- Headquarters of Mandi Sadar and Balh C.D. Blocks are at Mandi.
- C.D. Block Headquarters is also Tahsil/Sub-Tah. Headquarters.
- C.D. Block boundary excludes Statutory Towns.

MOTIF

Mandi Town

The name "Mandi" (and the former name "Mandav Nagar") has its roots from Great Sage Rishi 'Mandav' who prayed in this area, and the rocks turned black due to the severity of his penance. Alternatively, the name may have been derived from the common word mandi which means "market" in Hindi. It may possibly be connected with the Sanskrit root mandaptika, meaning "an open hall or shed," District of Mandi was formed with the merger of two princely states, Mandi State and Suket State, on 15 April 1948, when the State of Himachal Pradesh was established. Until the mid 20th century, Mandi was on the trade route between Yarkant County and Ladakh to Hoshiarpur and the Indian plains, served as commercial hub and trade centre. Other attraction point in the city is Sunken Garden, which is situated in the middle of the town, was earlier a garbage dump and a rundown place during the reign of Raja Sidh Sen of Mandi. It is the same site where Raja Sidh Sen killed his son-in-law Raja Prithi of Bhangal. It was initially a lake and was later transformed into a garden by Raja Joginder Sen. This garden also has a clock tower.

(h) Appendix to Town Directory- Towns showing their outgrowth with population	2042
(i)	

Foreword

The District Census Handbook DCHB is an important publication of the Census Organization since 1951. It contains both Census and non-Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and ward of the District. The Primary Census Abstract PCA part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House listing and Housing Census. The non-Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (C.D. Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of Census 2001, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio-gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/Common Service Centre, Private Courier Facility,

Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System (PDS) Shop, Mandis/Regular Market, Weekly Hat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums, respectively. C.D. Block wise data of Village Directory and Village PCA have been presented in DCHB of Census 2011 as presented in earlier Census.

6. The data of DCHB Census 2011 have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in Census 2011.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Sh. Balbir Tegta, Director of Census Operations, Himachal Pradesh. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full co-operation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract PCA. The work of preparation of DCHB, Census 2011 has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

New Delhi.

(C. Chandramouli)
Registrar General & Census Commissioner, India
New Delhi

Preface

The Census is the biggest source of comprehensive data on demography, economic activity, literacy and education, housing and household amenities, urbanization, fertility, mortality, Scheduled Caste and Schedule Tribes, language, religion and migration at village, town and ward level. District Census Hand Book (DCHB) is series of such Census publication and is the most important district level publication which provides reliable data at grass root level for the purpose of planning, administrative requirements as well as of academic development in socio-demographic field. The DCHB contains the salient results on the data gathered at the actual enumeration of head-count and in addition contain a wealth of other non-census information in respect of each village and town of the district.

Following the Census tradition, the 2011 series of the District Census Handbooks is also comprised of two parts. Part-A contains Village and Town Directory data which provides information on infrastructural amenities and land use data at village level. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. Now DCHB 2011 will also present the newly added amenities which have been discussed in the foreword of this volume along with the information pertaining to name and location of villages, area, population, number of households, important civic amenities/ facilities available in villages like educational, medical, drinking water, post, telegraph and telephone, commercial and co-operative banks, agricultural & non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town by distance, power supply, newspaper/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part-B contains village and town-wise Primary Census Abstract (PCA) along with Housing amenities data which provides information on area, number of households, sex-wise total population, child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and division of workers into four economic categories i.e. cultivators, agricultural labourers, workers in household industries, other workers and special tables on Housing data in respect of each village and town of the district.

Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages, conditions of housing, assets available with households and demographic profile of population at Sub-District/C.D. Block level which are of much utility for demarcation of areas of surplus and deficit to reorient the planning process.

The District Census Handbook is a joint venture of the Government of Himachal Pradesh and the Census Organization of the Government of India. The design of 2011 District Census Handbooks is evolved centrally by the Registrar General and Census Commissioner, India and accordingly these books have been prepared at Directorate level. The data so supplied by the field level officers have been cross checked with the data obtained from various departments and an attempt had been made to reconcile the discrepancies to make it more reliable. I am grateful to all Heads of Departments of the State Government, officers and staff engaged in the conduct of Census 2011 for their co-operation to accomplish this task.

The compilations of such a huge amount of varied data in a single volume requires proper planning and close monitoring. I owe special thanks to Dr. C. Chandramouli, I.A.S., the Registrar General and Census Commissioner, India for his enlightened guidance and encouragement. I am also thankful to Shri Deepak Rastogi, Additional Registrar General of India, Dr. R.C. Sethi, Ex Additional Registrar General of India, Dr. A.P. Singh, Deputy Registrar General (Map), Shri P.K. Banerjee, Deputy Registrar

General (C&T), Shri A.K. Samal, Additional Director, Shri M.S. Thapa, Additional Director, Dr. Pratibha Kumari, Assistant Registrar General (SS) and Shri A.K. Arora, Joint Director for providing technical guidance and finalising this report.

The Census 2011 Operations in Himachal Pradesh were carried out under the able guidance and the dynamic supervision of Shri Balbir Tegta, I.A.S., the then Director of Census Operations. I owe my deep sense of gratitude to him.

The data presented in the District Census Handbook required a concerted team work of officers and staff members of this Directorate who were involved whole heartedly at various stages of its planning, supervision, field work, and computerization, preparation of manuscript, maps and printing. I express my appreciation for the painstaking and dedicated services rendered by all of them. Special mention is made of Shri R.K. Ram, former Joint Director, Shri Ashish Chauhan, Assistant Director, Shri R.S. Negi, Assistant Director and Shri Ramesh Kumar Sharma, Statistical Investigator Gr.-II (Rtd.), Shri Narender Kumar Sharma, Sr. Compiler, Shri Ratan Kumar Lalmani, Statistical Investigator Gr.-II, Shri Anil Kumar Maurya, Compiler, Shri Ramesh Kumar, Compiler and Smt. Sunita Rani, Sr. Compiler. Primary Census Abstract (PCA) included in this publication was scrutinized by Census Section under the supervision of Shri Narpat Ram, Statistical Investigator Gr.-I, Shri Mohar Singh Chauhan, Statistical Investigator Gr.-I, Shri Ramesh Chand Chandel, Statistical Investigator Gr.-II, Ms. Archana Nahar, Statistical Investigator Gr.-II, Shri Anil Thakur, Sr. Compiler, Shri Rajender Singh Chandel, Sr. Compiler and Shri Bhikham Ram, Compiler. Maps appearing in this publication are prepared by Map Section under the guidance of Smt. Veena Thakur, Research Officer (Map). The whole manuscript of the District Census Handbook is edited and finalised by me. I express my appreciation for the dedicated services rendered by them and all other my colleagues in the Directorate associated with this project.

I hope this volume will readily come to the expectation of the data users.

History and Scope of the District Census Handbook

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of Census and non-Census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both Census and non-Census data of urban as well as rural areas for each district. The Census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non-Census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 Census DCHB provided a descriptive account of the district, administrative statistics, Census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to Tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (C.D. Block) level presentation of village directory and PCA data instead of the traditional Tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking and (vii) Civic & other amenities in Slums. C.D. Block wise data of Village Directory and Village PCA have been presented in DCHB of Census 2011 as presented in earlier Census. The data of DCHB Census 2011 have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the parts have been published in separate volumes in Census 2011.

Brief history of the district

Mandi district was formed by the amalgamation of the erstwhile princely states of Mandi and Suket on the formation of Himachal Pradesh on 15th April, 1948. Dr. J. Hutchinson and Dr. Vogel have accounted in the political history of the states that like most of the other hill states, Mandi takes its names from its capital which is situated on the left bank of the Beas. Mandi is a Hindi word, meaning market and it may possibly be connected with the Sanskrit word 'mandapika' meaning an open hall or shed and might have been derived from Sanskrit root 'mand' meaning to adorn or distribute. If a conjecture as to origin of the name may be offered, it probably took its rise from fact that in ancient times, as at the present day, the place was a centre of trade on the main route from Yarkand and Ladakh to Hoshiarpur and the plains. Another belief is that Mandi was named after a Rishi Mandvya. He is reported to have performed Tapasya on a rock called "Koleera" which is on the bank of river Beas near Padal. The earliest mention of the Mandi is on the inscription at Triloknath temple in old Mandi, which is dated in the year 2264 of the Kaliyuga era and the Saka year 1442 corresponding to AD 1520. Mandi is known by the name of Zahor among the Tibetan. It has an interesting association with the great Buddhist teacher and missionary, Padma Sambhava (AD 750-800), for it was from Zahor or Mandi that he went at the request of the Tibetan King Sronglbtzen, to preach the doctrines of Buddhism in Tibet. Pandit Hira Nand Shastri states that in his lamaist representations, Padma sambhava appears in the ancient Mandi garb and the special head dress worn by him is still called Zahorma.

The early history of Mandi district is similar to that of other parts of the hills. The whole tract was under the control of numerous petty barons bearing the title of Rana or Thakur, the Rana being Kshatriya and Thakurs of some lower castes and the vernacular history gives a graphic account of their subjection by the early Rajas. As in the case of many of other Hill States, Sir Alexander Cunningham was the first to institute enquiries in to the history of Mandi and Suket royal families and the results of his researches are to be found in the Report of the Archaeological Survey-2. A very little material of a historical character in addition to the Vanshavali or genealogical roll of the Rajas is available.

The chiefs of Mandi, Suket, Keonthal and Kashtwar are said to be from a common ancestor of the Chandravanshi line of Rajputs of Sen dynasty of Bengal and they claim their descent from the Pandavas of Mahabharata. Bahu Sen, the younger brother of Sahu Sen, a chief of Suket established an independent territory for himself and was recognized as a Rana or local chief. Karanchena Sen was the tenth descendant from Bahu Sen and his Rani was the daughter of Rana of Seokot. Being an ambitious ruler he subdued the Ranas of Bans, Neru and Baggi, Thachi and forced them to pay tributes to him. The subdued Ranas appealed to the Kullu chief and requested for his help. In the struggle, Karanchena Sen fell and his wife had to flee for her life. In her flight she gave birth to a male child in the jungle and the Rani along with the child were taken to the Rana of Seokot. Her son subsequently acquired the name of Ban Sen and the Rana of Seokot being without a male issue adopted him as his successor. Thus, Ban Sen become the chief of Seokot. Ban Sen began to enlarge his territory and built his residence at Bhiu on the right bank of the Beas about 3 kms. from the present Mandi town. He died about 1300 AD. He was succeeded by his son Kalyan Sen who built a palace at Batahuli on the right bank of the river Beas which remained capital of Mandi state till the present Mandi town was established. He was succeeded by Hira Sen and the consolidation of the territory was completed under Ajber Sen, the nineteenth in descendant from Bahu Sen about 1500AD. He was considered as an able and benevolent ruler. He founded the present Mandi town and shifted his capital to this place. The temple of Bhutnath in the heart of the town was constructed during his reign and that of Triloknath by the inspiration of his queen Surat Rani or Sultana Devi. The Ranas of Kamlah and Kalar were subjugated by him and Chhattar Sen, his son built a fort in Kalar called Lakargarh. Most of the Ranas of the adjoining areas accepted the supremacy of Mandi and were subjected to pay tributaries in cash and kind. He was succeeded by Chhattar Sen followed by Sahib Sen. With the initiative of Rani of Sahib Sen, the ferry on the Beas between Batahuli and Mandi and drinking water

fountains were constructed along the main roads. Sahib Sen invaded the Rana of Drang and acquired the salt mines. It is said that the area known as Seraj Kullu became the part of Mandi when Raja Jagat Singh of Kullu with the assistance of Mandi defeated the Raja of Laksari.

