marginal workers, males/females break-up being 14.27 per cent and 23.13 per cent, respectively.

In the district 63.59 per cent of rural population constitutes the total workers, males and females ratio being 66.95 per cent and 60.06 per cent, respectively. Among C.D. blocks, Naggar have 62.31 per cent total workers of total population, males and females being 68.01 per cent and 56.25 per cent, respectively. In Kullu C.D. block, total workers constitute 64.69 per cent, males and females being per 67.91 cent and 61.29 per cent, respectively. In Banjar C.D. block, it is 67.16 per cent, males and females break-up being 68.69 per cent and 65.57 per cent, respectively. In Anni C.D. block the total workers are

63.66 per cent, males being 64.94 per cent and females 62.31 per cent, respectively. In Nirmand C.D. block, it is 59.34 per cent, males and females break-up being 62.80 per cent and 55.76 per cent, respectively.

The rural area of the district has a non-working population of 36.41 per cent, males being 33.05 per cent and females 39.94 per cent. Nirmand C.D. block with 40.66 per cent non-workers comes at the top followed by Naggar with 37.69 per cent, Ani with 36.34 per cent and Kullu with 35.31 per cent. Banjar C.D. block with 32.84 per cent non-workers comes at the bottom.

District(Urban): Kullu(026)		Persons	41,391	15,425	37.27	1,509	3.65	16,934	40.91	24,457	59.09
		Males	22,183	11,970	53.96	770	3.47	12,740	57.43	9,443	42.57
		Females	19,208	3,455	17.99	739	3.85	4,194	21.83	15,014	78.17

Table 32: It shows number and percentage of main workers, marginal workers and non-workers by sex in towns. In the district as a whole 37.27 per cent of urban population constitute main workers which include 53.96 per cent male workers and 17.99 per cent female workers. Among towns Manali (M CI) has 44.86 per cent workers, males and females worker being 63.94 per cent and 63.94 per cent, respectively. In Shamshi (CT) the main workers are 39.20 per cent, males and females break up being 54.38 per cent and 21.73 per cent, respectively. In Bhuntar (NP) the total main workers are 34.91 per cent of total population and males/females break up being 53.55 per cent and 14.02 per cent, respectively. In Kullu (M CI) the main workers are 33.89 per cent, males and females break up being 49.16 per cent and 17.45 per cent, respectively. In Banjar (NP) the total main workers are 33.45 per cent, males being 51.34 per cent and females 13.36 per cent, respectively.

In the district 40.91 per cent of population constitutes the total workers, males and females ratio being 57.43 per cent and 21.83 per cent, respectively. Town wise Shamshi (CT) has 48.67 per cent total

workers to total population, males and females being 61.50 per cent and 33.90 per cent, respectively. Manali (M CI) has 46.15 per cent total workers to total population, males and females being 65.66 per cent and 18.91 per cent, respectively. In Kullu (M CI), total workers constitute 36.44 per cent, males and females being 52.32 per cent and 19.35 per cent, respectively. In Bhuntar (NP) it is 36.09 per cent, males and females being 54.91 per cent and 15.02 per cent, respectively. In Banjar (NP), it is 36.14 per cent, males and females break-up being 53.34 per cent and 16.82 per cent respectively.

The urban area of the district has a non working population of 59.09 per cent, males being 42.57 per cent and females 78.17 per cent. Bhuntar (NP) with 63.91 per cent non-workers comes at the top followed by Banjar (NP) with 63.86 per cent, Kullu (M CI) with 63.56 per cent, Manali (M CI) with 53.85 per cent; Shamshi (CT) with 51.33 per cent non-workers comes at the bottom.

Table 33: It shows the distribution of workers by sex in four categories of economic activities in sub-districts. The relative importance of main spheres of economic activity may be gauged from the pattern of distribution of total workers (main plus marginal), according to the broad four industrial categories viz. Cultivators, agricultural labourers, household industry and other workers. The economic activity of the district is primarily agriculture which is supported by the fact that the cultivators (73.26 per cent) and agricultural labourers (4.60 per cent) together constitute 77.86 per cent of total workers of the district. The

agricultural sector has absorbed more than three fourth of the total workers. It may be seen that in less than one fourth of the workers are engaged in the work other than agriculture.

The sub-district wise distribution of workers in 4 categories of works of economic activities is shown in the table. The proportion of both cultivators and agricultural labourers differs considerably from sub-district to sub-district. The population of cultivators varies between 87.84 per cent in Banjar and 51.68 per cent in Manali sub-district. The proportion of agricultural labourers varies between 7.23 per cent in Nermand sub-district and 1.80 per cent in Banjar sub-district. Such variations within the district are due to differences in fertility of soil and resultant cropping patterns. The proportion of females is higher than the males in both the activities of cultivators and agricultural labourers. In case of other two categories viz. household industry workers and other workers, their participation rate comes to 1.01 per cent and 21.13 per cent, respectively. Proportion of male workers is higher than the female workers in both these categorie

Table 34: It gives the distribution of rural workers by sex in four categories of economic activity in C.D. blocks. The relative importance of main spheres of economic activity in 5 C.D. blocks of Kullu district may be gauged from the pattern of distribution of total workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry and other economic activities. The economy of the rural areas is primarily dependent on agriculture as supported by the fact that cultivators (77.72 per cent) and agricultural labourers (4.67 per cent) together constitute 82.39 per

cent of the total workers in the rural areas of the district. 17.6 per cent are engaged in non-agricultural activities. Among these (0.90 per cent) are household industry workers and 16.70 per cent are other workers. C.D. block wise distribution of workers in 4 categories is given in the table. Banjar C.D. block has the highest proportion of agriculture workers employing 88.77 per cent as cultivators and agricultural labourers together and is followed by Ani (86.97 per cent), Kullu (81.88 per cent), Nirmand (80.17 per cent) and the lowest percentage of 77.46 cultivators and agricultural labourers of the total workers is found in Naggar C.D. block.

Table 35: It presents town wise distribution of workers by sex in four categories of economic activity. Out of 41,391 total urban population of the district, total workers (main + marginal) constitute 16,934 i.e. 40.91 per cent of the total population. Among these workers at town level, cultivators constitute 6.92 per cent, agricultural labourers 3.47 per cent; household industry workers claim 2.52 per cent while the proportion of other workers is 87.09 per cent. In urban areas of the district the percentage of other workers is much higher than other economic activities. The proportion of other workers varies between 65.81 per cent in Shamshi (CT) and 98.45 per cent in Manali (M CI) while the proportion of cultivators varies between 1.02 per cent in Manali (M CI) and 20.08 per cent in Shamshi (CT). The percentage of agricultural labourers and household industry workers together in the urban areas of the district is quite low i.e. 5.99 per cent only. The proportion of agricultural labourers varies between 0.08 per cent in Manali (M CI) and 10.26 per cent in Shamshi (CT) while household industry workers vary in towns between 0.46 per cent in Manali (M CI) and 3.85 per cent in Shamshi (CT).

(vi) Brief analysis of the Village Directory and Town Directory Data based on inset tables 36 to 45.

Table 36: Distribution of villages according to availability of different amenities, 2011

Sl. No.	Name of C.D. Block	Number of inhabited villages	Type of amenity available

Note:

* Education includes all education facilities.

^ Medical includes all medical facilities.

Post office includes post office, telegraph office and Post and telegraph office.

\$ Transport communication includes bus service, rail facility and navigable waterways.

@ Bank includes Commercial Bank and Cooperative Bank.

** Telephone includes Telephone, PCO and Mobile.

Table 36 : It shows C.D. block wise distribution of villages according to the availability of different amenities like education, medical, drinking water, post office, telephone, transport communications, banks, agricultural credit societies, approach by pucca road and power supply. Out of 314 inhabited villages in the district, 247 villages or (78.66) per cent have been provided with the education facility of one type or the other. Similarly 154 villages in the district constituting (49.04) per cent have medical facilities of one type or the other. Drinking water facility is available in all the villages of the district. Regarding post office facilities which includes post offices, telegraph offices, post and telegraph offices also, 177 villages constituting (56.37) per cent of villages have been provided with the post office facility within the village. As regards telephone facility which includes telephone, PCO and Mobile, 288 or (91.72) per cent villages have been provided with telephone facilities, 235 or (74.84) per cent with transport facility, 87 or (27.71) per cent with bank facility, 95 or (30.25) per cent with the agricultural credit societies. Similarly there are 187 or (59.55) per cent villages which have been linked with pucca roads and lastly all the villages have been provided with electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block level has been found with slight variation. 62 villages in Naggar C.D. block and 5 villages in Kullu C.D. block have no education facility while this facility is available in rest the villages of the C.D. blocks. Medical facility is available in all villages of Anni C.D. block while in Naggar C.D. block only 38 or (21.84) per cent villages have medical facilities of one type or the other. Post office facility is available in all villages of Ani C.D. block and it is lowest in 67 or (38.51) per cent in Naggar C.D. block. As far as the availability of the facility of telephone is concerned, all villages of Nirmand C.D. block are having the facility of telephone while it is lowest in 11 or (64.71) per cent in Anni C.D. block. Transport communications facility is highest in Anni C.D. block where all villages are having the facility of transport and it is lowest in 27 or (64.29) per cent in Banjar C.D. block. Bank facility is highest in 8 or (47.06) per cent in

Anni C.D. block and lowest in 7 or (16.67) per cent in Banjar C.D. block. In Anni C.D. block 15 or (88.24) per cent of villages having the facility of agricultural credit societies while it is lowest in 19 or (10.92) percent in Naggar C.D. block. In Nirmand C.D. block 20 or (76.92) per cent of the villages are approached by pucca roads while in Naggar C.D. block this facility is available to 90 or (51.72) per cent of the villages.

Table 37: Number and percentage of rural population served by different amenities, 2011

Sl. No.	Name of C.D. Block	Total population of inhabited villages	Type of amenity available									
			Education *	Medical ^	Drinking water	Post office #	Telephone **	Transport communications \$	Banks @	Agricultural credit societies	Approach by pucca road	Power supply

Note:

* Education includes all education facilities.

^ Medical includes all medical facilities.

Post office includes post office, telegraph office and Post and telegraph office.

\$ Transport communication includes bus service, rail facility and navigable waterways.

@ Bank includes Commercial Bank and Cooperative Bank.

** Telephone includes Telephone, PCO and Mobile.

Table 37: It elaborates proportion of rural population served by different amenities. Out of rural population of 3,96,512 persons in the district, 3,84,128 or 96.88 per cent have educational facility of one type or the other within villages. Similarly 3,23,925 or 81.69 per cent enjoy medical facilities. Regarding drinking water facilities, all the villages have been provided with drinking water facility. Post office facilities are available to 3,08,495 persons or 77.8 per cent. Telephone facility is available to 3,68,413 or 92.91 per cent. Transport communication facility is available to 3,40,092 or 85.77 per cent. 1,39,389 or 35.15 per cent have been provided with the bank facility. Agricultural credit societies are available to 2,05,491 or 51.82 per cent. 2,87,393 or 72.48 per cent have the approach to pucca road. All the villages have been provided with the facility of electricity. The position of availability of these amenities at C.D. block level is almost similar to the district pattern.