Narayan Sen was a son of Sahib Sen and succeeded him in 1575AD. Further extension of territory were made during his reign and Ranas of Ner, Pandoh and Chuhar were subdued and seven garhs illaguas of Chuhar and five of Pandoh were annexed to the State. He built the fort of Naraingarh and annexed a large portion of Suket by fixing the boundary at Balh and Lohara. He was succeeded by Keshav Sen in 1595 AD. Mandi came under the influence of Mughals during the reign of Keshav Sen but the Mughals did not interfere in the internal matters of the state. The Mughal emperor was acknowledged by payment of annual tribute and furnishing a contingent for military expeditions. The 'satli pillars' of Mandi Rajas and their families locally known as Barsetas still stand on the left bank of Suketi Nallah. He was succeeded by his son Hira Sen in 1623 AD who further extended the territorial limits of the state. He was succeeded by Surya Sen or Suraj Sen in 1637 AD. He was an ambitious chief, but his efforts to extend his territory did not materialize and rather brought disaster to the state. The Mughal supremacy had been fully established and Mandi like other hill states became a tributary to the Mughal Empire. During his time, the state suffered territorial losses to Kullu and Guler chiefs and state was sacked. He was succeeded by his younger brother Shyam Sen who had annexed Lohara illaqa to Mandi and struggled to gain the possession of much of the territory, which had been lost to the various rulers during the time of Suraj Sen. Suraj Sen was succeeded by Gaur Sen in 1679. With the assistance of the ruler of Bilaspur, he conquered and annexed the areas of Dhayara, Bira and Patri from Suket. He was succeeded by Sidh Sen in 1684 who was known for his valour. He annexed good number of territories to the state from Banaghal, Suket and Kullu. The revenue system introduced by him remains enforce in the state till the regular settlement in 1917. He also introduced the system of advancing state loans to the private persons. The areas of Nachan, Hatli, and Lad were acquired from Suket by conquest in 1688 and he also captured the forts of Danesargarh and Sarakpur. Shivpur was also recovered and Raipur and Madhopur belonging to Suket were annexed. He was succeeded by Shamsheer Sen, the son of Shiv Jawala Sen. The successive rulers of Mandi were Surma Sen, Ishwari Sen, Zalam Sen, Balbir Sen and Bijay Sen.

William Moorcroft was the first European to visit Mandi in March, 1820 during the reign of Ishwari Sen. Raja Balbir sen was twenty two years of age at the time of his succession and two months afterwards Mandi was visited by Mr Vigne in 1839 AD in the course of his journey through the hills. In June, 1840 Sikh expedition under General Ventura was sent to Mandi and General sent a demand for immediate payment of certain arrears of tribute which formed the ostensible excuse for the expedition. This demand was at once compiled with before the first Sikh war. Balbir sen had been in secret communication with Mr Erskine, Superintendent of Hill states with a view to securing British protection and though compelled to send a contingent of 300 men to Sikh army for the campaign on the Satluj, yet his sympathies were with the British. Immediately after the battle of Sobraon, he and the Raja of Suket sent confidential agent named Sibu Pandit to Mr Erskine, tendering their allegiance to British Government and requesting an interview. This was readily granted and on 21st Februry, 1846 the two chiefs visited Mr Erskine at Bilaspur and gave in their allegiance in person. But the Raja did not wait for the conclusion of the war before attempting to free his country. He boldly attacked the Sikh garrison in the state and captured all the forts except kamlah which did not surrender till the war was over. On 9th March 1846, a treaty was concluded between the British and the Sikh whereby among other provisions, the whole of the Doab between the Satluj and Beas was ceded in perpetuity to Government. Mandi and Suket being within the ceded territory came directly under British Control and were placed in charge of the Commissioner of Jalandhar. Lord Lowrence, then Commissioner of Jalandhar and Political Agent of the hill states visited Mandi on his way to Kullu in the autumn of 1846 and advised the Raja to build roads in the state. Mr Barnes, the first Deputy Commissioner of Kangra also settled the boundaries between Mandi, Suket and Kangra.

Raja Balbir sen died on 26th January, 1851 leaving three sons, Bijai Sen, Pardhan Singh and Man Singh. Bijai Sen was only four years old. Wazir Gosaon was in office till 1859 when Raja Bijai Sen attained the age of thirteen and he was married to the grand daughter of the Raja of Dalarpur and soon afterwards to a niece of the Raja of Guler. During the time of Bijai Sen, Lord Elgin, the first Viceroy of India made a tour in the hills and on his way from Kullu he halted at Badhwani, Jhatingri and Drang falling in the Mandi state. Raja accompanied by queen mother had an interview with the Viceroy at Darang. In 1864, the government granted the Raja a Salute of 11 guns. The Raja made a grant of one lac rupees for public utility services in the state when he acquired the power of a ruler. A school, hospital and post office were opened in Mandi and mule road from Baijnath to Sultanpur in Kullu over the Bubu pass and sarais and traveller's bungalows along the lines of the road from Kangra valley through Mandi towards Kullu and Shimla were constructed. The boundaries between Mandi and Suket on the Hatli side were also finally settled by the Commissioner of Jalandhar, in 1877. The Victoria suspension bridge over the Beas river at Mandi was constructed in 1881. A new road from Mandi to Kullu via Duchi Pass with a suspension bridge over the river Uhl was commissioned in addition to a cart road from Baijnath to Mandi and a road from Mandi to Secundra. During his time, guidelines for the functioning of the courts were issued and implemented. The jurisdiction of Civil and Criminal courts were clearly defined and classified. The rules for the hearing of the appeals and revisions were modified and the period of limitation was also fixed. In addition, the rights of the agriculturists in their forests were clearly defined and the rules were framed to regulate them. The iron suspension bridge over the Suketi Nallah near Mandi was opened during his time. Bijai Sen left no direct heir and in 1897 Bhiwani Sen was recognized as his heir and he succeeded him in 1903 and died in 1912 without leaving no direct heir to succeed him. In order to devise a uniform pattern of land revenue and a satisfactory solution of the question of the "Begar", an Indian Civil Service officer Mr C.C. Garbette was at the request of the Raja lent to the Darbar as settlement officer in 1911. Mr Garbatte was obliged to go on sick leave in the following October and was relieved by Mr G. Walker I.C.S. These changes were followed soon after the death of Raja Bhiwani Sen. After some delay, Mian Joginder Sen the nearest natural male relative of the deceased Raja was selected by Government and was formally installed as Raja Joginder Sen by Sir Louis Dane, K.C.S.I. Lieutenant Governor of the Punjab on 28th April, 1913. Joginder Sen was invested with full powers of a ruling chief in February 1925. During the period of his minority, Mandi remained under the management of British officer and number of departments were overhauled and recognized. A regular settlement was carried out between 1911-1917. The forests were placed under efficient control by carrying out a forest settlement and a working plan for the future exploitation of the state forests under Mr H. L. Wright an officer of Indian Forest Department from May 1914 to November 1917. In November, 1921 the political control of the state was transferred from the Punjab government to the Government of India in the political department. During the time of Joginder Sen, the Mandi Hydro Electric Scheme was inaugurated in 1927. After independence, the state was merged in the newly formed state of Himachal Pradesh.

Sir A. Cunningham was the first to draw attention to the 'Vanshawali' of the ruling family of Suket in his paper on the history of Mandi in the Reports of the Archaeological survey. According to him, the foundation of Suket was laid at an early period (AD765). More recently a vernacular history of the state has been published by Munshi Hardiyal singh of Kangra, who acted for some time, as first Tahsildar and later as Superintendent of the State. It is called Tawarikh-I-Riyasat-Hai-Kohistan-Punjab. There are also references to Suket in the records of Mandi and Kullu as well as other states, which help to elucidate events. Suket does not seem to be referred to in the Raja Tarangini and only once in AD 1388 by any of the Mohammedan historians. Like Mandi state, the early history of Suket is also associated with the rulers of Sen Dynasty. According to the available records, Vira or Bir Singh (Bir Sen) on his migration from Bengal alongwith his forces crossed the river Satluj at Juiri fery in 765 AD and started the conquest of the area and he settled at Kunnudhar. He attacked the area of Kothidehr, and seized the area of Nanj, Salalu, Belu and Thanamagra and built forts at Kaun and Magra. The Thakurs of Kandikot and Saruhi surrendered before Bir Sen and he built a fort at Pangana. He conquered the fort of Birkot on the borders

of Kumharsain. After the conquest of Seraj area of Kullu, Bir Sen captured Pandoh and Nachni alongwith the various forts etc. After subduing the northern part of the state, he turned westward towards Balh illaques and advanced as far as Secundra-Ki-dhar. The Rana of Hatli was defeated by him and the boundary with Kangra was fixed by constructing a fort on the Sir Khund. Bir Sen was succeeded by his son Dhir Sen whose reign was short. In 1240 AD, Madan sen, one of the successors of Bir sen was a strong ruler and he extended the areas of the state. Under Madan Sen's regime, Suket reached the highest of its prosperity and power. He shifted the capital of state from Pangna to Lohara in the plains of Balh. The decline of the state was started with his death. In 1663 AD, Jeet Sen was installed Raja. It is said that Jeet Sen lost every battle he fought. During his regime, Mandi annexed Balh area as far as Suketi Nallah. Jeet Sen died childless and he was succeeded by Garur Sen. He founded Sundarnagar on the small plain three Kilometres south of Naggar and his wife constructed the Suraj Kund temple. Bikram Sen became the Raja of Suket in 1748 AD and his reign was covered by a period of great political importance in Punjab. Ahmed Shah Durani invaded Punjab in 1747 and in 1752 it was ceded to him by Ahmad Shah of Delhi. During this period, Suket became independent like other hill states, as there was turmoil in the area. During this period, Sikhs had also risen to power and Jassa Singh Ramgarhia invaded Kangra hills and established his sovereignty over several hill States. Probably Suket was also engulfed. He was succeeded by his son Ranjit Singh in 1762. He tried to recover Nachan from Mandi. He had great reliance in his wazir Narpat and his period was considered that of peace and prosperity in Suket. The law was strictly upheld. Ranjit Singh died in 1769 of accidental poisoning.

Vikram Sen was installed the Raja of Suket in 1791. He helped Raja Sansar Chand of Kangra in attacking Mandi. The capital of the state was established at Baned now called Sundarnagar about three Kilometres south of Suket which was founded by Garur Sen. Suket or Naggar was called Purana Naggar but lost importance as new town namely Bhojpur sprang up half way between Baned and Suket. The Hill chiefs of Kangra jointly sent an invitation through the Raja of Bilaspur to Amar Singh Thapa, Gorkha Commander for invading Kangra. Sansar Chand's forces were defeated at Mehalmoni and the fort of Kangra was captured by the Gorkhas. Raja Ishwari Sen of Mandi held by Sansar Chand in captivity was also released by the Gorkhas. Bikram Sen was made prisoner for about six months when he visited Bilaspur. He was compelled to surrender six forts seized from Mandi including Hatli and Balh. He managed his release in the night by leaving his Hukabardar in his place and reached his territory on foot. The Gorkhas were unable to retain their hold on Kangra and in 1809 with the help of Maharaja Ranjit Singh, Sansar Chand expelled them to the east of the Satluj but the famous Kangra fort was gulped by the Sikhs. Thus the supremacy over the hill States passed into the hands of the Sikhs and Suket also became their tributary. During this period, Pali and Dudar forts were constructed. During Bikram Sen's period William Moor Croft visited Suket in 1820 on his travel to Kullu and Ladakh and probably was the first European to visit Suket. Bikram Sen was considered to be a strict administrator and he punished thieves, robbers and traffickers in women with utmost rigour.

Uggar Sen became the Raja of Suket in 1838. Mr. Vigne, the traveller visited Suket during his time in 1839 on his way back from the inner mountains. According to him Suket-Mandi valley was eight or ten miles in length and three or four miles in breadth richly cultivated and having numerous villages surrounded by various forests on hilltops. Sikh forces were sent around 1840 to the hill States with a view to seize the Raja of Suket, Mandi and Kullu before making an attack on the central Tibet. On reaching the Sikh army, Uggar Sen gave in his submission and he was treated by them with consideration. In 1845, Uggar Sen refused to oblige the Sikhs when they asked for contingent against the Britishers who had invaded the territory. Uggar Sen joined hand with Balbir Sen of Mandi and had a meeting with Mr Erskine, the Superintendent of Shimla Hill States at Bilaspur tendering their allegiance to the British Government and requested for an interview. On conclusion of the treaty of March 9, 1846 between the British Government and Sikh darbar, the whole of Doab between the Satluj and Beas were ceded in perpetuity to the former. Mandi and Suket falling within the ceded territory came directly under the British control and were placed under the charge of Commissioner of Jalandhar in October, 1846 and

‘Sanad’ was granted to Uggar Sen defining his rights and obligations and confirming his possession. The right of adoption was also granted to the State on failure of direct heirs. Uggar Sen built the Shiva temple at Amla-Bimla and in 1876 died due to paralysis. He was well respected by his people for his liberal view, courtesy and courage. He was well versed in Sanskrit and was also fond of music and well acquainted with the science of medicines.

Rudar Sen, son of Uggar Sen succeeded him in 1876 who was installed the Raja of Suket by the Commissioner of Jalandhar. Rudar Sen imposed ‘Dhal’ on the land instead of tax on each house. His rules were considered very oppressive and land revenue was increased in addition to the various levies imposed on the Zamindars which created resentment among the people. He was deposed in 1879 and finally he settled at Hoshiarpur till his death in 1887. Rudar Sen was succeeded by Arimardan Sen who was just fifteen years of age at the time of installation. He died at Dharmsala soon after his succession and was succeeded by his younger brother Dusht Nikandan Sen. Being minor the administration remained in the hands of the Superintendent until the Raja received full power. The land assessment was reduced in 1888 and two systems of land assessment were introduced and also carried out many improvements in the State. He opened a dispensary at Baned and a school at Bhojpur. A post office was opened in 1900 and a telegraph office in 1906. Economy measures were taken by abolishing the unnecessary posts and efforts were made for clearing out the debts and bringing out sound financial conditions. The work on various important public utility buildings was also undertaken. A bridge on Satluj at Juiri was also completed in 1889 and the roads were maintained in good condition. The sepoy lines and a new jail building were constructed in addition to office complex and granaries. He was succeeded by his son Bhim Sen in 1908. During his regime, a fully equipped hospital was constructed at Baned and rest houses at Baned, Seri and Dehar were also constructed. The road from Suket to Mandi was made motorable. The Raja rendered valuable services during the first World War and the title of Knighthood was conferred on him. Bhim Sen died in 1919 and was succeeded by his younger brother Lakshman Sen as the late Raja had no issue. Land revenue settlement was carried out during the time of Raja Lakshman Sen and the department of judiciary and other government departments were recognized. Schools for boys and girls were also opened. Club building, orphanage and Chief Court were also constructed during his time. The political control of the State was transferred to the Government of India from the government of Punjab on 1st November 1921. The State was merged with Himachal Pradesh on 15th April 1948 and a separate district of Mandi came into existence by merging Mandi and Suket States.

People: The whole population with trifling exceptions in district is inhabited by Hindu. The original inhabitants of this area are Rajputs, Brahmins, Khatri and Kanets. Other section of the people consists of Kumhar, Lohars and Thawins, Nais, Mirasis, Chuhras, Kolis, Bohras, Rathis, Gujjars, Chanals and Dumne. Brief description of some of the important communities is given hereunder:-

Dress: The clothing for men consists of shirt and pajama. The turban has now replaced by a type of Gandhian cap and Kulvi Caps. More often people now go bare headed. The women folks wear long shirt and pajama or salwar kamiz. The head is covered with the coloured dupatta or chunni. Wearing of bushirt, T-shirts, sweaters and trousers by the men and sari and blouse by women has become popular among the economically well off class. The people use woollen clothes prepared from homespun wool which is locally woven during winter. The villagers are attired in their best when they attend any fair or festival. The coloured piece of cloth called Dhatu for covering the head is worn by the women in Karsog tahsil. Bali, Kanganu, Chak and Pazebe are the ornaments worn by the women of all sections. While the women of economically better families generally wear gold rings in their nose, silver or gold rings in their ears, bangles of brass or glass or gold in their wrists and silver necklace around the neck. They put surma or antimony in the eyes and bindi in the forehead at marriages and festivals. Married women used coloured dupattas while widows generally use white dupatta. The Punjabi kamiz and salwar are now more commonly used and cheap rayons or nylon are used for dupatta.

Religion: A majority of the population of the district possesses Hinduism. The Muslims, Sikhs and Buddhists are in minority. The religion of the district falls naturally into three groups. The religion of the lower hills appears to represent a fusion between the cults of the Himalayas proper and the beliefs of the later Rajput invaders. Over this admixture, a veneer of orthodox Hinduism has been super imposed. All the ceremonies, rites and rituals are performed according to religion. The religious assignments in several respects are most interesting, both because of their variety and throw the light on the influence of the Brahmins on these rites and rituals. The endowment of the village gods presents the features commonly found in the hills. The diety is the malguzar as well as the assignee and his tenants either pay rent into his treasury or cultivate the land on condition of service. The majority of gods are landholders and several of them hold assignments of considerable value granted either in recognition of their importance or as a reward for a supposed miracle. The grants in favour of orthodox temples are in the hands of Pujaris. The management of the other important temples is in the charge of trustees and institutional organization, which administers the endowments of religion and charity. There is no doubt that the majority of the village gods in the district as throughout the western Himalayas belong to serpent groups and Narain is a tittle for Snake God. The temple image almost invariably consists of a 'pind' or 'linga' of stone and this probably represents the primitive idol. Nowadays, the most important outward and visible symbol of the god is his rath, a term which may be translated as ark, palanquin or litter.

Language: A majority of the people in the district speak the local Mandiali dialect. According to the classification of languages made by the Linguistic Survey of India, the dialects under the Mandiali group have been classified as one of the several dialects under Western Pahari. Western Pahari has been classified as sub-group under Pahari group, inner sub-branch of Indo-Aryan branch and Aryan sub-family under the broader the Indo-European family of languages. Under the sub-group, Western Pahari is included a number of dialects spoken in the hilly area stretched from Bhadarwah and Chamba on the North-West to Sirmaur on the South-East. (i Census of India-1961, Vol 1 India, Part II C & ii Language Tables p. CL xx and Una). Besides Pahari, Hindi is also in common use in the district. In the lower portions of the district such as in Mandi, Balh, Sundarnagar, Jogindarnagar and Sarkaghat people speak proper Mandiali while in the hilly areas like Seraj, Karsog, Sanor, Badar, Utersal and Chuhar, the variation of Mandiali spoken by the hill people is known as Mandiali Pahari. Mandiali used to be written formerly in Tankri or Tang Kray script, but presently devnagri script is commonly being used.

The district lying between Shimla and Kangra proper with Kullu for their Eastern boundary, they form part of the central linguistic wedge between Chamba and Shimla. It is noticeable that North of Kangra and South Suket certain linguistic peculiarities are found which are not observed in the central area. The main Mandiali dialect is rather widely spread. It is found with very little change over all the Western and Northern portions of the district. The centre of North Mandiali may be taken to be Jhatingri half way between Sultanpur and Palampur. In the South-East portion of the district, called Mandi Seraj, the dialect spoken is still Mandiali but it shows resemblances to inner Seraj, the dialect of the Northern half of the Seraj tahsil of Kullu. Although the dialect shows many traces of the influence of Punjabi, it keeps clear of that influence in the plural of nouns, which is in the oblique generally the same as the singular except in the vocative case.

The district is located in the micro-region of Central Himachal Pradesh covering the districts of Kangra, Hamirpur, Una, Mandi and Kullu Districts which falls in Himachal Pradesh Himalaya sub-region of the northern mountains region. District has not undergone any jurisdictional change at district level during the decade 2001–2011.

The district is divided into seven sub-divisions of Mandi, Chachyot, Jogindarnagar, Padhar, Sarkaghat, Sundarnagar and Karsog and 17 Tahsil/Sub-Tahsils. Further district is divided into ten Community Development Blocks for the developmental purposes. The Deputy Commissioner is head of district administration and is assisted by one Additional Deputy Commissioner, One Additional District

Magistrate (ADM) and one Asstt. Commissioner is discharging administrative, regulatory and other functions. The other district officers are District and Session Judge, Chief Judicial Magistrate, Superintendent of Police, Chief Executive Officer of Zila Parishad. Chief Medical Officer and Senior officers of the state Government look after the developmental and regulatory functions in the district. All departments of the state Govt. such as public works department, agriculture, horticulture, irrigation & public health, forests, education, animal husbandary and fisheries etc. have district level officers. Sub-Divisional Magistrate is the head of sub-division while Block Development Officer is the head of Community Development Block. At the tahsil/sub-tahsil level, the Tahsildar/Naib-tahsildar and other officers look after their respective jurisdiction for developmental and regulatory functions.

The following statement indicates the number of villages and towns in each Tahsil/Sub-Tahsil during the decade.

Jurisdictional changes showing number of villages and towns etc. during 2001–2011

Name of district/tahsil/sub-tahsil	Number of villages as per		Number of towns		Remarks
	2001 Census	Census 2011	2001 Census	Census 2011	
1	2	3	4	5	6

Karsog	534	534	-	-	

Zila Parishad and Panchayat Samiti: The three tier system of Panchayati Raj Act with the provision of Zila Parishad, Panchayat Samiti and Gram Panchayat was introduced in Himachal Pradesh from mid nineties with a view to promote development of democratic institutions and to secure greater measure of participation by the people in developmental plans in local and government affairs by

decentralisation of powers and functions. The jurisdiction of Zila Parishad and Panchayat Samitis corresponds to the district and C. D. blocks boundaries, respectively except that of urban bodies which are not covered by them.

A separate ward is demarcated keeping in view of area, population and number of Gram Panchayats under the jurisdiction of each C. D. blocks and district. Reserve wards for ladies, Scheduled Castes or Scheduled Tribes are also carved out according to population and in rotation. The elected members of the Zila Parishad elect its President and Vice President and Chairman of its committee from amongst the elected members by casting ballot vote or voice vote. The term of office of the executive body and the members is five year. The functions of Chief Executive Officer to Zila Parishad have been delegated to Deputy Commissioner of the district by the State Government. The Parishad is also assisted by the various departments and the head of these departments at the district level are officers of class I and II services under the State Government. The Panchayat Samitis have a Chairman and Deputy Chairman elected from amongst elected members at the block level. The Block Development Officer works as Secretary to the Panchayat Samiti. The term of office of the members is five years. The Executive authority for the purpose of carrying out the provisions of the Himachal Pradesh Zila Parishad and Panchayat Samiti Act vests in the Chief Executive officer and Block Development Officers. The Deputy Chief Executive Officer generally in the rank of Additional Deputy Commissioner or Additional District Magistrate works as a Secretary of the general body meetings of the Zila Parishad.