Table 38: Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available, 2011

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)

Post office includes post office, telegraph office and post & telegraph office

Telephone includes Telephone, PCO and mobiles

Bus includes private and public

Table 38: It presents the distribution of villages not having certain amenities within the village. The villagers have to go out of their villages to avail these facilities. Such villages have been presented according to various distance ranges in this table. Out of 314 inhabited villages as many as 70 villages are deprived of primary school, 142 middle school and 312 Degree College. In case of primary school, 62 avail the facility at a distance of less than 5 kms and 8 villages at a distance of 5-10 kms. Regarding middle school, 112 villages at a distance of less than 5 kms. and 30 at a distance of 5-10 kms. In respect of Degree College, 16 villages avail this facility at a distance of less than 5 Kms, 45 villages between 5-10 kms. and 251 villages at a distance of 10+ kms.

Similarly, there are 303 villages in the district which have been devoid of hospital facility and 298 villages are deprived of PHC facilities, of these 47 villages have the facility of hospital within 5 kms., while in respect of 34 villages the inhabitants have to cover a distance of 5-10 kms. to avail this facility. Similarly overwhelming number i.e. 222 villages have this facility at a distance of 10+ kms. In case of PHC, 108 avail this facility at a distance of less than 5 kms., 112 at a distance of 5-10 kms. and the habitants of remaining 78 villages have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 137 villages do not have this facility in the village itself. Of these majority i.e. 97 have this facility at a distance of less than 5 kms., another 31 villages avail it at a distance of 5-10 kms. and in the remaining 9 villages habitants have to travel a distance of 10+ kms.

As regards Telephone facilities, there are 26 villages in the district which are without telephone facilities. Of these 7 avail this facility at a distance of less than 5 kms., 4 at a distance of 5-10 kms. and remaining 15 have to traverse a distance of 10+kms.

For bus service, out of 80 villages which do not have this facility, 42 avail this facility at a distance of less than 5 Kms., 26 at a distance between 5-10 kms. and 12 at a distance of 10+kms.

In the entire district 244 villages are deprived of Commercial banks and 280 of Cooperative banks. Of the 244 villages which are deprived of Commercial banks, 56 avail this facility at a distance of less than 5 kms., 76 between 5-10 kms. and remaining 112 at a distance of 10+kms. Regarding Cooperative banks, out of 280 villages, 62 villages avail this facility at a distance of less than 5 kms., another 102 villages at a distance between 5-10 kms. and remaining 116 at a distance of 10+kms.

219 villages do not have agricultural credit societies. For 57 villages this facility is available at less than 5 kms. distances, 83 villages avail this facility at a distance of 5-10 kms. and the remaining 79 villages at a distance of 10+ kms.

Table 39: Distribution of villages according to the distance from the nearest statutory town and availability of different amenities, 2011

\$ Transport communication includes bus service, railway facility and navigable waterways.

@ Bank includes Commercial Bank and Cooperative Bank.

** Telephone includes Telephone, PCO and Mobile.

Table 39:- It deals with the distribution of villages according to the distance from the nearest statutory towns and availability of different amenities. Of the total 314 inhabited villages in the district, there are 28 villages which have nearest towns up to a distance of 5 Kms.. Of these, 20 villages or 71.43 per cent have educational facility. Another 9 villages forming 32.14 per cent have the medical facility within the village, 13 villages forming 46.43 per cent have facility of post office within the village. 23 villages or 82.14 per cent have the facility of telephone. 19 villages constituting 67.86 per cent have been linked by transport service. 10 villages comprising 35.71 per cent have been provided with bank facilities while 6 villages or 21.43 per cent have been provided with agricultural credit societies and 21 villages comprising 75 per cent have been provided with pucca road.

There are 96 inhabited villages in the district which fall in the distance range of 5-15 Kms.. Of these, 78 villages or 81.25 per cent have educational facility. 55 villages comprising 57.29 per cent have been provided with medical facilities. 56 villages constituting 58.33 per cent enjoy the post office facility. 90 villages comprising 93.75 per cent have been provided with the telephone facility. 76 villages

constituting 79.17 per cent have been linked with transport communications. 33 villages comprising 34.38 per cent have bank facility. 37 villages comprising 38.54 per cent are having agricultural credit societies, while 65 villages or 67.71 per cent are approachable by pucca road.

There are another 171 inhabited villages which fall in the distance range of 16-50 Kms. Of these, 130 villages or 76.02 per cent have educational facility, 71 villages or 41.52 per cent have the medical facility. 89 villages or 52.05 per cent have post office facility, 161 villages or 94.15 per cent have telephone facility, 121 villages or 70.76 per cent have transport communications facility. 35 villages or 20.47 per cent have bank facility and agricultural credit societies respectively. 87 villages constituting 50.88 per cent have been provided with pucca road.

There are 19 villages in the district which are situated beyond 50 Kms. from the nearest town. Of these all the villages enjoy the facility of education, medical, post office and transport communications in village itself. 14 villages comprising 73.68 per cent have been provided telephone facility. 9 villages comprising of 47.37 per cent have been provided with the facility of bank. 17 villages or 89.47 per cent are having agricultural credit societies. 14 villages constituting 73.68 per cent have been connected by pucca road.

Table 40: It deals with the distribution of villages by population ranges and amenities available therein. In Kullu district out of a total of 314 inhabited villages, 128 fall in population range of 1-499 persons. Of these, 67 villages or 52.34 per cent have educational facility, 15 villages or 11.72 per cent have medical facility, all 128 villages have drinking water facility, 45 villages or 35.16 per cent have post office facility, 115 or 89.84 per cent have telephone facility and all 128 villages have power supply. Out of remaining 186 villages, 46 villages fall in the population range of 500-999 persons. Of these 46 villages or 89.13 per cent have educational facility, 20 or 43.48 per cent have medical facility, all 46 villages have drinking water facility, 22 villages or 47.83 per cent have post office facility, 43 or 93.48 per cent have telephone facility, 31 or 67.39 per cent have transport communications facility, 13 villages or 28.26 per cent have bank facility, 9 villages or 19.57 per cent have agricultural credit societies and 36 villages or 78.26 per cent have been linked by pucca road.

Another 73 villages fall in population range of 1,000- 1,999, of these 72 villages or 98.63 per cent have been provided with educational facility, 56 or 76.71 per cent have medical facility, all 73 villages have drinking water facility, 47 villages or 64.38 per cent have post office facility, 69 villages or 94.52 per cent have telephone facility. 57 villages or 78.08 per cent enjoy the benefit of transport communications. 23 villages or 31.51 per cent have bank facility, 37 villages or 50.68 per cent have agricultural credit societies and 54 villages or 73.97 per cent have been linked by pucca road.

57 villages fall in the population range of 2000-4999 persons. All of these villages have got the facilities of educational, drinking water and power supply, 53 villages or 92.98 per cent have got medical facility, 54 villages or 94.74 per cent have post office facility, 52 villages or 91.23 per cent each have telephone and transport communications facility, 19 villages or 33.33 per cent have been provided with bank facility, 39 villages or 68.42 per cent have agricultural credit societies and 42 villages or 73.68 per cent have been linked with pucca road. 9 villages fall in the population range of 5,000-9,999. All these villages have educational, medical, drinking water, transport communication and power supply facilities. 8 villages or 88.89 per cent each have post office and telephone facility, 6 or 66.67 per cent have bank facility, 4 villages or 44.44 per cent have been provided with the agricultural credit societies and 7 villages or 77.78 per cent have approached by pucca road.

The remaining one bigger sized village falls in the population range of 10,000+. This village is having all types of facilities except the facility of bank and agricultural credit society.

Table 41: Distribution of villages according to land use, 2011

Sl.No.	Name of CD Block	Number of inhabited villages	Total are (in Hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	0025-Naggar	174	19,763.25	33.27	19.78
2	0026-Kullu	55	15,704.38	69.42	3.12
3	0027-Banjar	42	9,043.87	67.56	0.00
4	0028-Anni	17	7,849.39	63.42	1.57
5	0029-Nirmand	26	7,866.20	74.37	6.27
Total		314	60,227.09	57.14	6.06

Note:- Cultivable area= irrigated area + unirrigated area

Table 41: It presents C.D. Block wise distribution of villages according to land use. It also gives details of cultivable area which includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. Kullu district with 314 inhabited villages has a total area of 60,227.09 hectares according to village papers. Of this, the cultivable area is 57.14 per cent of the total

land area and out of this only 6.06 per cent of cultivable area is irrigated which is very low. The area figures have been collected from the revenue record maintained for each village by the State Government. A look at the land use pattern at the C.D. block level shows that in Nirmand 74.37 per cent of the total area has been brought under cultivation followed by Kullu with 69.42 per cent, Banjar with 67.56 per cent, Anni with 63.42 per cent and lastly Naggar with 33.27 per cent.

As regards availability of irrigational facility, its percentage varies between 19.78 per cent in Nagar C.D. block to 1.57 per cent in Anni C.D. block. Only Naggar C.D. block has comparatively better position with 19.78 per cent of its total cultivable area having the facility of irrigation while in Banjar C.D. block there is no availability of irrigational facility.

Table 42: Schools/ colleges per 10,000 population in towns, 2011

Sl. No.	Name of the town	Type of educational institution (Approx. numbers)				
		Primary	Middle	Secondary / matriculation	Senior secondary	College*
1	2	3	4	5	6	7
1	800100-Manali (M Cl)	11	5	5	2	0
2	800101-Kullu (M Cl)	5	4	4	2	1
3	800102-Bhuntar (NP)	11	2	2	2	0
4	012896-Shamshi (CT)	8	1	0	0	0
5	800103-Banjar (NP)	42	35	35	7	7
District: Kullu (026)		9	4	4	2	0

Note- * College includes

Arts/ Science/ Commerce College (Degree Level and above)

Table 42: It depicts various types of educational institutions for every 10,000 population in each town of the district. In all 5 towns of the district, there are 9 primary schools, 4 middle schools, 4 secondary/matriculation schools, 2 senior secondary schools. A close look at the table would reveal that smaller town like Banjar (NP) is having comparatively better educational facilities than the bigger towns of the district.

Table 43: Number of beds in medical institutions in towns, 2011

Sl. No.	Name of the town	Number of beds in medical institutions per 10,000 population (Approx. numbers)
1	2	3
1	800100-Manali (M Cl)	38
2	800101-Kullu (M Cl)	151
3	800102-Bhuntar (NP)	22
4	012896-Shamshi (CT)	7
5	800103-Banjar (NP)	368
District: Kullu (026)		91

Table 43: It depicts the number of beds per 10,000 population available in the medical institutions of the towns. As a whole, the number of beds in medical institutions per 10,000 population comes to 91. Town wise break-up reveals that Banjar (NP) has 368 beds per 10,000 populations followed by Kullu (M Cl.) with 151 beds, Manali (M Cl) with 38 beds and Bhuntar (NP) with 22 beds. Shamshi (CT) is having only 7 beds.

Table 44: Proportion of slum population in towns, 2011

Sl.No.	Name of the town having slum	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	800103-Banjar (NP)	1,414	820	57.99
	Total	1,414	820	57.99

Table 44: It presents proportion of slum population in towns of the district. There is only one town i.e. Banjar (NP) which has a notified slum in the Urban areas of the district. Banjar (NP) has a total population of 1,414 persons of which 820 (57.99 per cent) population fall in slum area.

Table 45: Most important commodity manufactured in towns, 2011

Sl. No.	Name of the town	Name of three most important commodities manufactured
1	2	3
1	800100-Manali (M CI)	Woollen Caps, Shawls, Wooden Furniture
2	800101-Kullu (M CI)	Kullu Shawl, Kullu Caps, Woollens Garments
3	800102-Bhuntar (NP)	Kullu Shawl, Kullu Caps, Woollen Garment
4	012896-Shamshi (CT)	Fruit Juices, Woollen Garment
5	800103-Banjar (NP)	Wooden Furniture, Woollen Shawl, Grass Shoes

Table 45: It deals with the most important commodities manufactured in the towns. Woollen Caps, Shawls and Wooden Furniture are manufactured in Manali (M CI). Kullu (M CI) and Bhuntar (NP) are manufacturers of Kullu Shawls, Kullu Caps and Woollens Garments. Shamshi (CT) manufactures Fruit Juices and Woollen Garment. Banjar (NP) is manufacturer of Wooden Furniture, Woollen Shawl and Grass Shoes.

(vii) Major Social and Cultural events, Natural and Administrative Developments and Significant activities during the decade.

Social and Cultural Events-Fairs and Festivals:

The beauty of Kullu valley is enhanced by its people who are fond of song, dance and celebrations. Kullu is well known for its Dussehra. Besides Dussehra festival, a number of fairs are held in this district which is mainly religious in nature. Some of the important fairs and festivals held and observed in Kullu district are as under:

Kullu Dussehra: Dussehra is celebrated in most parts of the country on Vijaya Dashmi to commemorate the victory of Rama over demon king Ravana. The highlight of this fair is the victory of good over evil. Kullu Dussehra is, however, different in certain ways from the Dussehra celebrations in the other parts of the country. It presents cultural ethos of the people and their deep rooted religious beliefs which manifest during this festival with traditional songs, dances and colourful dresses. It begins on Vijaya Dashmi and lasts for a week.

The beginning of Dussehra in Kullu dates back to the regime of Raja Jagat Singh who ruled Kullu from 1637 to 1672. There is a legend that Raja Jagat Singh of Kullu who had been informed that a bowl full of pearls was in possession of Durga Dutt, a poor Brahmin of village Tipri. The Raja directed his courtiers to fetch the pearls from the Brahmin. Durga Dutt was greatly harassed by the courtiers. Finding the torture rather unbearable, he told them that the pearls would be delivered to the Raja on his return to the village from Manikaran where he was going. When the Raja arrived in the village, the Brahmin

locked himself along with his family members and set the house fire. Sitting by its side, he cut his flesh with a sharp blade at every leap of the fire and cursed the Raja for his unjust demand by saying “Have the pearls, O’Raja”. The entire family was reduced to ashes.

After a lapse of sometimes, it so happened that the Raja was haunted by the spirit of the innocent Brahmin family, stung by the qualms of the conscience he felt every moment the painful and tearing pinch of the strings and arrows of the deadly sin committed by him. Under guilt conscious and hallucination he used to see crawling worms in place of rice and human blood in place of water in the tumbler. The Raja did whatever he could do but of no avail. The news of his illness spread throughout his kingdom and all possible means of curing his disease were explored by his courtiers, prominent hakims, vairs, doctors and religious person’s saints etc. But nothing could stop Raja’s hallucination. At last a Bairagi named Krishan dutt (Pahari Baba) offered his counsel that no medicine can be effective to cure the Raja except the blessings of lord Rama. In this direction he further suggested that the Raja should take charanamrit of an idol of lord Rama. This idea struck sound in the mind of the Raja and further efforts were made to procure a holy idol of lord Rama from Ayodhya. His efforts succeeded in procuring a genuine idol from Ayodhya. For this work a disciple of Bairagi Krishan dutt named Damodar Dass was selected and was deputed for this purpose. Damodar Dass had attained miraculousspower known as Gutka Sidhi. Through this miraculous power he was able to procure the rare piece of Rama’s idol along with Pujari from Ayodhya which was installed in Raghunathjee’s temple at Sultanpur Kullu by observing all the rituals suggested by the learned priests of that time. It may be interesting to record here that a special class of priests were brought from Ayodhya to conduct the rituals and their descendants still continue to keep-up the tradition.

Raja Jagat Singh faithfully observed and followed the suggestions of Bairagi Krishan Dutt. Soon signs of recovery from the dreaded disease were seen. He was greatly influenced by the divine power of Rama, so much so that he abdicated his throne to the will of Raghunathjee and became ‘Chharibardar’ of Raghunathjee. This incident had a great impact in his state and as a consequence thereof all the Devies and Devtas accepted the overall lordship of Raghunathjee. The Raja sent his order to all the ‘Kardars’ of all Gods and Goddesses of the State to assemble at Kullu on the festive occasion of Vijaya Dashmi to first pay obeisance to Raghunathjee and then participate in the festivities thereafter. Now the internationally famous Dussehra of Kullu is celebrated in the same tradition.

The Gods and Goddesses are tastefully decorated on the palanquins, known locally as Rathes, in the company of a band they come from the interior valleys and villages situated in every nook and corner of Kullu district. Their Rathes are carried by the respective Kardars and they travel all the way on foot, for some of whom it takes 2 to 4 days. First of all they visit the Raghunathjee temple at Sultanpur. The Rathayatra of Raghunathjee from Sultanpur to Dhalpur starts in the afternoon. It is obligatory that Devi Hadimba of Dhungri, a village near Manali where her famous temple exists, first arrives at the Raghunathjee temple. She is considered as the great grandmother of the erstwhile Raja of Kullu and blesses the descendant of the Raja dynasty.

The main attraction of Kullu Dussehra is the Rathayatra of Raghunathjee. The Rath is made of deodar wood having a very huge wooden base, wooden wheels and a temple like structure. This is mostly kept in one corner of Dhalpur ground. The Raghunathjee’s idol is brought from Sultanpur in a palanquin accompanied by the Raja, priests and body guards attired in their traditional dresses. A huge procession comprising of various deities in the accompaniment of their bands starts usually in the afternoon. This annual Yatra of Raghunathjee is very significant and is greeted by the local residents with great reverence and faith. Flowers are showered on the Palki of Raghunathjee. The Ratha at Dhalpur is tastefully decorated by covering it with screens, clothes and Kalsas. Silver Chhatra at the top and Kalsas on the 4 corners of the Ratha add a special charm to the Ratha. The Ratha is profusely bedecked with flowers and garlands. A huge crowd awaits the arrival of the Raghunathjee’s idol at Dhalpur. The Palki of Raghunathjee is escorted to the place specially decorated by the priests. The procession headed by the Raja and his kith and kin stops at some distance. The priests perform certain rituals. Thereafter, the oracle

of Goddess Hadimba appears at the scene. In the state of trance, the oracle expresses the consent of the Goddess for starting the traditional fair without any hurdle or hindrance and also for the well being of the entire people. The Raja goes round the Ratha followed by others. Some of the deities at this occasion also pay their obeisance to Raghunathjee, while all this goes on, the waiting crowd is very anxious to pull the ropes of the Ratha which is driven down to the site of the Mela. It is a wonderful sight to witness that thousands of devotees pulling the Ratha. It is considered a sacred duty by the local people to have grabbed the opportunity of pulling the ropes of Ratha during Rathayatra.

This is now the beginning of the festivities. The participating deities come here in turns. These deities camp at the site of the fair during the entire period and they are allotted specific sites where they pitch their tents and keep the deities for holy Darshana of the devotees who have the faith in the powers of these deities. The Kardars and the musicians stay along with their Devi-devtas. Each of these deities is provided a tent by the local administration. In the vast area of Dhalpur, the Municipal Committee allots plots where shopkeepers erect their tents etc. The entire area is planned in a systematic manner so as to accommodate different types of business centres such as area for cattle trade, zoo, circus, merry-go-rounds, utensil sellers, sweetmeat sellers, local handicraft sellers etc. The Municipal Committee charges rent from the shopkeepers depending on the site, space and type of business. The entire planning is done under the overall supervision of the Deputy Commissioner and various committees are formed to manage the activities of the fair. The main highlights of the fair are cultural show by the school and college boys and girls invited from various institutions not only of the state but from other states of the country. Of late, the cultural activities have been extended to the international sphere and folk parties from other countries are also invited to participate. This festival continues for 7 days and the people not only from the district but from the far off places come and visit the festivities. Foreigners also take part in this fair and a lot of photographers cover the area. Every day the deities visit the Pandal of Raghunathjee. Local inhabitants also visit the presiding deity. The erstwhile Kullu Raja holds a Darbar where prominent persons from the entire district take part. All the activities are carried in a decent and orderly fashion.

During the festival some of the deities meet each other and enquire about their welfare through their oracles and the Kardars. The local craftsmen such as potters, basket and mat makers, iron-smiths, shoe-makers and weavers sell their articles. On the Pratipada day, just after Purnima, the festival concludes by sacrificing a buffalo, a ram, kekra, fish and cock on the right bank of river Beas.

The sacrificial spectacle is a great attraction for the visitors. The Raja, along with his security men, kith and kin leads the procession to the river bank and offers a darat (big sickle) to a person who sacrifices the buffalo just with one stroke and with this the fair concludes.

Sainj Fair: This fair is held in Raila on 21st of Baisakh (April-May) for one day. The significance and legend of the fair is religious and recreational. Idol of Devta Laxminarayan is brought from Raila to Sainj. Thereafter the fair starts with folk dances and songs rhythmical with the beat of drums and trumpets.

Shamshi Virshu: This fair is held on 1st Baisakh (April 13) for one day in village Khokhan. The fair is religious and seasonal. The legend connected with the fair is that Kamindi Devi daughter of Surya, the Sun God moved by the alluring beauties of the hill springs used to dance at this place with her girl friends who were daughters of Rishis and Munis. The local inhabitants also regard themselves as the progeny of the daughters of those Rishis and Munis. The goddess is worshipped outside and then it is taken inside the temple. The people offer young yellow sheets of barley which are specially sown for the occasion to be offered to the Devi along with garlands. Then a he goat is sacrificed. Thereafter the women sing and dance around the Ratha carrying the Devi. The Devi is also danced about. Men-fold stays on a spectators and onlookers.

Mela Bhuntar: The fair is held on 1st Ashad (June-July) for 3 days in village Bhuntar. The fair is seasonal and religious. The fair was started by the Devta of the ilaqua Suraj Pal. Palaghamiar a Devta from Mardo also attend the fair. From this day the use of food grains from the newly harvested crops

starts after cooked food offerings are made to the gods and then the meal is shared by other relatives and friends. This is known as Tahoolikhana in the local terminology.