Urban Local Bodies: The statutory urban local bodies are Cantonment Boards, Municipal Councils, Municipal Corporations and Nagar Panchayats. The urban local bodies elect a councilor from each of the wards and his term is five years. The President of the Municipal Council and Nagar Panchayat and the Mayor of the Corporation as also their Deputy are elected from amongst the elected councillors. The Chairmen of various committees are also elected from amongst the elected councillors. Although for day-to-day administration, the Executive Officer is responsible in Municipal Council and Secretary in Nagar Panchayat, he works under the administrative control of the President of Municipal Council or Nagar Panchayat. However, the Sub Divisional Magistrate of the area under whose jurisdiction urban local body falls is the controlling authority of Municipal Council or Nagar Panchayat. In Corporation, an I.A.S. or a senior H.A.S. officer is deputed by the State Government as Municipal Commissioner who is responsible for the day-to-day administration and the executive authority lies with him.

ANALYTICAL NOTE

Analytical Note

(i) Physical Features

Location and size: Himachal Pradesh is situated in the north-west part of India and spreads between 30° 30' and 33° 15' north latitudes and 75° 30' and 79° 0' east longitudes. The entire state of Himachal Pradesh is covered under Himachal Pradesh Himalayas, which is a part of the Northern Mountains situated between Jammu & Kashmir Himalaya and Uttar Pradesh Himalaya. On the basis of homogenetic characteristics, this broad region of the state has further sub-divided into four micro regions viz. Northern Himachal Pradesh covering Chamba, Trans Himalayan Zone covering Lahul & Spiti and Kinnaur, Central Himachal Pradesh covering Kangra, Hamirpur, Una, Mandi and Kullu and Southern Himachal Pradesh covering Bilaspur, Shimla, Solan and Sirmaur districts.

Mandi district falls in the central portion of Central Himachal Pradesh which is one of the four micro regions of the State. It lies between 31° 13' 30" and 32° 04' 22" north latitudes and 76° 36' 08" and 71° 23' 26" east longitudes and is bounded by Kangra district in the north and north-west, Hamirpur and Bilaspur districts in the west, by Solan and Shimla districts in the south and by Kullu district in the east. The district has an area of 3950 km.² out of the total area of 55673 km.² of Himachal Pradesh according to the Surveyor General of India. It occupies seventh rank among the districts in terms of area which constitutes 7.10 per cent area of the state. Mandi district shows high concentration of population having 253 persons per km.². It occupies second rank among the districts with population of 9,99,777 accounting for 15.01 per cent of the total population of the state in Census 2011. The district occupies fourth position in Census 2011 as was in 2001 Census in terms of sex-ratio which has declined from 1,013 to 1,007 females per 1,000 males.

Physiography and Drainage: The configuration of the district is mountainous interspersed with many flat and undulating valleys formed by Beas river and its tributaries. Balh valley in Mandi Sadar and Sundarnagar tahsils and Chauntra valley in Jogindarnagar tahsil are very wide and long which are grainary of the district. The district is criss-crossed by many hill ranges or dhar, prominent of them are Dhauladhar, Ghogardhar, Sikandar dhar and Vairkot dhar which generally run in the district from north-west to south-easterly direction. The altitude of the district varies between 503 metres and 4,034 metres above the mean sea level. Beas and Satluj are the main rivers which pass through the district with several small rivulets/streams as their tributaries. The Beas enters the district from eastern side near Largi village where the Sainj and Tirthan streams join it and flows east to north-west direction. It leaves the district in the west near Sandhol and enters into Kangra district. Uhl, Rana Khad, Luni Khad and Binno Khad join it from north and other rivers/Khads which join it from south are Bakar, Masant, Jhangi, Chaned, Sakrain, Soan, Arnodi, Kasani, Junisuketi, Bakhli, Tirthan, and Hansa. The river Satluj which forms its southern boundary and separates it from Solan and Shimla districts is another major river in the district. River Satluj enters the district near Firmu village in the Chawasigarh area and flows towards southwesterly direction. It leaves the district near Dehar and enters into Bilaspur district. Behna, Ropri, Bagri, Chanod and Alsed etc. are important streams/khads, which fall into Satluj from northern side. Rawalsar, Prashar and Kamrunag are the important natural lakes in the district. On the basis of physiography, climate, soils, natural vegetation and geology the district is divided into four sub-micro regions of (i) Dhauladhar, (ii) Beas Basin, (iii) Satluj Basin and (iv) Mandi Lesser Himalaya.

Dhauladhar extends over north and north-eastern Mandi and runs in continuation to Dhauladhar of Kangra district in north-west to south-east direction passing through north eastern part of Jogindarnagar tahsil, maximum parts of Padhar tahsil except south eastern corner, north-eastern margin of Mandi tahsil and north-western portion of Aut sub-tahsil. The region is very rugged and mountainous with many snow covered peaks of above 4,000 metres high. Uhl is the main river of this region with its

tributaries like Jhakwan, Panchwad, Bubbu Nal, Sang Nal, Baroh Nal and Batheri khad from left side. Beas basin is the biggest sub micro region of the district in terms of area and population. It stretches in a north-west to south-east direction in the central part of district. It covers south-western corner of Padhar tahsil, north-western, western and southern parts of Jogindarnagar tahsil, whole of Lad Bharol, Sandhol, Bali Chowki sub-tahsils and Chachyot tahsil, maximum part of Dharmpur, Kotli and Aut sub-tahsils and Mandi tahsil, northern part of Sundarnagar tahsil, three villages of Nihri sub-tahsil and almost whole of Thunag tahsil except southern portion. It is bounded by Kullu district in the east, Dhauladhar in the north and north-east, Kangra and Hamirpur districts in north-west, Mandi lesser Himalaya in west and Satluj Basin in the south. This basin is hilly with many dhars like Sikandardhar, Margholi dhar, Bhaburi dhar, Rajotu dhar, Chharyand dhar and Shikari Devi dhar etc. except valleys of Balh and Chauntra. Beas river is the principal river of this region. The Satluj basin extends over the southern part of the district covering Sundarnagar tahsil except northern portion, southern Thunag tahsil, whole of Karsog tahsil and Nihri sub-tahsil except a small northern pocket. It is bounded by Beas basin and Mandi Lesser Himalaya in the north, by Bilaspur district in the west and Kullu district in the east. The terrain is rugged and hilly with many dhars with elevation varying between 2,160 metres to 3,124 metres. Satluj river is the life belt of the basin which forms southern boundary of the district and separates it from Shimla and Solan districts. The Mandi Lesser Himalaya spreads over the western part of Mandi district occupying whole of Baldwara sub-tahsil, Bhadrota sub-tahsil and Sarkaghat tahsil, southern part of Dharmpur sub-tahsil, south western part of Kotli sub-tahsil, western part of Mandi tahsil and small central track of Sundarnagar tahsil. It makes its boundary with Beas basin in north and east, Satluj basin in south and Bilaspur and Hamirpur districts in the west. The terrain of this region is rugged and hilly with altitude ranging between 682 metres to 2,051 metres above the mean sea level. The important rivulets of the region are Baker, Sir, Son and Ratti Khads.

Climate: The District being mostly hilly, the climate varies according to the altitude of the place. The district being mountainous, the climate is temperate. In upper areas, the climate remains cold throughout the year. The areas of Padhar, Chohar, Seraj and Sonar usually experience sufficient snowfall during winter which often comes down to 1,300 metres altitudes. In summer, other low areas and Balh valley are quite hot. The Satluj basin experiences excessive hot months near the south-east border. Tatapani and Dehar are the hottest places in the district. The winter starts from the middle of November and continues till the middle of March. Thereafter, the mercury continues rising till the onset of monsoons which starts from the last week of June or first week of July and continues till the middle of September. During October and November, the nights are pleasant and days are a bit hot.

The sub-temperate climatic conditions prevail in Dhauladhar micro sub-region, as it is a mountainous track. Higher reaches of the region receive sufficient snowfall every year during winter and remain cut off from the other parts of the district. The lower areas are comparatively hot. The climatic conditions of the higher reaches of Beas basin are temperate. In winter these areas receive snowfall almost every year where the weather remains cool throughout the year. Lower areas are comparatively hot during the summer. Month of July and August receive heaviest rainfall in this region. The climatic conditions of Satluj basin vary according to altitude. Summers are warm in lower areas and high altitude areas are cooler. In winter, upper areas of Nihri, Thunag and Karsog receive snowfall every year. Rainfall is mostly received during the monsoon months. In Mandi Lesser Himalaya, the climate is mild during winter in upper areas whereas lower altitudes are hot in summer. The district receives an ample and uniformly distributed rainfall.

Statement-A : As per the following Statement, Mandi district had received maximum rainfall of 1495.4 m.m. during the year 2010 followed by 1470.5 m.m. in 2011, from 2007 to 2011 on an average of 1016.8 m.m. per year.

STATEMENT-A
Average Annual Rainfall for Five Years (In mm)

Sl No.	Year	Average Rainfall (millimeters)	
		Himachal Pradesh	Mandi
1	2	3	4
1	2,007	1,000.5	1,169.7

The winds are generally light in the valleys and lower elevations, but at higher elevations winds are stronger. Wind direction at the surface will depend very much on the nature of the terrain. In general, winds are normally to north easterly in the summer season and westerly to south westerly in the rest of the year. During the winter and early part of the spring, the district is affected by a series of westerly disturbances which cause snowfall some times heavy at the higher elevations and rain in lower elevations. Fog occurs in the valley in winter. The majority of the population of the district as well as whole of the state is directly or indirectly dependent on agriculture for their livelihood. The varying topographic and agro-climatic conditions ranging from sub-tropical to cool temperate, permit the cultivation of a wide variety of crops and fruits. The agricultural activities are controlled by nature of terrain, hazards of climate, small and scattered holdings, thickness of soil and limited irrigation. Balh valley is known for producing quality wheat, paddy and vegetable crops where the irrigation facilities are available. In higher elevation, maize, coarse cereals and off spring season vegetable crops are more predominant. The agro climatic conditions of this district are quite suitable for tropical and sub-tropical fruits. The apple orchards

are located predominantly in Karsog, Chachyot and Thunag tahsils. The district has good potential for establishment of small scale and cottage industries based on the forest, minerals and horticulture.

Agriculture: The economy of this district is predominantly agrarian and provides direct and indirect employment to the major chunk of the population. The chief industry of the district is agriculture covering about eighty per cent of the population engaging in it as their occupation while great majority of remainders are more or less dependant on land for a considerable portion of their incomes. The district is however deficient in cereal production. Balh valley of Sundarnagar block and Sandhol areas along the Beas river of Dharmpur block and Jogindarnagar valley are the only major areas in producing cereals in the district which cater to the demand of sizeable population of the district. The main reason for the low agricultural production is the lack of adequate irrigation facilities, uneconomically small land holdings, traditional technique of farming in hilly track, rocky and undulating terrains. Mechanized farming is by and large confined to the Balh valley, however gradually spreading to comfortably leveled holdings. The climate and soil in higher altitude are much suitable for horticulture production. There are two types of soils in the district, i) the sub-mountainous soil of Seraj and Karsog block is high in Organic carbon low in phosphorus and medium in potash & ii) the brown hill soil in the remaining area is medium in nitrogen as well as potash and deficient in available phosphorus. The soil reaction is slightly acidic to neutral and texture in general varies from loam to sandy loam except in low valley areas being heavy textured. The district can be divided into three distinct regions from agricultural points like foothills, mid hills and high hills.

The main cash crops of the district are potato, off season vegetables and ginger. Among the vegetables, cultivation of peas, tomato, brinjal, cauliflower, cabbage, raddish, turnip, spinach, carrot, ladyfinger and cucumber is very popular. Potato is the only surplus agricultural produce in the district, which is exported for seed purposes. There is an agricultural workshop functioning at Bhangrotu where facilities for designing and testing of improved agricultural implements also for service and repair of all types of farm machinery are available. There are four potato development stations and five seed multiplication farms in the district. The research station is being handled by Agriculture University. To meet the seed requirements of the farmers, these farms also serve as demonstration centres for improved farm technology to the cultivators. Seeds of improved variety of farm crops like maize, wheat and paddy are being distributed. Two Mexican varieties of wheat were introduced in the district during the sixties. In order to boost the production of pulses and oil seeds, efforts are being made to popularize the seeds of improved varieties. Soil conservation and water management measures were taken on the large scale to check the soil erosion.

Statement-C: The statement given hereunder reflects that maximum number of agricultural holdings have been recorded as marginal, each of less than 1.00 hect. area during the year 2005-2006, the number of large (having area 10.00 hect. and above) agricultural holdings remained the minimum during this period. There were 1,49,654 holdings of different sizes and types in the district during 2005-2006 covering the total area of 1,28,632 hectares.

STATEMENT -C
Number of Operational Holdings and Area Operated by size class of Holdings during Agriculture Census 2005-06

Year	(In hect.)

Statement-G: Economy of district Mandi is agrarian and role of fertilizer use is very essential to boost up the agricultural yield. It is stated in the following statement that out of the total consumption of fertilizers in this district during 2008-09, Nitrogenous fertilizers form the maximum proportion (69.80 per cent) and minimum share is formed by Potassic fertilizers.

STATEMENT - G
Fertilizer Consumption for 2008-09

(In M.T.)

Mandi	4,538	1,020	943	6,501

Source: Directorate of Agriculture H. P.

Irrigation: Artificial irrigation is entirely from Kuhls or small water courses taking out from the minor streams and hill torrents. There is no irrigation from Beas and very little from Suketi while the beds of their main tributaries are usually too deep in their lower courses to permit of large areas being watered. Irrigation is one of the most important field of development under the agriculture programme to enhance the agriculture productivity. A sizeable part of cultivated area is not having the assured irrigation facilities and the agriculturists have to depend on the vagaries of weather in the district. The construction of Kuhls and undertaking lift irrigation schemes are being carried out under various plans. The lift irrigation has been introduced and shallow wells have been dug by employing German rigs supplied under the Indo-German Agriculture Projects in the valley areas. The gravity irrigation schemes are also being executed making productive use of the stream flow. Sprinkle irrigation was introduced in Balh valley and the system has become popular and extends to lower areas. The tube-wells are also introduced in Balh valley. A more efficient system of irrigation with under ground air-conditioned pressure pipes connected directly with the centrifugal pump and which lift out for irrigation protected with alfa-alfa valves has been introduced. The additional benefit of this arrangement is that it saves the valuable agricultural land and protection from wastage and the saved land meets the cost of construction in about eight years.

Statement-H: As shown in the following statement, out of total irrigated 1,07,852 Hect. Area irrigated by different sources, only 11.69 per cent, 12,608 hect. area is in Mandi district. At the end of year 2008-09, only 12,608 hectares in the district was irrigated. Canal was used as source of irrigation for 480 hect. area, tube wells for 356 hect. area and a meagre area of 95 hect. was irrigated by other wells. While major chunk of 11,677 hect. area was irrigated by the other sources.

STATEMENT - H
Net Irrigated Area by Source for 2008-09

Net Irrigated Area by Source for 2008-09						(in Hectares)

Horticulture: The agro-climatic conditions of Mandi district are quite suitable for tropical and sub-tropical fruits. Apple orchards are located predominantly in Karsog, Chachyot and Thunag. The geographical conditions are favourable for the development of horticulture. The places at higher altitudes produce apple, cherry, plums, apricot and lower areas produce mangoes, litchis, guava and citrus fruits. The area under apple cultivation has been increased from 15,135 hect. to 15,353 hect. from 2007-08 to 2008-09. The area under cultivation of mango increased from 3,807 hect. to 3,997 hect. during the same period. However, the production of different fruits keeps on increasing or decreasing due to weather conditions. The most common delicious varieties of apple grown in the district are royal rich-e-red, red and golden. The plum varieties found in the district are sentaroza and merycoza. The local varieties of apricot are being replaced by more delicious varieties like shakarpara etc. Walnuts are grown all over the district and of late commercial varieties of walnuts have found great favour. Citrus fruits like Kagzi Lemons, Kinnu and Orange are being propagated in the lower areas of Sundarnagar, Mandi, Sarkaghat and Jogindarnagar Tahsils. Unmarketable surplus fruits of the district and adjoining areas are utilized in two canning cum fruit preservation plants at Panarsa and Jarol. Apple juice processing plant at Jarol is proving a boom to the horticulturists in providing ready markets for their surplus apples.

The plant protection centres are located at Mandi with sub-centres at each block headquarters, which render technical guidance to the orchardists and supply pesticides through the agriculture departments. The progeny-cum-demonstration centres for the speedier development of horticulture have been established at Jawar, Madhan, Bhangrotu, Harabag, Adakahar, Jarol, Nals, Pangana, Jhanjeli, Serahan, Narla, Keeas, Pingla and Nagwain. All type of insecticides, fungicides are made available at plant protection centres. The horticulture department is responsible for supplying nursery plants to the orchardists on reasonable rates from the Government and private registered nurseries. An olive station is functioning at Karsog and bee-

keeping centres have assumed an added importance in the apple cultivation which are most essential to rear the cross-pollination. A great amount of awareness has been noticed among the farmers to seek technical guidance from the plant protection centres to iredicate the deseases in their fruit crops or to increase the fruit production.

Statement-K: This statement shows the area put under different fruit cultivation for the years 2007-08 and 2008-09, apple is the most grown fruit followed by mango and K.lime.

STATEMENT-K

Statement-L: In this statement production of different fruits grown in the district for the years 2007-08 and 2008-09 is given, it reflects a drastic decline in the production of apple, mango and litchi in 2008-09 than the yield in 2007-08, and however apple remained the one having the highest production as compared to other fruits grown in the district. Even the production of apricot, almond, walnut, orange/kinnow, lime, pomergranali and malta/mausami also declined during this period, while the production of peach, pear, galgal and kiwi increased slightly.

To expand their agricultural/horticultural activities, the farmers require additional money, to meet their requirement several agricultural and non-agricultural co-operative societies have come into the existence in the district. These societies provide loan to the farmers on their demand.

Statement-M: The following statement is showing the number of primary agricultural co-operative societies, membership number and position of loan etc. in 2007-08 and 2008-09.

STATEMENT-M
Primary Agricultural Credit Co-Operative Societies

Forests: The forests play a major role in the life of the people and in the economy of the district. These provide valuable timber, grazing land for cattle, fuel wood, medicinal herbs and raw materials for the industries. Forests are scattered throughout the district on the higher slopes. The important forests are those lying in the Satluj valley. The main species of deodar occur in large compact blocks. Deodar forests are generally found at an altitude varying from 5,000 to 9,000 feet. The species is at its best in the Damoon forest at an altitude of about 7,000 feet. Chill forests are at an altitude between 950 metres to 2,750 metres. In the lower areas, bamboos and other bush type forests are found in the entire district. Deodar, Chill, Kail, Silver Fir etc. are important species available in the district. The other prominent trees of the region are Simbal, Tuni, Mulberry, Willow, Poplar, Oak, Walnut and Bamboo etc. Quick growing species are being planted in order to meet the increasing demand of timber for further requirements and developments of the integrated forest based industries.

The state government has adopted three-dimensional forest farming to rejuvenate the forests. Under the scheme, the forest department supplies sapling ten paise per sapling of the total forest area, sixty per cent of the forest land should be covered under the commercial species of Chil, Kail, Deodar and fir spruce and remaining forty per cent of the land is to be covered under the species for fodder, fuel wood, poplar and bamboo. The plantation is being encouraged on the Government land by the Panchayats and other government institutions by providing them technical guidance and fencing materials free of cost. The department is maintaining nurseries at important places in the district. The principal marketable forest produces in the lower hill areas of the district are Chil, timber, bamboo, resin and katha.

Statement-O: According to the following report of Forests department of Himachal Pradesh at the end of the year 2007-08, the total area under forests was 1,860 sq.kms. Of which, demarcated protected forests were covering an area of 1,575 sq.kms., only 38 sq.kms. area was identified as undemarcated forests and remaining 247 sq.km. area has been categorized as unclassified forests. The area under different categories of forest referred above remained the same for the year 2008-09 also. It has been

observed that out of the total forest area in the district 84.68 per cent of it is consisted of demarcated protected forests.

Fisheries: Mandi district is extensively criss-crossed by perennial streams and khads which provide congenial conditions for development of fisheries and which has been a pretty old pass time. The revarine fishery falls broadly under two categories of trout water and other waters. Exotic trout fish was introduced in the district from Kullu. These species are found in Uhl, Lambadag and Tirthan. The fisheries resources of the rivers are very rich and Mahasheer fish is found in river Satluj near Dehar and Barbustor, Labeo diplostomus (Gid) Labeo dyochelous (Kuni) and Oreigus Sinuatus (Himalayan Barbel) for the main food fishery are found in both the rivers of Beas and Satluj and their tributaries. A trout hatchery is maintained well stocked at Barot on river Uhl. Pandoh, Mandi, Kunkatar, Sandhol, Dehar, Barot, Puin Bridge, Kamand, Bali Chowki and Mangalore are famous for trout fishing. Efforts are being made to propagate pisci-culture in Pandoh reservoir, which is also suitable for propagation of trout fish. The Sundarnagar barrage has been found suitable for the propagation of mirror carp fish. Training is also imparted in pisci-culture to the interested persons at Mirror carp fish, training centre, Deoli during the month of September in every year.

Statement-P: In the undergiven statement total catch of fish and the value of the production for the state as a whole and for the district in the year 2008-09 is given, which reflects that 9.0 per cent of total fish catch of the state is from this district.

Animal Husbandry: The livestock is the chief wealth next to agriculture to a major segment of population and every household invariably has a few cows or buffaloes, sheep, goats, pigs and ponies in rural areas. The main supplementary means of livelihood of sizeable population in the district is animal husbandry which is helpful to small and marginal farmers for increasing their income. There are various veterinary hospitals, dispensaries, mobile dispensaries and nine other veterinary institutions functioning

in the district besides various artificial insemination centres for cows and buffalos. Artificial insemination is being done by deep fresin technique by the superior gonaplaza of Jarsey breed in cows and by murah breed in buffaloes. It also provide general health cover to animal, prophylactic vaccination against contagious diseases and other allied extension work. The cattle and poultry food are also supplied to the farmers under no profit no loss basis through these institutions. Two jersey cattle breeding farms at Kamand and Karsog have been functioning to supply improved breed animals and two feed and fodder development centres are functioning at Kamand and Sinog. A dairy plant at Chakkar has been set up by the Animal Husbandry Dept. in collaboration with the Indo-German programme, which sells quality milk ghee and table butter. One sheep breeding station for pure merino sheep started at Nagwain to improve the breed of sheep under Indo-German programme is functioning in the district. German merino sheep were kept at the station for the production of pure German merino lambs. These merino lambs were distributed to sheep breeders for bringing improvement in local sheep. Russian merino sheep were introduced in the station later on as they were considered better than German hand merino in wool in both quantitatively and qualitatively. Rabbit rearing is also coming up as major activity in Gohar, Seraj and Sadar blocks of the district and state Government has opened a training centre for rabbit rearing at Nagwain. The Government has also establsihed a hatching centre at Sundarnagar. The main poultry farm was establsihed at Chauntra with four extension centres at Sundarnagar, Padhar, Tikole and Mandi.