Luhri Lavi: This fair is held on Kartik 21st and 22nd (October-November) for two days and one night in village Dingidhar at Luhri. The significance of the fair is religious and commercial. The fair is held in honour of Devta Jogeshwar and Khegro Maya. The Devtas are worshipped. Nati dances, Mimickery and other cultural performances at night are resorted to.

Ani Fair: This fair is held on the 27th Vaisakh (April-May) for two days in village Franali at Ani. In the fair deities of the adjoining villages participate. The main attractions of the fair are folk dances and other cultural programmes.

Dalash Fair: This fair is held in the month of Bhadon for three days and nights in village Soidhar at Dalash. The fair is altogether religious and is held in honour of Devta Jogeshwar Mahadev of Dalash and Bungli Nag. The devtas are worshipped and natti dances, cultural programmes and sports tournaments are performed.

Ganter Fair: This fair is held on 'Paus' 3rd (Dec.-Jan.) for one day. The fair is mainly religious and it is said that Ranas and Thakurs the rulers of Kullu valley were at logger head and used to be constantly at war with one another. To commemorate the battle, a ram used to be sacrificed. The practice of ram sacrifice is still in vogue.

Ghatasani Fair: This fair is held on Chait 4th (March-April) for two days in village Dawra. The legend connected with the fair is that once mother Parvati told Lord Shiva that even Rama could change. To prove this she went to Rama in the guise of Sita to deceive him. When Lord Rama saw her he could see through the game and addressed Parvati as mother and enquired as to why she has left his guru i.e. Lord Shiva. The fair starts with the worship of Vishnu Bhagwan and the village Devi. Natti dances, folk songs and other cultural programmes are the main attractions of the fair.

Dhoongri Fair : This fair is held on Jaisth 2nd (May-June) for three days in the memory of Devi Hadimba who meditated at Dhoongri and was married to Bhima one of the five Pandvas. She had a son from him who was named Ghatotkach. He fought in the battle of Mahabhart. The fair starts with the worship of Goddess Hadimba.

Bhadoli Fair: This fair is held once in three years, dates of which are decided by the Brahmins. The fair is held for four days. The fair is commemorated in the memory of Lord Parshu Ram who is stated to have meditated here.

On the first day of the fair, reception of Devies and Devtas and their attendants takes place. On the second day Devies and Devtas are appeased through songs and dances. On the third day they are carried in a procession around the village. On the fourth day, the fair comes to an end after serving community feast.

Budhi Diwali: This fair is held on Maghar Amawas for three days in village Nermand. The fair is associated with the battle of Mahabhart which is said to have started on that day. The fair is also held to commemorate the killings of two demons Dano and Asur who resided at village Nermand in the form of snakes. The fair starts with a brief recital of Mahabhart and puja of Raja Bali in folk songs. Two ropes of munj grass signifying the snake demons are cut into pieces by the Kashtriyas.

Natural, administrative developments and significant activities during the decade:

During decade of 2001-2011 some important developmental projects have been launched besides some other events as detailed below:

- (1) A new Census town Shamshi (CT) has been created during Census 2011.
- (2) Construction of new Hydro Power Project.

(a) Parvati Hydro Electric Project (2,051MW)

The foundation stone of the power project on river Parvati has been laid in November, 1999 by Hon'ble Prime Minister Shri Atal Bihari Vajpai. This project is being constructed in joint venture of the State Government and National Hydro Electric Power Corporation in three stages: stage I-750 MW, stage II-800MW, and stage III-501MW. The execution of stage II and stage III construction is under progress.

(b) The construction of Lurgi Hydel Power Project with generating capacity of 126 MW had been undertaken in state sector at estimated cost of Rs.796.98 Crore. The project has been commissioned in 2003-2004.

(c) Malana-II hydro Electric Project (HEP) has been contemplated a power generation development on Malana a tributary of Beas in Kullu district. The Project has been allotted to M/s Everest Power Pvt. Ltd. New Delhi. The estimated cost of the Project is Rs. 633.47 Crore. The annual generation of this Project will be 428 MU. The MOU & IA signed with the company on 27-05-2002 & 14-01-2003 respectively. The Project will slate for commissioning in 2011-12.

(d) Sainj hydro Electric Power Project (HEP) (100MW): Sainj (HEP) has been contemplated as a run of river development on river Sainj, a tributary of River Beas in the district. The Project comprises of a diversion barrage on the river Sainj near village Niharni and underground power house on right bank of river Sainj near village Suind to generate 322.23 MU. The likely date of commissioning the Project is April 2014.

3) Opening of new schools and dispensaries: Many new schools and dispensaries were added during 1991-2001 in this district. According to information provided by the District Statistical Officer, there were 669 primary schools, 86 middle schools, 51 secondary & senior secondary schools and 4 degree college in the district during 2000-2001. The number of these institutions rose to 743 primary, 128 middle, 104 secondary and senior secondary schools and 4 colleges during 2009-10. Similarly, there were 7 hospitals/community health centers, 12 primary health centres and 101 sub-health centers by 31-3-2001 and their number rose to 14 hospitals/community health centers, 17 primary health centers by 2009-2010 to provide healthcare to the people of district. The significant improvement has taken place in the field of education and healthcare in district during the decade of 2001-2011.

4) Construction of new metalled roads: During 1999-2000 the length of metalled roads was 419 kms. This has rapidly increased to 822 kms. in 2009-10 showing significant improvements in the conditions of road in the district. The length of unmetalled roads which was 494 kms. during 1999-2000 has increased to 761 kms. in 2009-10.

(viii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district:

Places of historical, religious, archaeological and tourist interest:

Kullu district offers many attractions to the tourists. It has rich art and cultural heritage, lush green deep meadows, dazzling rivers, white capped snowy peaks and high mountains. The district has incomparable Beas and its sub-valleys which are full of natural charm and grandeur. Though Kullu does not have the rich historical, archaeological or epigraphical antiquities like Chamba but still has some ancient remains of antiquities like Nermand in outer-Seraj and Hat at Bajaura. Not only the district is famous for its scenic beauty but also as a paradise for the trekkers and mountaineers. It is worthwhile to discuss some of the important places here.

Kullu: Kullu, the headquarters of the district, is situated at an altitude of 1,200 metres on the confluence of Sarvari rivulet and Beas river. Though, it is somewhat warm during June and early July, but for the rest of the year provides a delightful and healthy climate. The annual rainfall is about 40", of which a little less than a half occurs during the winter months from October to March. There is not much snowfall

during the winters but snow clad peaks look very beautiful. Kullu town has made its name on the international tourist map for its famous Dussehra festival. Town is a seat of the chief deity of the valley i.e. Raghunathjee. During Dussehra the visiting deities from all over the district first pay their obeisance by visiting abode of Raghunathjee at Sultanpur. The town of Kullu can accommodate large number of visitors with all facilities of boarding and lodging required by them.

Bijli Mahadev: This temple is situated at a distance of 11 kms. from Kullu, standing majestically atop a hillock (2,435 Mtrs.) where a 20 mtrs. tall staff (dwaj) is supposed to attract special blessings from the sky in the shape of lightening and it is said that with the flash of lightening Shivlinga shattered into pieces. These pieces are put together by the Priest with butter and sattu and covered with kilt. Then the Shivlinga comes to its original shape. It offers a charming view of Kullu and Parvati Valley. One can pay a visit to this temple and return to Kullu in one day. Now a jeepable road paves through the forest with magnificent views and links to Bijli Mahadev temple.

Bajaura: A place of special interest between Aut and Kullu is Bajaura. It is famous for its temple Bisheshar Mahadev, 15 kms. away from Kullu on the Kullu-Mandi main road. The temple is famous for its stone carvings and sculptural decorations. This temple is believed to have been built in mid 8th century.

Nagar : Nagar, on the left bank of Beas river and about 300 metres above the river, is delightfully situated on a wooded slope and commands extensive views, especially of the north and west of the valley. It is 27 kms. from Kullu and 5 kms. from Patli Kuhl. There is a bridge across Beas river connecting Patli Kuhl and Nagar.

Nagar succeeded Jagatsukh the older name of which was Nast as the capital of Kullu. It was founded by Visudh Pal and continued as the headquarters of the state until the capital was transferred to Kullu (Sultanpur) by Raja Jagat Singh. A massive castle belonging to the Rajas of Kullu still exists here. The castle now converted into a tourist lodge is built on a steep eminence overlooking the valley and dominates the village and surroundings countryside. It is supposed to have been built during the reign of Raja Sidh Singh with stones brought from Baragarh fort on the opposite of the valley.

At the foot of the small bazar, below the castle is the Gauri shankar temple of Lord Shiva-a charming example of the architecture and carving. It is presumed that the temple which is a protected monument is eight hundred years old. A little higher is the Vishnu temple of Chatturbhuj. Higher still in the upper part of the village, is Pagoda shaped-temple of 'Tripura Sundri Devi'. Highest of all on a small ridge above Nagar, is the Krishna temple of Murli Dhar. This temple is perhaps the oldest of its type in this part of Kullu.

Above the castle, a road leads to Hall less than one kilometre on the ridge overlooking the Chhaki nalla. The beautiful house which gives its name to the estate was built by Late Colonel Rennick, but is now in the possession of the Roerich family. The late Professor Nicholar Roerich (died in December, 1947) was an illustrious artist of international repute had selected Nagar as his residence when he came to India in 1929 along with the other members of his family. One of his sons Sovetoslav Roerich was also a renowned painter.

Manali: Situated near the end of valley, Manali is one of the most attractive tourist spot not only of Himachal Pradesh but of International fame also. Manali is synonymous with streams and birdsong, forests and orchards and grandeur of snow-capped mountains.

Manali is the real starting point of an ancient trade route which crosses the Rohtang and Baralacha passes, and runs via Lahul and Ladakh to Kashmir while divergent road connects it with Spiti. Now the motor link has been provided upto Leh in Jammu & Kashmir, Pangi valley in Chamba district and Kaza of Lahul & Spiti district. There are regular bus services to these places from Manali during summer season. It is situated at a distance of 45 kms. from Kullu.

There is an interesting legend about Manali which goes to say that Manu, the author of 'Manu Samhita', after the great deluge first stepped on the earth from the celestial boat at a place in this land. The particular spot where he established his abode was the present Manali which is regarded as the changed name of 'Manu-Alaya', the abode of Manu. It was from here that the human race came into being after the deluge. The temple dedicated to Manu still exists in the Manali village.

Hadimba : In addition to its scenic beauty and grandeur, which is far excellence, Manali has many attractions but the chief attraction of interest, historically and archaeologically, is undoubtedly the Dhungri temple dedicated to Goddess Hadimba (or Hirma Devi), the wife of Bhima of Mahabharata fame, which is situated within a walkable distance from the Manali town. According to an inscription on the doorway at the east side of the temple it was founded in S.29 (corresponding to 1553 AD) by Raja Bahadur Singh, son of Raja Sidh Singh.

Hadimba temple at Dhungri has a pagoda shaped roof of thick deodar shingles. The square roofs are in tiers of diminishing size above which is a kind of circular wooden cave, which is again surrounded by a brass ball and trident. Verandahs occupy three side of the temple. The doorway faces the east and is extremely decorated by carved wood work depicting elephants, tigers, birds etc. Hadimba is held in great veneration throughout and even beyond Kullu valley. She is still being worshipped by the local people by offering occasional sacrifice of animals, chiefly as a propitiatory measure for the amelioration of ailments and natural calamities.

Rohtang Pass: Numerous mountain passes lead in and out of Kullu, but one of the most popular with trekking parties is the Rohtang, about 3,978 metres above mean sea level. It is the most convenient route from Manali and throughout the whole distance provides a charming variety of scenery. The length of the pass is about one km. and has served as the route for many centuries in Central Asia. The road from Manali to Keylong passes over this pass which is 51 kms. long and the crest of the Rohtang Pass presents a wide spread panorama of mountain scenery.

The Beas river rises near the crest of Rohtang springing into existence from block of mica-schist. To the left of the pass five or six hundred feet higher is the little lake of 'Sar Kund' (also called Dashair). On 20th Bhadon (about the 4th September) each year, this small glacier lake is visited by number of people from Kullu and other adjoining districts with a belief that a bath in the cold water at day break on this particular day will cure all bodily ailments.

In early summer and late autumn after about 11.00 A.M. or mid-day, the crest of the pass is occasionally subject to sever blizzards and snow storms, accompanied by a deadly cold breeze. Daily Bus service is available at Manali for a trip to Rohtang Pass. The reservations for this trip can be done with the assistance of Tourism Development Officer at Manali.

Malana: Nestled between Jari and Khiksa that lies the village Malana. Here one can still see the oldest democracy of the world where all inhabitants of the village participate in village administration. They have their own pattern of parliament i.e. Upper House (Jaostang) and Lower House (Kanishtang or Core). Jaostang has its own Executive and it works like Judiciary. If no solution comes out in the both houses, then the case is put forward to Jamal Rishi (Devta) and then Devta decides the case through its 'Gur' and its decision is final and binding to all inhabitants of this village.

The inhabitants of Malana speak a peculiar language of their own, called Kanashi, which is entirely different from the Pahari of Kullu and is a mixture of aboriginal Mundari and Tibetan.

Jagatsukh: Jagatsukh, the original name of which was 'Nast' was the ancient capital of Kullu state. Here the earliest Rajas ruled for twelve generations till, in the reign of Visudh Pal, and then the capital was transferred to Nagar. It lies on the left bank of the Beas and the road from Nagar to Manali runs through the village. It is about twelve kilometres from Nagar and six kilometres from Manali. Before reaching Jagatsukh a place Shooru, near the entrance to Hamta Nalla, is passed at which is located the ancient and historical temple of Devi Sharvali. In Jagatsukh some ancient temples are still in existence. The most

important being the Shiva temple in the Shikhra style. It has a very chaste sculptured decoration. The temple of Gayatri Devi is also located near this temple.

Vashist: A little village located on the left bank of the Beas, but well above the river and about 3 kilometres beyond Manali and is renowned for its hot sulphur springs named as Bashisht or Vashist. There is a regular walled bathing pool with stone floors. Turkish styled shower fitted bath rooms; separate for ladies and gents have been built closely where the hot and cold water is separately piped, maintaining the regular temperature for bathing at nominal charges. There is a cafeteria. Flanking the pool there is a stone and a wooden temple dedicated to Vashishta Muni from whom the village gets its name. The hot sulphur springs at Vashist are famous for their great healing powers.

Arjun Guffa: A cave, which is about five kilometres from Manali and known as Arjun Gufa, is situated a little up from the left bank road near the village Prini. According to a legend, Arjuna under the advice of Vyasa rishi practiced austerities in a cave in order to get the powerful 'Pashupata astra' from Indra.

Nehru Kund: A spring of clear cold water named after the late Prime Minister, Pt. Jawahar Lal Nehru, is about 6 kms. from Manali on Manali-Keylong road.

Solang Valley: It is a splendid valley between Manali and Kothi and offers the views of glaciers and snow capped mountains and peaks. The nearest glacier from Manali is in this valley. It is about thirteen kilometres from Manali and one can go there either by jeep or by bus upto Palchan village from where a jeepable road branches off to the left. Good skiing slopes are also available here which are famous for summer skiing.

Manikaran: Nestling among sylvan surroundings in Parvati valley, Manikaran is famous for its hot springs. Manikaran at an altitude of 1,829 metres and 40 kms. from Kullu has the finest hot water springs. Probably the most important and most useful is the one on the river bank at the entrance to the village which is always in great activity and is said to rise and fall with the increase and decline of river water. Rocks surrounding the spring are uncomfortably hot, while the temperature of the water is above boiling point. Rice can be cooked if placed in a muslin bag or tied up in cloth and thrown into the hot water pool. The water of the springs is said to be radioactive. It is supposed to be beneficial to sufferers from rheumatism and similar ailments. Besides Raghunathjee and Shiva temples, Manikaran is a favourite resort of pilgrims. According to an ancient legend, Manikaran is also connected with Lord Shiva and his divine consort Parvati.

Mountaineering and Allied Sports: Kullu terrain is almost mountainous. To popularize the mountaineering and allied sports the Mountaineering Institute second of its kind in the country was established at Chadhiari near the hot springs of Vashist village in September, 1961. The first training course conducted by the Institute was held in November-December, 1961 and the Institute was known as Western Himalayan Mountaineering Institute (WHMI). With the coming of its own complex in the year 1976, the Institute was shifted to present location (Aleo Bihal Manali) and since then it is known as the Department of Mountaineering and Allied Sports.

Training in snow skiing was started in early 1970 at Solang Nala Ski-slopes. High Altitude Trekking was also started in 1970 and thereafter, in order to conduct adventure and rock-climbing, specific courses were introduced. The Institute also imparts mountaineering and rescue training to the people living in tribal areas. For this purpose two mountaineering sub-centres were established at Jispa in Lahul & Spiti district and Brahmaur in Chamba district in the year 1979. In order to help people to cross over Rohtang Pass to Lahul & Spiti or Manali during winter months, the Directorate sets-up rescue posts at Marhi and Koksar from 15th November to 31st December and 1st March to 15th May.

(ix) Major Characteristics of the District, contribution of the district in the form of any historical figure associated with the district:

Major Characteristics of the District:

The People: The main population consists of Hindu followed by Buddhist and fraction of Sikh and Christian religions. The predominant class consists of Rajputs, Brahmins and then Scheduled Castes. Though no record of above mentioned castes settlement is available, however, brief evidences are available in the Epic of Mahabharata about the existence of Kulindas, Khashas and Vedic Aryans. There is also a mention of non-Aryans as is evident from the battle by Bhimsen of Mahabharata with the demon king of Tandi. The culture and the language have also been influenced by the trade routes which show that the people have links with Tibet and Yarkand of Russia.

The Chinese pilgrim Hieun Tsiang also visited Kullu and described it as a beautiful place and existence of Devta Temples belonging to different sects in each village.

The district is known as Dev Bhumi in local dialect as each village has its own local deity known as deo-devta or devi. These deo or devi play a vital role in the lives of people. People still have remarkable faith in worshipping their deities. Each devta or devi has its own fair which are celebrated regularly. These Gods and Goddesses are held in great esteem as birth, marriages, ailments and disputes are settled by these deities through their oracles. The economic life of the people has changed through the spread of education and most of the people shifted from agriculture to horticulture. Other developmental activities have also made impact on the life standard of the people.

Dress: There is no distinction to the castes hierarchy in the matter of dress of the people. Men's dress comprises a woollen cap with a coloured band which is known as 'Kulvi' cap. Headgear of women is a square cloth coloured in design which is known as 'Dhattu' in the local terminology. Men put on a loose coat and a woollen pyjama. However, the women have typical attire known as 'Pattu' which is put on by them in the fashion of a 'Saree'. The spread of education and contact with the people of other districts and states has brought about a noticeable change in their way of life especially among the new generation. Since most of area is mountainous nature controls the habits of the people in the matter of their dress. During summer, men wear loose woollen trousers, jacket and coat. In winter in addition to these a blanket is also wrapped round the body. The waist is bound by a muffler type small 'Pattu'. Women cover their waist by a 'Pattu' with multi-coloured designs woven artistically on the borders. In winter woollen trousers are used, however in summer months salwar-kameez and Churidar Pyjama known as 'Suthan' are used. Besides 'Dhattu' for the headgear Kulvi cap and 'Thipi' is also used. Gradually the Pyjamas are being replaced by pants and in the case of women the headgear is being replaced by 'Dupatta'. Among the women and belles, different types of gold and silver ornaments are commonly used.

Housing and Equipment: In the rural areas of the district the houses are generally built of stones perched with layers of wooden beams which make a building somewhat quake resistant. The walls are plastered with clay and the roofs are covered with slates supported by timber. The houses are generally two storeyed but in the high hills where the conditions of living are influenced by the vagaries of weather multistoreyed houses are also common. The ground floor is used for tending the cattle, sheep and goats. The first and subsequent floors are used for living purposes. The doors and windows are generally small and there is no adequate arrangement for cross ventilation. In the towns, however, housing pattern is quite different as compared to the rural areas where the houses are made of dressed stones, bricks, concrete and G.I. sheets on the roofs are generally used. With the construction of the roads, spread of education and a large number of persons in service, the living condition of the people has undergone a remarkable change. Now modern houses with separate cattle sheds, kitchens and bath-rooms are being built.

In the old days there used to be no household furniture worth the name in the houses. However, locally prepared mats of dried paddy stalks, skins of banana trees and long leaves on which druggets made of goat hair, called Shela, were commonly used in each household. However, with the change of time now cots, chairs, tables and other wooden furniture are commonly being used by the people. The

service class people and economically better, agriculturists have started a modicum of furniture like sofa sets, steel almirahs, radio sets, televisions etc. Utensils generally used are of brass, bronze and aluminium. However, now-a-days use of stainless steel utensils has also become quite common. All total villages of the district have the facility of electricity and the use of table lamps, electric iron, heaters for cooking and heating purposes have become common in the district.

Food Habits: The staple food of the people is rice, wheat, maize and barley and minor millets. But with the spread of education and improvement in economic condition barley consumption is being abandoned and wheat, maize and rice are common cereals on the daily menu. In upper areas Koda, Kagni, Bathu, Opla and Fafra are also grown and consumed by the people. Suitings to the climatic conditions people prefer non-vegetarian diet. Sheep and goat meat is relished with joy. In the high hills, flesh of the slaughtered goats is dried up and it is cooked as and when they desire. Fish is also consumed a lot, if available. In the recent past Tibetan entrepreneurs have introduced Tibetan food/dishes and response of the younger generation to this food is encouraging.

Tea is now common throughout rural and urban areas. The food intake is spread over four times such as:

- i) Breakfast: Nuhari with a maize roti or Chapatti.
- ii) Lunch-Kalar: Rice, chapatti, maize roti with pulses or curry.
- iii) Post Lunch: Light food 'Bhattoru' made from fermented wheat flour Dupehari with pickles or chutni.
- iv) Dinner-Biali: Maize, rice or wheat chapattis with pulses, curry or vegetables, whatever is easily available depending on the season.