Statement-Q: Number of livestock and poultry in 2007 is given in the following statement, which reflects that in total cattles and buffaloes in the state, 18 per cent and 10.72 per cent share, respectively, has been reported in this district.

Industries: The district is predominantly an agricultural tract and is devoid of medium and small scale industries. It is endowed with bountiful resources of hydropower, minerals, forests and cool and dust free climate. All these factors provide favourable conditions for agro-based, forest based, food processing, beverages and electronics industries in the district. The setting up of these industries has also improved avenues of employment to the large number of agriculturists raising their income and standard of living. A start was given to this programme during the five year plans with the objective of utilizing the available raw materials and providing employment and improving the economic condition of people. The training and production centres in various trades had been started in the district as a part of the plan programme. A liberal loan has been advanced at concessional rates of interest for the setting up of new industries and augmentation of the existing units. As a result of this, a number of small-scale industries have sprung up in the district. The department is also providing subsidy to the educated unemployed to

strat their industrial activities. The industrialists are also enjoying the subsidy of freight under writing off share capitals, concessional rates for industrial plots, building construction materials, relief in electricity tariff, installation of generating sets, central sale tax and preference in purchases by the Government. The district has mechanical based industries, forest based, cloth industry, food processing, paper based, processing and repairing, flour mills, chemical based and other types of industries functioning in the district besides a large number of small scale industrial units registered with the industry department. The department runs polytechnic institute at Sundarnagar, which provides full time diploma courses in Civil, Mechanical, Electrical, Automobile Engineering etc. Besides, the Industrial Training Institute at Mandi provides the training of turner, fitter, electrician, draughtsman, surveyor, carpenter, motor mechanic, tailoring, stenography and mechanical refrigeration etc. Besides the industry department, the Khadi and Village Industry Board has provides financial grant to the industrial units for purchasing of raw materials and augmentation of units etc.

STATEMENT-R: The undergiven statement exhibits that at the end of year 2009 the district had as many as 171 registered industries with the capacity of 3565 workers, though the number of these factories rose at a snail's pace from the year 2007 to 2009, as this number in 2007 was 169, 170 in 2008 and 171 in 2009.

STATEMENT-R
Number of Registered Factories and Workers

Tourism: In Himachal Pradesh Tourism is one of the major sources of economy, which provide employment to many persons. The tourism in the state and also in this district is mainly associated with the religion to a far extent, as Himachal and also district Mandi is known as land of Gods, it has several ancient temples of historical importance. Rewalsar, Shikari Devi, Tarna Temple etc. are few to name. Other places of tourist interest in the district are Barot, Pandoh dam, Kamlah fort and Janjehli.

Statement-S: The statement given ahead shows number to registered hotels/ guest houses and tourists visited in 2008 and 2009, which reflects an increasing trend.

STATEMENT-S

Road and Transport: Transport and communication facilities play a vital role in the development of any area. The district occupies an important place from the point of view of transport and communications as National Highway-21 and narrow gauge Pathankot-Jogindarnagar railway line passes through the district. It is well connected with all weather roads with many prominent places and cities. Most of the villages and all the towns are linked with the district and tahsil headquarters by a network of motorable roads. Even the far off villages where it is not possible to construct motorable roads, footpaths and unmetalled roads have been constructed. A fleet of ordinary buses of H.R.T.C. from Mandi,

Sundarnagar and Sarkaghat depots are plying on the road every day. Moreover a numerous private buses are operating within the district.

Statement-T : The statement given hereunder shows number of different vehicles registered in the state and in this district during the year 2009. A total number of 6,933 all kinds of new vehicles were registered in the district during this period, in these vehicles the number of two wheelers like motor cycle/scooter is the highest, followed by the number of private cars.

STATEMENT- T

Trade, Commerce and Banking: The Hindi word ‘Mandi’ is interpreted as market and connected with the Ladakh trade route which passes on to Hoshiarpur through Mandi in the pre-independence period. Mandi, Jogindarnagar and Sundarnagar were the main trading centres in the district prior to independence and this trade and commerce was confined to the local requirements only. Mandi and Sundarnagar remained the wholesale business centres in the district. With the opening of new roads and development of horticulture, the commercial and banking activities have increased manifold. Few more places like Jogindarnagar, Karsog and Sarkaghat have assumed importance with regard to the commercial activities. The main articles of export are agricultural and horticultural products especially off season vegetables and fruits. Mandi is known for the export of rock salt and guns. A dish of sepū bari in this district is very popular and some small scale industries have now cropped up, which are producing ready to cook sepū bari in packets for sale. The important items of import from the neighboring states of Haryana and Punjab are food grains, edible oils, Sugar, Cloth, Kerosene, hosiery goods and utensils etc. The banking services have an important role in economic growth. Banks have replaced the former money lending by Sahukars. There is a wide network of banks in the district, Punjab National Bank is the lead bank, and other banks are H.P. State Co-operative Banks and Land Development Banks. With the opening of various national banks, state co-operative banks etc, trading activities have become much easier. The district has adequate banking facilities; most of the banks are situated at district, tahsil and block headquarters.

STATEMENT-U: In the following statement status of the state and this district regarding the deposits, credits, credit deposit ratio and average population per bank for the year 2009 is given.

STATEMENT -U
Deposit and Advances, Population Per Bank in - 2009

(Rs. in Crores)					
State / District	No. of Banks	Deposites	Credits	Credit Deposit Ratio	Average Population Per Bank
1	2	3	4	5	6
Himachal Pradesh	980	25,086	10,213	40.71	6,202
Mandi	118	2,292	805	35.12	7,638

Source: Quarterly Statistical Book on Banking-2009

Gram Panchayat: There was 473 Gram Panchayats in the district by the end of 2009. Each Gram Panchayat consists of one Gram Pradhan, one Up-Pradhan and five members duly elected by voters of that Gram Panchayat. Number of members varies according to the population of Gram Panchayat.

In view of the provisions of the constitutional 73rd amendment Act and Himachal Pradesh Panchayati Raj Act, 1994, the Panchayati Raj institutions have been devolved functions, powers and responsibilities relating to 15 departments of the State Government. As such Panchayats are involved in large number of civil works viz; construction of school rooms, paths, irrigation and water supply schemes, culverts etc. and lot of funds is being released to the Panchayats for execution of these works. These developmental works are being executed by the Gram Panchayats with very little technical help from the Junior Engineer of the concerned development block who are not able to supervise each work. In addition, the State Govt. has decided that the Gram Panchayats shall prepare micro plans proposing development interventions that reflect the felt needs in their area by way of improving rural connectivity, planning in connection with education, health and veterinary care facilities, drinking water, sanitation etc. It has also been decided that every Gram Sabha shall hold four general meetings in each year on 1st Sunday of January, April, July and October.

Keeping in view manifold increase in the functions of Gram Panchayats, it has been decided to provide them technical assistance by creating a post of Technical Sahayak for every 2 to 3 Panchayats. The technical assistant will be the employee of the Gram Panchayat who will be paid honorarium from the Sabha funds for which Gram Panchayats have been allowed to charge one per cent contingency for the works executed through them pertaining to any scheme.

The functionaries of the Panchayati Raj Institutions have to discharge various administrative, judicial and financial functions. In order to make them aware about their functions, powers and responsibilities, periodical trainings have been imparted to them.

The funds to the Panchayati Raj Institutions are being provided as per the recommendation of 1st state Financial Commission. With a view to strengthen the financial position of the Panchayati Raj Institutions and to raise resources through taxes and levies, the State Government on 1st November, 1999 have empowered the Gram Panchayats to levy taxes and fees at their own level for which maximum rates of such taxes, fees and duties have been notified by the Government under the provision of Section 100 of the Himachal Pradesh Panchayati Raj Act, 1994.

(ii) Census concepts:

Building: A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses: Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutcha houses: Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass,

Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room: A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House : A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village: The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un- surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area: The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns : All places with a municipality, corporation, cantonment board or notified town area committee, etc. are known as statutory towns.

(b) Census towns: All other places satisfying the following three criteria simultaneously are treated as Census Towns:

- i) A minimum population of 5,000;
- ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and
- iii) A density of population of at least 400 persons per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the

data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

Urban Agglomeration: An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc. may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(i) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(ii) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG): The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc. and physically contiguous with the core town of the UA.

City: Towns with population of 100,000 and above are called cities.

Household: A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household: A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes:-

The list of SCs and STs applicable in the State/UT is given hereunder:-

List of Scheduled Castes & Scheduled Tribes in Census 2011

035	Kori, Koli	990	Generic Tribes etc.

Language and Mother tongue: As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is

not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate: A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate: Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level: The highest level of education a person has completed.

Work: Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker: A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker: A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker: A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator: For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like— tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under "other workers".

Agricultural labourer: A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker: Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker: A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate: Percentage of Workers (Main + Marginal) to total population.

Population density: Population density is the number of persons inhabited per square kilometer of the area.

Age: Age is measured in terms of the completed number of years.

Sex Ratio: Number of females per 1,000 males in a population.

(iii) Non-Census Concepts:

Civic status of urban units: Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

Size class of U.A./town: Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population is classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area: The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city : The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population

size of 5 million and above as the cutoff point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 million and above population have been treated as Mega cities and the same criterion of population has been adopted in Census 2011.

Concepts used in VD and TD of DCHB:

1. Educational Amenities:- The type of different educational facilities available in the village is given in numbers. Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

- 1.1 Pre-primary (PP):** Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.
- 1.2 Primary School (P):** Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.
- 1.3 Middle School (M):** Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.
- 1.4 Secondary School (S):** Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.
- 1.5 Senior Secondary School (SS):** Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.
- 1.6 Degree College:** (i) **Arts/Science/Commerce:** These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.
- (ii) **Engineering College (E):** It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii) **Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11 Special School for Disabled: There is Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities:

2.1 Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there are hospitals providing facilities under different systems of medicines such as, Allopathic, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) **Allopathic:** The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) **Ayurveda:** Ayurveda means ‘Science of life’. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements is represented in the form of Tridosha: Vat, Pitta and Kapha. These three ‘doshas’ are physiological entities of living beings. Ayurveda developed into eight distinct specialties, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) **Unani:** Treatment of Unani consists of three components, namely, preventive, primitive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

- (d) **Homoeopathy:** Treatment in Homoeopathy, which is holistic in nature, focuses on an individual's response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.
- 2.2 **Community Health Centre (CHC):** Community Health Centers are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynecology, Surgery and Pediatrics.
- 2.3 **Primary Health Centre (PHC):** A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centers. It has a medical officer and para medical staff.
- 2.4 **Primary Health Sub- Centre (PHS):** A Primary Health Sub-center is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female health worker.
- 2.5 **Maternity and Child Welfare Centre (MCW):** It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counseling, delivery, immunization of children with check-up etc.
- 2.6 **TB Clinic (TBC):** The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.
- 2.7 **Health Centre:** Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.
- 2.8 **Dispensary:** Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.
- 2.9 **Veterinary Hospital:** Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.
- 2.10 **Mobile Health Clinic:** These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counseling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home: A nursing home is a long –term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies., treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as ‘Tap water from treated source’.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as ‘Tap water from un-treated source’.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

1.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube well / Borehole (TW): Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self-explanatory.