On the festive and special occasions, sweet rice, kheer and vegetables are cooked with extra care. 'Siddus' (stuffed with salted nuts and poppy seeds) a speciality of this region are steam cooked or boiled.

Language: The language spoken by the people of Kullu is known as Kulvi or Kulubi which is one of the several languages come under western Pahari. According to the classification of languages, made by the Linguistic Survey of India, Kullu Group of languages come under Indo-European Family languages. It has further been classified as a language belonging to Aryan-Sub-Family, Indo Aryan Branch, Inner Sub-Branch, and western Pahari under Pahari Group of languages (Census of India 1961, Vol.I, India, Part-II-C (ii), Language Table, P. CLXX). Kulvi or Kulubi language is also being spoken by Kothi Khor and swar or Palampur tahsil of Kangra district. While on the eastern side this language comes in contact with Kirati-Mundorain dialect of Malana, which has close link with Bhoti dialect.

Contribution of the district in the form of any historical figure: Kullu is famous for its historical Kullu Dussehra and places of tourist interest of international fame. It has a number of enjoyable sites suitable for skiing and mountaineering. For the cultivation of apple, Kullu ranks first in India. The district is also famous for its beautiful traditional Handicrafts in weaving. Multicoloured caps and shawls of Kullu are famous in the country.

The district is known as Dev Bhumi in local dialect as each village has its own local deity known as Deo, Devta or Devi. The famous Malana village has oldest democracy of the world where all the inhabitants of the village participate in the village administration. They have their own pattern of parliament i.e. Upper House (Jaostang) and lower house (Kamshtang or core). Jaostang has its own Executive and it works like Judiciary. If no solution comes out in both houses, then the case is put forward to Jamalul Rishi (Devta) and then Devta decides the case through its 'Gur' and its decision is final and binding to all inhabitants of this village. Religious place Manikaran is famous of hot water springs and Gurudwara.

(x) Scope of Village Directory and Town Directory-column heading wise explanation and coverage of data:

Village Directory:

The Village Directory is one of the traditional compilations of the census and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. It is being compiled for both inhabited and un-inhabited villages. Facilities whether provided by the government or private institutions are presented in the village directory. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 121 columns. The Appendices to village directory and Inset Tables based on village directory data are also prepared and presented for inhabited villages.

Every village whether inhabited or un-inhabited has been assigned a location code number. During 2001 census permanent location code number (PLCN) were assigned to each village. Under the system of PLCN eight digits number starting from the first village of the first tahsil of the first district of the state ending at the last village of the last tahsil of the last district were assigned to each village. But in Census 2011 PLCN has been replaced by Meta Data and Data Standard (MDDS) system. Under MDDS the location code number, name and area of the village is being given universally in village directory and village PCA. Now the villages of the state of Himachal Pradesh will be starting with R.F. Luj the first village of the first tahsil of the first district of the state which has assigned 006673 six digits number MDDS code and ending with Dhar Chaling Gaarh the last village of last tahsil of the last district of the state with 027373 MDDS code number.

In addition to name of village, location code number, area, total population and number of households the information regarding availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the village directory and in case where the amenities are not available in the village, the distance range code viz; 'a' for <5 kms, 'b' for 5-10 kms and 'c' for 10+ kms of the nearest place where the facility is available has also been provided.

Town Directory:

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. Statement-I contain the information for Status and Growth of the town, Statement –II presents the Physical Aspects and Location, Statement –III gives the information for Civic and other Amenities, Statement-IV Medical Facility, Statement-V narrates Educational, Recreational and Cultural Facilities, Statement-VI depicts the information for Industry and Banking whereas Statement –VII shows Civic and other Amenities in Slums for 2009. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order. The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

VILLAGE AND TOWN DIRECTORY

Brief Note on Village and Town Directory

Village Directory Census 2011:

The Village Directory is being compiled for both inhabited and un-inhabited villages. In the village directory both private and government facilities/institutions have been given. In case of un-inhabited/depopulated villages, the location code number, name and area of the village is being given universally in Village Directory and Village PCA. The columns relating to the amenities and land use pattern, etc. being left blank and it will be noted against the name of the village that it is un-inhabited/depopulated. The Appendices to Village Directory and Inset Tables based on village Directory data are also prepared for inhabited villages.

In the Village Directory format for Census 2011 there are 121 columns and the details thereon are as follows:

Column 1: Serial Number: Self-explanatory. All the villages within the CD block are presented serially in the ascending order of their location code number.

Column 2: Name of village: Self-explanatory. The name of the villages is shown against this column. This also includes the forest and uninhabited villages.

Column 3: Location Code Number of village: The location code number of the villages is shown against this column.

Column 4: Area of the Village: The area of the villages has been given in hectares.

Column 5: Total Population: The total population of the village as per Census 2011 has been given against this column.

Column 6: Number of Household: The number of households as per Census 2011 has been given in this column.

Amenities: The availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the Village Directory. Wherever the amenities are not available in the village, the distance range code viz; 'a' for <5 Kms, 'b' for 5-10 Kms and 'c' for 10+ Kms of the nearest where facility is available is given. Column wise details are given below:

Columns No. 7-20 Educational Facilities: All the different educational facilities available in the village have been given under these columns. Nursery/LKG/UKG classes are included in Pre-Primary Schools, Classes up to class V included in Primary School; Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary School. Classes from XI and XII are included in Senior Secondary School. In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively. The information on the entire educational institutes is given under these columns.

Columns No. 21 to 38-Medical Facilities: All the different medical facilities available in the village have been given under these columns.

Columns No. 39 to 46 -Drinking Water: The information on availability of various types of the drinking water facility within the village has been given under these columns.

Columns No. 47 to 50-Availability of Toilet and others: The information on availability of toilet and Bio-Gas etc. available in the village has been given under these columns.

Columns No. 51 to 67 Communication (Post & Telegraph and transport): The information on communication and Post Office, Sub-Post Office, & Telegraph Office, Village PIN Code number, Phone-Landlines, Mobile Phone, Private Courier Facility, Internet Café, etc; available in the village has been given under these columns. The information on all various transport facilities whether public/private transport like Bus, Railway Station, or Navigable waterways, Taxi , Van, Tractors etc. available in the village has also been given under these columns.

Columns No. 68 to 79-Village connected to High ways, Village Roads, Banks and Credit Societies: The information on all roads connected to village has been given under these columns. These include National Highway, State Highway, District Roads and other district roads connected to the village, Pucca roads, Kutchcha Roads, Water Bounded Macadam Roads, Navigable Water Ways and Foot Paths has been given under these columns. Further, the information on availability of banks, ATM and Agricultural Credit societies in the village has been given under these columns.

Columns No. 80 to 96 Miscellaneous Facilities: The information on various miscellaneous facilities available in the village has been given under these columns. These includes Self -Help Group, Public Distribution Shop (PDS), Mandi /Regular Market, Weekly Haat, Agricultural Marketing Society, Nutrition Centre(ICDS),Anganwadi Centre, ASHA, Community Centre, Sports Fields, Sports Club/Recreation Centre, Cinema/Video Halls, Public Library, Public Reading Room, News Paper Supply, Assembly Polling Station, Birth and Death Registration Office.

Columns No. 97 to 100-Electricity: Availability of Power Supply in the village, whatever may be the form of its use has been given in these columns. These include Electricity for Domestic Use, Electricity for Agriculture Use Electricity for Commercial Use, and Electricity for all purpose Domestic Uses.

Columns No. 101 and 102-Nearest Town: The name of the nearest town along with the distance range code has been in these columns.

Land use and Irrigation: The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the following 9 categories.

(i)-Column No. 103-Forests: This includes all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the forest area.

(ii)-Column No. 104-Area under non-agricultural use: This includes all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agriculture.

(iii)-Column No. 105-Barren and un-culturable land: This includes all barren and unculturable land like mountains, deserts, etc. Land which cannot be brought under cultivation except at an exorbitant cost should be classed as unculturable whether such land is in isolated blocks or within cultivated holdings.

(iv)-Column No. 106-Permanent Pastures and other Grazing Lands: This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

(v)-Column No. 107-Land under Miscellaneous Tree Crops, etc.: This includes all cultivable land which is not included in 'Net area sown' but is put to some agricultural uses. Lands under Causing trees,

thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under 'Orchards' are classed under this category.

(vi)-Column No. 108-Culturable Waste Land: This includes lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category at the end of the five years.

(vii)-Column No. 109- Fallow Lands other than Current Fallows: This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

(viii)-Column No. 110-Current Fallows: This represents cropped area, which is kept fallow during the current year. For example, if any seeding area is not cropped against the same year it may be treated as current fallow.

(ix)-Column No. 111-Net Area Sown: This represents the total area sown with crops and orchards. Area sown more than once; in the same year is counted only once.

Column No. 112-Total Irrigated Land Area: It includes all land which is cultivable and irrigated by any source of irrigation. The total irrigated area of the village has been given under this column.

Column No. 113-Total Un-Irrigated land Area: Un-Irrigated area includes all land which is cultivable but not irrigated by any source of irrigation. The total un-irrigated land area of the village has been given under this column.

Column No. 114 to 118 Area Irrigated by source: The area irrigated by various source of irrigation in the village have been given under these columns. The different source of irrigation facilities available in the village are as follows:

(i)-Canals(C)-Govt. or Pvt., (ii)-Wells/Tube-wells (W/TW), (iii)-Tanks/Lake(T/L), (iv)-Waterfall,(WF) and (v)-Others(O).

Columns No.119 to 121-Three most important commodities manufactured: The names of three most important commodities manufactured in the village are indicated in this column.

C.D.Block level totals of the Village Directory:

At the end of entries for the Village Directory of each C.D. Block, the totals of different columns are being given wherever possible. However, in case of some of the columns, it may not be possible to work out the CD Block level totals, in such cases the particular of relevant columns are being left blank against C.D. Block level.

Appendices to Village Directory: The Village Directory also includes the following appendices:

Appendix-I: Summary showing total number of villages having Educational, Medical and other amenities in villages-C.D.Block level.

Appendix I A: Villages by number of Primary Schools.

Appendix I B: Villages by Primary, Middle and Secondary Schools.

Appendix I C: Villages with different sources of drinking water facilities available.

Appendix II: Villages with 5,000 and above population which do not have one or more amenities available.

Appendix -III: Land utilization data in respect of Census towns.

Appendix -IV: C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix -V: Summary showing number of Villages not having Scheduled Castes population.

Appendix -VI: Summary showing number of Villages not having Scheduled Tribes population.

Appendix -VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII: Number of villages under each Gram Panchayat (C.D.block wise).

.....

Note explaining the abbreviations used in Town Directory Census 2011:

Statement I: - Status and Growth History:

Column 1-Serial Number: Self explanatory

Column 2:- Class, Name and civic status of town: The Class is presented according to population of the towns in Census 2011 as follows:

Population	Class	Population	Class
100,000 and above	I	10,000 – 19,999	IV
50,000 – 99,999	II	5,000 – 9,999	V
20,000 – 49,999	III	Below - 5,000	VI

The following abbreviations are used to denote the Civic Status of the town.

Civic Status	Codes	Civic Status	Codes
i-Municipal Corporation	M.Corp.	xii – Notified Town Area	NTA
ii-Municipal Committee	MC	xiii – Industrial Notified Area	INA
iii-Municipal Council	M CI	xiv – Industrial Township	ITS
iv-City Municipal Council	CMC	xv – Township	TS
v-Town Municipal Council	TMC	xvi – Town Panchayat	TP
vi- Municipal Board	MB	xvii – Nagar Panchayat	NP
Vii –Municipality	M	xviii – Town Committee/ Town Area Committee	TC
viii- Cantonment Board/Cantonment	CB	xix – Small Town Committee	ST
ix- Notified Area	NA	xx – Estate Office	EO
x –Notified Town	NT	xxi –Gram Panchayat	GP
xi - Notified Area Committee/Notified Area Council	NAC	xxii – Census Town	CT

Columns 3 - 25: - These columns are self-explanatory

Statement II: - Physical Aspects and Location of town, 2009.

Columns 1 - 2 Serial number and Name of town: Self explanatory

Columns 3 to 5 - Physical Aspects: In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Columns 6 to 12: Name and road distance of the town (in kms.) from the State headquarters, District headquarters, Sub-divisional/Taluk/Tahsil/ Police station/Development Block/Island HQ., Nearest city with population of one lakh and more, Nearest city with population of five lakh and more, Railway station and Bus route is recorded in these columns respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Statement III - Civic and other Amenities, 2009:

Columns 1 - 2 Serial number and Name of town: -Self explanatory

Column 3 - Road length (in km.): The information about the road length (in km.) within the limit of the town is recorded in this column.

Columns 4 to 7- System of drainage: The system of drainage available in the town is indicated in these columns by the following codes:

System of drainage	Codes
Open drains	OD
Closed drains	CD
Both drains	BD

Columns 8 to 11-Number of latrines: The number of various types of latrines available in the town is indicated in these columns.

Columns No. 12 & 13 - Protected water supply: The information on source of water supply and system of water storage with capacity available in the town are given in these columns in the following codes:

Column 12 (Source of water supply):-

Tap water	T
Tube-well water	TW
Tank Water	TK
Well water	W
Column 13 (System of water storage):-	
Over Head Tank	OHT
Service Reservoir	SR
River Infiltration Gallery	RIG
Bore Well Pumping System	BWP
Pressure Tank	PT

The information on 2 major source of water supply is given in column 12 and the system of water storage with capacity against each in kilo-litres (in bracket) is presented in column 13.

Column 14 Fire Fighting Service: In case the fire fighting service is available in the referent town, 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Columns 15 to 19-Electrification (Number of connections): Different types of electric connections have been shown in these columns, i.e., Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement IV: Medical Facilities, 2009:

Columns 1 - 2 Serial number and Name of town: Self explanatory

Columns 3 to 13: The number of various medical institutions such as Hospitals, Dispensaries, Health Center, Family Welfare Center, Maternity and Child Welfare Center, Maternity Homes, T.B. Hospital/clinic, Nursing Homes, Charitable Hospital/Nursing Home, Mobile Health Clinic and Others as available in the town, are indicated in these columns (along with number of beds in brackets).

If a medical facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Column 14 - Veterinary Hospital: The Number of Veterinary Hospitals available in the town is given in this column.

Column 15 - Medicine Shop: The number of Medicine shops available in the town is given in this column.

Statement V: Educational, Recreational and Cultural Facilities, 2009:

Columns 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 15 Educational Facilities: The information on number of Primary school, Middle school, Secondary school, Senior Secondary school, Arts/Science/ Commerce colleges (of degree level and above), Medical colleges, Engineering colleges, Management Institute/Colleges, Polytechnics, Recognized Shorthand, Typewriting and vocational training Institutions, Non-formal Education Center (Sarva Shiksha Abhiyan Center), Special School for disabled and Others available in the town, are indicated in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Columns 16 to 23-Number of Social, Recreational and Culture Facilities : The information on No. of Home Orphanage, Working women's hostels (with No. of seats in bracket), No. of Old Age Home, Stadium, Cinema Theatre, Auditorium/Community halls, Public libraries and Reading rooms available in the town are given under these column.

Statement VI: Industry and Banking 2009:

Columns 1-2 Serial number and Name of town: - Self explanatory

Columns 3 to 5-Names of three most important commodities manufactured: The names of three most important commodities manufactured in the town are given under these columns.

Columns 6 to 8-Number of banks: The number of banks available in the referent town both Commercial and Co-operative banks are recorded against these columns.

Columns 9 & 10-Number of Agricultural and Non Agricultural Credit Societies: The number of Agricultural and Non Agricultural Credit Societies available in the referent town are given in these columns.

Statement VII: Civic and other Amenities in Slums, 2009:

This statement VII provides information on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

.....

Appendices to village directory

Appendix 1:

Appendix 1 of the Village Directory depicts C.D. block wise abstract of educational, medical, drinking water, post & telegraph, transport, banks, credit societies, recreation facility, miscellaneous and power supply facilities available in the 314 total inhabited villages. Out of total 314 inhabited villages in the district, 69 villages have the facility of pre-primary school, 244 villages have primary school, 172 villages have middle school, 100 villages have secondary school and 62 villages have senior secondary school. There are 2 villages in the district having college facility providing education of graduate and above level. There is 1 village in the district that has vocational training school/ITI. There are 67 villages in the district which do not have any type of educational institution and students of these villages have to go out of their village to avail the service. Of these 67 villages 62 villages are located in Naggar C.D. block and 5 villages in Kullu C.D. block.

As regards medical facility, there are 11 hospitals (allopathic) in the district of these 7 are in Anni C.D. block, 3 in Naggar C.D. block and 1 in Banjar C.D. block. There is only 1 village in the district located in Anni C.D. block which has a facility of hospital-alternative medicine. District have 4 Community health centres, 16 Primary health centres, 90 Primary health sub centres, 17 Maternity and child welfare centres, 1 T.B. clinic and 4 Family welfare centres. Of the 85 dispensaries in the district 24 dispensaries are in Kullu C.D. block, 20 are in Banjar C.D. block, 17 are in Anni C.D. block and 12 each in Naggar & Nirmand C.D. blocks, respectively. District have 58 Veterinary hospital, of these maximum of 16 are in Naggar C.D. block, 15 in Nirmand C.D. block, 12 in Kullu C.D. block, 8 in Banjar C.D. block and 7 in Anni C.D. block. In the district 9 villages have medical practioner with MBBS degree and 8 villages have medical practioner with other degree whereas 38 shops cater the needs of medicine at village level. There are 160 villages in the district which do not have any medical facility of any sort in the village. Maximum of such villages are located in Naggar C.D. block (136) and Banjar C.D. block (13).

After taking all the district figures together regarding drinking water, all the 314 inhabited villages have got the facility of drinking water in the village itself. There are number of villages which have more than one source of drinking water. Of these most important source of drinking is tap water and out of 314 inhabited villages tap water is available to 310 villages, spring water is available to 112 villages, hand pump is available to 109 villages, 60 villages have the facility of river/canal water, 17 villages have the facility of other source, tank/pond/lake water is available to 8 villages and well water (covered/uncovered) facility is available to only 5 villages.

As regards post & telegraph facility in the district, post office and sub-post office facility is available to 93 and 131 villages, respectively, post & telegraph offices facility is available to 15 villages, phone (land lines) facility is available to 253 villages besides mobile phone coverage to 265 villages. 67 villages have the facility of public call office and 20 have internet cafes/common service centre.

In the district 187 villages are connected to pucca road, 234 villages have the bus service, 164 have the facility of taxi & van, bank facility is available to 87 villages, 60 villages have the facility of ATM, 87 villages have agricultural credit societies in the village itself. 173 villages have public distribution system (PDS) shop. Regarding availability of newspaper, 152 villages are getting newspaper, all the villages have been provided with the power supply.

Appendix IA:

Appendix 1A deals with the C.D. block wise villages by number of primary schools. Out of 314 villages in the district 70 villages are deprived from the facility of primary school, of these 65 are primary schools falls in Naggar C.D. block and 5 in Kullu C.D. block. In the district 100 villages have single primary school; maximum numbers of 90 villages are in Naggar C.D. block and lowest Nirmand C.D. block. There are 44 villages in the district, each of them has two primary school, and 44 villages are such in which each village is having three primary schools. Another 52 villages having 4+ primary school each, of these 20 primary schools are in Kullu C.D. block followed by 13 in Anni C.D. block and lowest number of 3 in Naggar C.D. block.

Appendix 1B:

Appendix 1B depicts C.D. block wise information regarding different type of educational institutions. There are 67 villages in the district which do not have any type of educational institution, 62 of these are located in Naggar C.D. block and 5 in Kullu C.D. block. 75 villages in the district are such which has one primary school but no middle school in the village, maximum numbers of 62 are in Naggar C.D. block. There are 169 villages which are having at least one primary school and one middle school in each village. Similarly 99 villages are such in which each village is having at least one middle and one secondary school.

Appendix 1C:

Appendix 1C deals with the villages having different sources of drinking water. There are 199 villages in the entire district which have single source of drinking water i.e. tap whereas 111 villages in the district are having more than one source from amongst tap, well, tube well and hand pump.

Appendix II:

Appendix II deals with the villages with 5000 and above population which do not have one or more amenities in the district. There are 10 villages in the district which are having population 5000 and above. All the villages are having one or the other amenities. Out of these 10 villages, senior secondary school is available in 8 villages, primary health sub-centres in 7 villages, bank facility is available in 6 villages, tap drinking water and bus facility in all the villages whereas neither of these village has no facility of college in the villages itself.

Appendix III:

Appendix III deals with land utilization data in respect of census town in hectare. Shamshi (CT) has a total area of 322 hectare. Out of total area of 322 hectare 48 hectare comes area under non agricultural uses and 274 hectare under net area sown. Of total 274 hectare net area sown 53 hectare area covered under total irrigated land area and 221 hectare area total un- irrigated land area.

Appendix IV:

Appendix IV of the Village Directory gives C.D. block wise list of inhabited villages where no amenity other than drinking water facility is available. In the entire district there is no such village which is having only drinking water facility.

Appendix V:

Appendix V of the Village Directory shows the number of villages not having Scheduled Castes population. Out of 326 villages in the district, 12 villages are uninhabited and rest of 314 villages are inhabited. Out of 314 inhabited villages, 47 are such which do not have any Scheduled Castes population, of these 44 villages are in Naggar C.D. block and 2 in Kullu C.D. block and one in Banjar C.D. block.

Appendix VI:

Appendix VI shows number of villages not having Scheduled Tribes population. Out of 314 inhabited villages there are 146 villages which are not having Scheduled Tribes population and the remaining 168 inhabited villages are such which are having some Scheduled Tribes population. Naggar C.D. block has the highest number of 68 villages which do not have Scheduled Tribes population followed by 31 villages in Banjar C.D. block, 20 villages in Kullu C.D. block, 16 villages in Nirmand C.D. block and 11 villages in Anni C.D. block.