4. Community Toilet Complex: Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other

sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes are subjected to decomposition, bio-gas could be produced under favorable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities:

7.1 Post Office (PO): Self-explanatory.

7.2 Sub-Post Office (SPO): Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self-explanatory

7.6 Mobile Phone Coverage: Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighbouring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

- 7.11 Other District Roads (ODR):** These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development headquarters or other main roads.
- 7.12 Village Road:** The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.
- 7.13. Black-Topped (Pucca) Road (BTR):** A road provided with a bituminous surfacing.
- 7.14 Gravel (Kuchha) Road (GR):** A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.
- 7.15 Water Bound Macadam (WBM):** This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.
- 7.16 Foot Path (FP):** A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: - Banking facility means a place where a person can operate a bank account.

- 8.1 Commercial Bank (CB):** These may be banks wholly owned by the Government of India. or by Indian or Foreign Companies.
- 8.2 Cooperative Banks (Coop. B):** A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by persons belonging to the some local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.
- 8.3 Agricultural Credit Society (ACS):** Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.
- 8.4 Non-Agricultural Credit Society (NCS):** These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities:

- 9.1 Self-help Group (SHG):** Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

- 9.2. **Public Distribution System (PDS) shop:** The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.
- 9.3. **Mandis/Regular Market:** These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.
- 9.4. **Weekly *Haat*:** These are those clusters of shops with or without fixed premises which are open once a week.
- 9.5. **Agricultural Marketing Society:** It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.
- 9.6. **Nutrition Centre: Integrated Child Development Services (ICDS):** The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.
- 9.7. **Anganwadi Centre:** Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.
- 9.8. **Accredited Social Health Activist (ASHA):** ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.
- 9.9. **Sports Club/Recreation Centre:** Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.
- 9.10. **Cinema/Video Hall (CV):** If regular cinema houses licensed by Government are available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.
- 9.11. **Public Library:** Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.
- 9.12. **Public Reading Room:** Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.
- 9.13. **Newspaper Supply:** The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.
10. **Availability of Electricity/Power.** If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents

are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use patterns in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage: Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

- (i) **Pit System:** The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.
- (ii) **Flush/pour flush:** A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used).
- (iii) **Service Latrine:** Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under “Others” category.

14. Protected Water Supply- Source and capacity of Storage system: There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for intake screens. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanage is the name to describe a residential institution devoted to the care of orphans – children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a ward of the state, and orphanages are a way of providing for their care and housing.

17. Working women's hostel: These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. Old Age Home: There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. Stadium: A stadium is a place, or venue, for (mostly) outdoor sports, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised.

(iv) Census 2011 findings – Population, its distribution:

(a) Distribution of population in rural-urban areas:

In district Mandi as per Census 2011, total population has been registered as 9,99,777, which is consisted of 4,98,065 males and 5,01,712 females. Out of the total population in the district, 9,37,140 (73.7per cent) is rural population, comprised of 4,66,050 males and 4,71,090 females and remaining 62,637 (6.3per cent) is urban population, consisted of 32015 males and 30,622 females.

In terms of total population at district level Mandi ranks second, while Kangra has highest population in the state. Total population of the district forms 14.56 per cent share of total population of the state. The rural population is distributed in its 17 tahsil/sub-tahsils and urban population resides in total 4 towns of the district. Amongst total 3,338 villages of the district, 2,850 villages are inhabited and remaining 488 are uninhabited. Concentration of population is thicker in the areas having lower elevations and it is comparatively thinner in the higher areas. Tahsil Mandi Sadar has the highest population at tahsil/sub-tahsil level in the state.

(b) Size class and civic status of towns:

The statement given below shows the position and number of urban units in size class for Census 2011 in the district:

Sl.No.	Size Class	Name and civic status of town	Urban population of town
1	2	3	4
1	III	Mandi M.Cl.	26422
2	III	Sundarnagar M.Cl.	24344
3	V	Jogindarnagar N.P.	5335
4	VI	Sarkaghat N.P.	4715
5	VI	Rawalsar N.P.	1821
	Total	5 towns	62637

Population Growth, Density and Sex-ratio

Population Growth: In 2001 Census, total population of the district was recorded as 9,01,344, which has risen to 9,99,777 in Census 2011, resulting in net addition of 98,433 persons during 2001-2011. The decadal growth rate of 10.92 per cent has been noticed during this decade in the district. Sarkaghat tahsil and Sandhol sub-tahsil experienced decrease in population while in remaining tahsil/sub-tahsils, decadal growth rate was positive. Decadal growth rates of population in rural areas remained much higher (11.52 per cent) than this rate in urban areas (2.71 per cent). All the five towns of district have shown positive growth in population. Growth rates in the towns of the district fluctuate between as low as 1.43 per cent in Sundarnagar M.Cl. to as high as 33.02 per cent in Rawalsar N.P. Mandi M.Cl. has recorded a negative growth rate of 1.68 per cent.

Density: According to Census 2011, density of population or the number of persons per sq. km. has turned out as 253 in district Mandi, which is more than double against the state average figure of 123.

Sex-ratio: Sex ratio or the number of females per 1,000 males in the district is 1,007, which is much above the state average of 972 and it is also above the parity line in 7 tahsil/sub-tahsils of the district. Sex ratio at tahsil/sub-tahsils level is highest (1,218) in Lad Bharol and lowest (955) in Bali Chowki. Rural and urban sex ratio in the district are 1,011 and 956, respectively. Sex ratio in urban areas is highest (981) in Mandi M.Cl. and lowest (951) in Rawalsar N.P.

Work participation rate: The work participation rate is defined as percentage of total workers (sum of main workers and marginal workers) to total population. As per Census 2011, 57.3 per cent of the total population in the district is constituted of total workers. Share of main workers and marginal workers in total workers is 28.4 per cent and 28.9 per cent, respectively. Remaining 42.7 per cent population of the district has been categorized as non-workers. While seeing the work participation rate

of male and female population separately, it has been observed that in case of total workers and also in main and marginal workers, it is higher in male population as compared to their female counterparts. While the percentage of non workers is higher in female population than male population in the district. These percentages of main, marginal and non-workers in male and female population has turned out as 37.3, 22.5, 40.3 and 16.9, 35.2, 45.1, respectively.

Literacy: As per Census, a person who can read and write in any language with understanding is defined as literate. All children of age below 7 years are considered illiterates. According to Census 2011 in district Mandi 7,23,747 persons have been reported as literates, constituting 81.5 per cent of the total population excluding 0-6 age-group population. The rate of male and female literacy in the district is 98.6per cent and 73.7per cent, respectively. The literacy rate in male population is higher than rate literacy in female population in district and also in its all tahsil/sub-tahsils. For the district as a whole gender gap in male and female literacy rate is 15.9 points, while at tahsil/sub-tahsils it is highest, 21.76 in Padhar and lowest, 11.75 in Sarkaghat. Gender gap in literacy rate in male and female poputation in rural areas of the district is 16.6 and in urban areas it is 5.08 only.

Scheduled Castes and Scheduled Tribes population, 2011: In this Census Scheduled Castes population in the district is 3,93,739 and Scheduled Tribes population has turned out as 12,787, forms 29.4per cent and 1.3per cent, respectively, proportion of the total population. The share of Scheduled Castes population and Scheduled Tribes population in total population in rural areas is higher than the urban areas of the district, these rates in rural areas are 29.94per cent & 1.32per cent and in urban areas these proportions are 21.01per cent & 0.68per cent only.

Mother Tongue: During 2001 census the district has returned 4,48,273 persons as its total population of which 3,65,275 (81.48 per cent) persons reported their mother tongue as Hindi followed by 75,008 (16.73 per cent) persons as Punjabi. Remaining mother tongues have negligible percentage. Among the rural population of 4,08,849 persons of the district 3,35,254 (81.99 per cent) persons has returned Hindi as their mother tongue and 65,739 (16.07 per cent) persons reported their mother tongue as Punjabi. Out of urban population of 39,424 persons, 30,021 (76.14 per cent) persons returned their mother tongue as Hindi and 9,269 (23.51 per cent) as Punjabi. The data of mother tongue for Census 2011 is yet to be released.

Religion: Out of the total population of 4,48,273 persons of the district during 2001 census 4,12,491 (92.01 per cent) persons have reported their religion as Hindu followed by 23,372 (5.21 per cent) persons as Sikh and 11,632 (2.82 per cent) persons as Muslim. Remaining Buddhist and Christian religions have a negligible representation in the district with 505 (0.11 per cent) and 152 (0.03 per cent) persons respectively. Persons belonged to Jain and the religion other than stated above has also a thin representation in the district with 34 and 61 persons respectively. Similarly 26 persons fall in the category of religion not stated. According to 2011 Census, in total population of 9,99,777 in the district. 9,81,412 (98.16 percent) have stated their religion as Hindu , 9,460 (0.95 percent) Muslims , 4,081 (0.41 percent) are Sikhs , 2,628 (0.26 percent) Budhists while 1,191 (0.12 percent)persons have not stated any religion .Christians are only 876 (0.09 percent) and the district has only 43 persons of Jain religions. 86 persons are from the category of other religion and pursuations.

TABLE 1: This table shows decadal change in population, percentage variation during 2001-2011 and percentage of urban population in total population in Census 2011 for each tahsil/sub-tahsil and for the district as a whole by residence. Except Bhadrota sub-tahsil, where population remained static during 2001-2011, remaining 16 tahsil/sub-tahsils of the district percentage decadal variation in population during 2001-2011, have registered positive variation, which ranges between 8.02per cent in Kotli and 20.34per cent in Sarkaghat, while this rate for the district comes to 11.52per cent. Out of total 17 tahsil/sub-tahsils of the district, 13 are entirely rural, only 4 tahsils, namely Jogindarnagar, Sarkaghat, Mandi and Sundarnagar have urban centers, where urban population growth rate was highest (27.23per cent) in Sarkaghat and lowest (1.49per cent) in Sundarnagar, in Mandi tahsil urban population remained almost static, only one person was added during 2001-2011. In the above four tahsil/sub-tahsils the proportion of urban population in total population was recorded highest (21.86per cent) in Sundarnagar and lowest (6.32per cent) in Jogindarnagar. This proportion at district level was 6.27per cent.

Table 2: Number and percentage of inhabited villages in specified population size ranges with the related population, 2011 (Rural)

TABLE 2: Table 2 shows the number and percentage of villages in specified population size ranges & related population with male and female break up for each C.D. Block. In Mandi district maximum (41.0per cent) share of rural population is formed by villages with population below 200, followed by 39.0per cent share of rural population from villages of population with 200-499. Villages with population between 500-999 forms 16.0per cent share, range of 1,000-1,999 populaion contributes to only 3.0per cent and 14.0per cent population is formed by villages having population range of 2,000-4,999. There is no village in the district having rural population above 5,000.

Table 3: New towns, de-notified, declassified and merged town in 2011 census

(a)	New	
	(i) Statutory town	-
	(ii) Census town	-
(b)	Denotified	
	(i) Statutory towns of 2001 census denotified and also did not satisfy the criteria to be treated as census towns.	-
	(ii) Statutory towns of 2001 census denotified but identified as census towns based on demographic and economic criteria.	-
	(iii) Census towns of 2001 census are notified as statutory town in 2011 census.	-
(c)	Declassified	-
(d)	Wholly merged with other town(s).	-

*Declassified means the census towns of 2011 census which failed to satisfy the demographic and economic criteria.

TABLE 3: Table 3 is about new towns, de-notified, declassified and merged town in Census 2011. In case of Mandi district, no change has been noticed and the number of towns remained 4 as was in 2001 Census.