Appendix VII A:

Appendix VII-A depicts list of villages according to the proportion of Scheduled Castes to total population by ranges of such villages where Scheduled Castes population has been recorded in Census 2011. These percentage ranges are as less than 5, 5-10, 11-20, 21-30, 31-40, 41-50 and 51-75 per cent of total population of villages.

Appendix VII B:

Appendix VII-B depicts list of villages according to the proportion of Scheduled Tribes to total population by percentage ranges in the villages where Scheduled Tribes population has been recorded such as less than 5, 5-10, 11-20, 21-30, 31-40, 41-50 and 51-75 per cent.

Appendix VIII:

Appendix VIII shows the list of villages under each Gram Panchayat. This appendix could not be generated because in Himachal Pradesh a few few villages fall in more than one panchayat.

SECTION-II TOWN DIRECTORY

SECTION- II TOWN DIRECTORY

A brief analysis of statements of Town Directory:

Statements I to VII of the Town Directory deal with the various aspects of the urban areas in the district. The information available in them is being reproduced hereunder.

Statement I

Statement I deal with the status and growth history of the towns in the district. In Kullu district there are five towns. Of these, two towns have the status of Municipal Council (M CI); two towns are Nagar Panchayat (NP) and one having a status of Census Town (CT). Of the 5 towns in the district, Kullu (M CI) is a class-IV town; Manali (M CI) and Shamshi (CT) belong to class-V town while Bhuntar (NP) and Banjar (NP) belong to class-VI towns.

Manali Municipal Council was declared as town in Census 1971 with a population of 1,800. In Census 2011 the population of the town is 8,096 with growth rate of 29.2 during the decade 2001-2011. It has an area of 3.0 Sq. kms.. Density of population comes to 2699. The sex ratio of the town had shown a downward trend from 624 in Census 1991 to 569 females in Census 2001. In Census 2011 sex ratio of the town has increase to 716 which is lowest ratio as compared to other towns of the district.

Kullu Municipal Council was notified as town for the first time in 1951 Census with a population of 3,694 persons and an area of 6.78 Sq. kms. During the Census 2011 this population rose to 18,536 persons with a growth rate of 1.3 per cent during 2001-2011. During the Census 2011 the area of town curtailed to 6.68 Sq. kms. The density of the town which was 2,732 persons per Sq. km. during Census 2001 has increased to 2,775 in the Census 2011. The sex ratio of town has sharply increased from 856 in Census 2001 to 929 in Census 2011, which is highest among all the towns.

Bhuntar Nagar Panchayat was declared an urban area in the 1981 Census and had a population of 2,754 which rose to 2,972 in 1991 showing nominal increase of 7.9 per cent during 1981-91. But during 1991-2001, it has abnormal increase of 43.3 per cent and its population has increased to 4,260 in 2001. During the Census 2011 the population of town is 4,475 with a growth rate of 5 per cent during 2001-2011. Town has area of 2.0 Sq. kms. with density of population of 2,238 per Sq. km.. The sex ratio of this town was 852 in 1991 declined to 828 in Census 2001 and have sharply increased to 893 in Census 2011.

Shamshi (CT) is a newly created Census town during Census 2011. It has area of 3.22 Sq. kms. The population of town according to Census 2011 is 8,870, out of which Scheduled Castes population is 1,821 and Scheduled Tribes population is 1,690. The density of town according to Census 2011 is 2,755 per Sq. km. whereas the sex ratio of town is 869.

As Banjar town has been notified for the first time in Census 1991 with an area of 2.2 Sq. kms. The population of Banjar (NP) was 1,037 in Census 1991 which rose to 1,262 in Census 2001. In Census 2011 the population of town is 1,414 showing the growth of 12 per cent during the decade 2001-2011. The Density of population which was 574 per Sq. km in 2001 has increased to 634 per Sq. km in Census 2011. There is a constant increase in sex ratio of this town; the sex ratio of town which was 723 in 1991 increased to 805 in Census 2001 again increased to 890 in Census 2011.

Statement II

Statement II deals with the physical aspects and location of towns in 2009. Manali town a class V town is famous for tourism. This town is situated on the National Highway No. 21 and is 272 kms. from Shimla, the state headquarters and 40 kms. from Kullu, the district headquarters. The sub-district

and sub-divisional headquarters is situated within the precincts of Manali town. The nearest city with population of one lakh and more is Shimla at a distance of 272 kms whereas the nearest city with population of five lakh and more is Chandigarh which is at a distance of 317 kms from the town. The nearest railway station is Jogindarnagar which is 170 kms. away from the town. The town is provided with the bus service. Manali town experiences annual rainfall of 1,277 mm. with maximum temperature of 30°C and minimum temperature of -2°C.

Kullu town a class IV town is situated on National Highway No. 21 is the district as well as tahsil headquarters town. The town is located at a distance of 232 kms. from Shimla, the state headquarters. The nearest city with population one lakh and more is Shimla at a distance of 232 kms. whereas the nearest city with population of five lakh and more is Chandigarh which is at a distance of 277 kms..The nearest railway station is Jogindarnagar at a distance of 130 kms. The town is linked with the bus service. Kullu town experiences an annual rainfall of 900 mm. with maximum temperature of 24.8°C and minimum temperature of 9.5°C during winter.

Bhuntar (NP) a class VI town has an air strip situated at a distance of 11 kms. from the district headquarters Kullu and it is 221 kms. away from the state headquarters Shimla. The sub-divisional and tahsil headquarters are located at Kullu. The nearest city with population of one lakh and more is Shimla at a distance of 221 kms. whereas the nearest city with population of five lakh and more is Chandigarh which is at a distance of 266 kms.. The nearest railway station from Bhuntar is Jogindarnagar at a distance of 119 kms. The town is provided with the bus service. Bhuntar experiences annual rainfall of 818.3 mm. with maximum temperature of 33.90°C and minimum temperature 2.2°C.

Shamshi (CT) town a class V town is situated at a distance of 8 kms. from the district headquarters Kullu and it is 223 kms. away from the state headquarters Shimla. The sub-divisional and tahsil headquarters are located at Kullu. The town is provided with the bus service and the nearest railway station is Jogindarnagar at a distance of 121 kms.. The nearest city with population of one lakh and more is Shimla at a distance of 223 kms. whereas the nearest city with population of five lakh and more is Chandigarh which is at a distance of 268 kms.. Shamshi experiences annual rainfall of 818.3 mm. with maximum temperature of 33.90°C and minimum temperature of 2.2°C.

Banjar Nagar Panchayat a class VI town was created new urban area in the Kullu district in 1991 Census. Banjar town is connected with the bus route and is 215 kms. away from Shimla, the State headquarters and 55 kms. away from the district headquarters Kullu. The nearest railway station for this town is Jogindarnagar at a distance of 120 kms. The nearest city with population of one lakh and more is Shimla with a distance of 215 kms. and nearest city with population of five lakh and more is Chandigarh which is at a distance of 266 kms.. Banjar town is having the tahsil as well as the sub-divisional headquarters. Banjar town experiences annual rainfall of 1,100 mm. with maximum temperature of 32°C and minimum temperature 2.5°C.

Statement III

Statement III deals with the civic and other amenities available in towns in 2009. Out of the five towns of the district Buntar (NP), Shamshi (CT) and Banjar (NP) have open surface drains whereas the towns of Manali (M CI) and Kullu (M CI) have both open and closed drainage system. The local bodies are maintaining water borne latrines in all the five towns in the district. Highest number of 5,225 is reported in Kullu (M CI) followed by 1,304 in Shamshi (CT), 1,260 in Manali (M CI), 804 in Buntar (NP) and lowest number of 196 in Banjar (NP). All the towns have the facility of protected water supply. Fire fighting service is available in Manali (M CI), Kullu (M CI) and Buntar (NP) whereas for this facility Shamshi (CT) and Banjar (NP) have to depend on Kullu (M CI). In the field of electricity Manali (M CI)

has 2,287 domestic, 30 industrial, 802 commercial connections and 313 road lighting points. Kullu (M CI) has 11,863 domestic, 66 industrial, 2,437 commercial connections and 1,774 road lighting points. Buntar (NP) has 1,730 domestic, 29 industrial, 1,174 commercial connections and 250 road lighting points. Shamshi (CT) has 1,504 domestic, 348 industrial, 2,699 commercial connections and 120 road lighting points besides 141 other type of connections whereas Banjar (NP) has 974 domestic, 10 industrial, 348 commercial connections and 130 road lighting points.

Statement IV

Statement IV deals with the medical facilities available in the towns and in case this facility is not available nearest place and distance from the town where this facility is available. Manali (M CI) has 1 allopathic hospital with 30 beds; Kullu (M CI) has 2 allopathic hospitals with 250 beds, Banjar (NP) has 1 allopathic hospital with 50 beds whereas Buntar (NP) and Shamshi (CT) have to depend on Kullu (M CI) to avail this facility. Manali (M CI), Kullu (M CI) and Banjar (NP) each have 1 maternity and Child Welfare Center with 1, 4 and no bed, respectively. Only two towns have TB Clinic with no bed in Manali and with 10 beds in Kullu. Veterinary hospital is available in Kullu (M CI), Shamshi (CT) and Banjar (NP). Only Kullu town has the facility of nursing homes. Medicine shops are available in all the five towns of the district.

Statement V

Statement V deals with educational, recreational and cultural facilities available in the town during the year 2009. All the five towns of the district have the facility of primary and middle school whereas the facility of secondary and senior secondary school is concerned; it is available in four towns. Shamshi (CT) where this facility is not available has to depend on nearby village. Higher education of degree level is available in Kullu and Banjar towns. Medical college, engineering college, management/institute college and polytechnic college facilities are not available in any town of the district and these facilities are available in nearby places of Shimla, Tanda, Mandi, Hamirpur, Nerchowk and Sundarnagar. Special school for disabled and working women's hostel is available in Kullu town only. Stadium, cinema theatre and public libraries are available in Manali and Kullu towns.

Statement VI

It deals with industry and banking facilities in the town in 2009. The most important items manufactured in the town of the district are Woollen Caps, Kullu Shawl, Fruit Juices, Wooden furniture, Kullu caps, Woollen garments and grass shoes. Banking facilities are available in all the towns of the district. Kullu town has the highest number of branches of nationalized, private and co-operative banks. Agricultural credit societies are available in all the town of the district except Bhuntar town. Non-agricultural credit societies are available in Manali (5), Kullu (12), Bhuntar (1) and Banjar (1).

Statement VII

Statement VII deals with the civic and other amenities available in all the slums whether notified or not for all the town of the district in 2009. The slum areas have been reported in Banjar town where 5 areas have been identified as slum and notified. The total slum population of these areas is 820 which consist of 240 households. Of these 5 areas only 1 area has paved road. The sewerage system in these slums is open surface drains and sewer/sewerage. The local bodies are maintaining waterborne latrines in all the slums. The water supply is provided through taps in all slums area of town. The entire slum areas of the town are electrified and have domestic, road lighting and other connections.