TABLE 4 : SEX RATIO OF STATE AND DISTRICT, 1901-2011

Census year	Himachal Pradesh			District Mandi		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	884	899	600	908	920	694
1911	889	905	499	924	936	619
1921	890	908	490	933	944	708
1931	897	915	521	917	950	514
1941	890	907	542	907	917	727
1951	912	932	664	917	976	881
1961	938	961	650	994	1,007	805
1971	958	976	749	964	1,000	669
1981	973	989	795	999	1,017	802
1991	976	990	831	1,013	1,025	869
2001	968	989	795	1,013	1,022	894
2011	972	986	853	1,007	1,011	956

Note : Sex ratio has been defined here as the number of females per 1,000 males.

TABLE 4: Table 5 reflects total, rural and urban sex ratio in state as well as in Mandi district as recorded in 1911 Census to Census 2011. Sex ratio in Mandi district has risen from 908 in 1911 Census to 1,007 in Census 2011 while the sex ratio for the state as a whole in these Censuses was recorded as 884 and 972, respectively. Sex ratio in the state was at its lowest (884) in 1911 and it was highest (976) in 1991 Census, at district level lowest (907) sex ratio was noticed in 1941 Census and highest (1,025) in 1991 Census. From 1991 Census onwards sex ratio in this district is 1,000 and above. Sex ratio in this district for each Census from 1911 to 2011 remained higher to the state average figure; this trend remained similar for sex ratio in the rural areas also.

Table 5: Sex ratio by Sub-district, 2011

950 - 999	423	14.84	1,99,955	21.34
1000 - 1099	865	30.35	3,33,338	35.57
1100+	700	24.56	1,61,637	17.25
District: Mandi (027)	2,850	100.00	9,37,140	100.00

Sex ratio District (Rural):1011

TABLE 7: Table 7 displays the number & percentage of villages, total population and percentage share of total rural population in each range of sex ratio as per Census 2011. A very small (0.23per cent) part of rural population sex ratio is less than 700 and 35.57per cent of rural population has sex ratio 1,000-1,099, which is also covering 30.35 per cent inhabited villages of the district. In 24.56per cent inhabited villages of the district, sex ratio is above 1,100, contributing to 17.25per cent of total rural population.

Table 8: Sex ratio of towns, 2011

TABLE 9: Table 9 shows total, rural and urban sex ratio for each tahsil/sub-tahsils of the district in 0-6 age group as per Census 2011. This sex ratio for the district has been recorded as 916 and in rural and urban areas of the district it is 918 and 879, respectively. Child sex ratio or the sex ratio in 0-6 age group at tahsil/sub-tahsil level is fluctuates between 807 in Sarkaghat to 993 in Balichowki, while these values in rural areas of the district is also lowest (817) in Sarkaghat and highest (993) in Balichowki. Total and

rural sex ratio in 0-6 age group in tahsil/sub-tahsils is higher than the district average. Child sex ratio in urban areas of the district is highest (907) in Mandi and Jogindarnagar while lowest (669) in Sarkaghat. Urban child sex ratio in 3 tahsil/sub-tahsils of the district is above the state average, leaving Sarkaghat with a very low child sex ratio.

Table 10: Sex ratio of population in the age group 0-6 for C.D. Blocks, 2011

Sex ratio District (Rural): 918

TABLE 11: Table 11 displays total number & percentage of villages, total population in each range of sex ratio. It also shows the percentage share of total rural population in each range of sex ratio as per Census 2011. Highest share of 25.24per cent rural population comes from 26.67per cent villages of the district having child sex ratio above 1,100, seconded by 16.73per cent rural population of the district spread over 29.37per cent villages with child sex ratio of less than 700 and followed by 15.69per cent rural population distributed in 14.46per cent villages with 1,000-1,099 child sex ratio range. Each of the remaining ranges of sex ratio percentage contribution in total rural population is below 10.00per cent.

Table 12: Sex ratio of population in the age group 0-6 of towns, 2011

Sl.No.	Name of town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

TABLE 13: Table 13 displays population of Scheduled Castes and Scheduled Tribes with rural & urban break up and their percentage to total population at tahsil/sub-tahsil level as recorded in Census 2011. In total population of the district, 29.38 per cent is formed by Scheduled Castes, while Scheduled Tribes population contributes to only 1.28 per cent share. The share of Scheduled Castes population to total population at tahsil/sub-tahsil level is highest (38.15 per cent) in Chachyot followed by 35.21 per cent in Mandi, 34.01 per cent in Sundarnagar and 33.54 per cent in Aut, this share is lowest (17.31 per cent) in Padhar. In case of the share of Scheduled Tribes population in total population, it is observed that it is negligible in many tahsil/sub-tahsils, it is highest (5.83 per cent) in Padhar and 2.18 per cent in Jogindarnagar, in remaining tahsil/sub-tahsils it is below 2.00 per cent. In rural areas the proportion of Scheduled Castes population ranges between 17.31 per cent in Padhar and 38.15 per cent in Chachyot closely followed by 37.65 per cent in Mandi and 37.53 per cent in Sundarnagar, in urban areas this share was maximum (27.97 per cent) in Jogindarnagar and minimum (18.96 per cent) in Mandi. In case of Scheduled Tribes, it is seen that in rural areas it varied between 5.83 per cent in Padhar and (0.01 per cent) in Bali Chowki and it remained highest (1.01 per cent) in Jogindarnagar and lowest (0.17 per cent) in Sarkaghat in the urban areas.

TABLE 14: Table 14 is showing population of Scheduled Castes and Scheduled Tribes and their percentage to total population for each C.D. Block of Mandi district as recorded in Census 2011. In total rural population of the district, 29.94 per cent is formed by scheduled Castes, while Scheduled Tribes population contributes to only 1.32 per cent share. The share of Scheduled Castes population to total population at C.D. Block level is highest (42.92 per cent) in Balh followed by 36.54 per cent in Sundarnagar and 34.83 per cent in Gohar, this share is lowest (18.87 per cent) in Drang. In respect of the share of Scheduled Tribes population in total population, it is highest (4.35 per cent) in Drang and 2.01 per cent in Gopalpur, in 5 C.D. Blocks it is below the district average.

TABLE 17: Table 17 displays population of Scheduled Castes and Scheduled Tribes and their percentage to total population for each town of Mandi district as per Census 2011. In total urban population of the district, 21.01 per cent is formed by Scheduled Castes, while Scheduled Tribes population contributes to only 0.68 per cent share. Amongst the towns, the proportion of Scheduled Castes population to total population is highest (27.97 per cent) in Sundarnagar followed by 23.35 per cent in Sarkaghat and 21.41 per cent in Sundarnagar. In remaining towns, it is 19.14 per cent in Mandi and 16.36 per cent in Rawalsar. In case of the share of Scheduled Tribes population in total population, it is highest (5.22 per cent) in Rawalsar followed by 1.01 per cent in Jogindarnagar, this share in remaining towns is below 1.00 per cent.

Table 18: Sex ratio among Scheduled Castes and Scheduled Tribes (rural) in C.D. Blocks, 2011

Sl.No.	Name of C.D. block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	0030-Chauntra	1,071	1,211
2	0031-Drang	981	1,068
3	0032-Dharmpur	1,038	606
4	0033-Gopalpur	1,011	1,018
5	0034-Sundarnagar	990	935
6	0035-Balh	982	1,026
7	0036-Mandi Sadar	996	965
8	0037-Gohar	1,010	817
9	0038-Seraj	960	1,750
10	0039-Karsog	972	912
Total		996	1,021

TABLE 18: In table 18, sex ratio in Scheduled Castes and Scheduled Tribes population at C.D. Block level in the Mandi district is shown. According to Census 2011 sex ratio in Scheduled Castes and Scheduled Tribes population for the district as a whole has been recorded as 996 and 1,021, respectively. In 5 C.D. Blocks of the district sex ratio in Scheduled Castes population is above the district average and above parity line as well, it is highest (1,071) in Chauntra and lowest (960) in Seraj. In Scheduled Tribes population sex ratio is highest (1,750) in Seraj which is very high to the district average and seconded by 1,211 in Chauntra, in 3 more C.D. Blocks viz. Drang, Balh and Gopalpur it is 1,068, 1,026 and 1018, respectively, which is higher than the district average and is also above the parity line. Sex ratio in Scheduled Tribes population is lowest (606) in Dharmpur.

Table 19: Sex ratio among Scheduled Castes and Scheduled Tribes in towns, 2011

Sl.No.	Name of town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	800104-Jogindarnagar (NP)	1,022	1,077
2	800105-Sarkaghat (NP)	935	1,667
3	800106-Sundarnagar (M Cl)	958	870
4	800107-Mandi (M Cl)	1,000	841
5	800108-Rawalsar (NP)	1,000	696
District (Urban): 027-Mandi		980	853

TABLE 19: Table 19 shows sex ratio, i.e. number of females per 1,000 males in Scheduled Castes and Scheduled Tribes population in each town of Mandi district. As per Census 2011, urban sex ratio in Scheduled Castes and Scheduled Tribes population for the district as a whole has been recorded as 980 and 853, respectively. In 3 towns sex ratio in Scheduled Castes population is above the district average, it is 1,022 in Jogindarnagar and 1,000 each in Mandi & Rawalsar. In remaining towns of the district this rate is 958 in Sundarnagar and 935 in Sarkaghat. While speaking of the sex ratio in Scheduled Tribes population of the towns, it is highest (1,667) in Sakaghat with a distant second of 1,077 in Jogindarnagar and it is lowest (696) in Rawalsar, in remaining towns namely, Sundarnagar and Mandi number of females against 1,000 males in the Scheduled Tribes population has been recorded as 870 and 841, respectively. Among the total 5 towns of the district 3 towns have sex ratio in Scheduled Tribes above the state average and rate is above parity line in 2 towns.

TABLE 20: Table 20 shows number of total, rural and urban literates and percentage of literates by sex at tahsils/sub-tahsil level in the district. As per Census 2011, the literacy rates are worked out by excluding population of 0-6 years. Literacy rates of males are higher than their female counterparts in rural and urban areas of the district. Male literacy rate in the district has been recorded as 89.56 per cent

while this rate for the females comes to 73.66 per cent, reflecting a vast gender gap of 15.9 points. Literacy rates in rural areas for males and females are 89.24 per cent and 72.64 per cent, respectively, showing a very wide gap of 16.6 points. To a little sigh of relief, the gender gap in literacy rates in urban areas has lowered down to 5.08 points with literacy rate of 94.06 per cent for males and 88.98 per cent for females. Similar situation has been observed at tahsil/sub-tahsil level as well, gender gap in literacy rates goes as high as of 21.76 points in Padhar, which is highest in total and rural areas and in urban areas this gap is highest in Jogindarnagar with 9.64 points. At tahsil/sub-tahsil level literacy rates fluctuate between 86.39 per cent in Sarkaghat followed by 84.95 per cent in Baldwara, 84.10 per cent in Mandi & 82.73 per cent in Sundarnagar and 74.37 per cent in Padhar. In rural areas these rates range between 84.95 per cent in Baldwara and 74.37 per cent in Padhar, urban literacy rate in the district are above 85.00 per cent in all tahsil/sub-tahsils with urban population and is highest (93.15 per cent) in Mandi, seconded by 90.95 per cent in Sundarnagar, while these rates in Sarkaghat and Jogindarnagar are 98.29 per cent and 87.86 per cent, respectively. Male literacy rates are above 85.00 per cent in all tahsil/sub-tahsils of the district and vary between 92.52 per cent in Sarkaghat and 85.16 per cent in Padhar, these rates for the females are comparatively lower fluctuating between 80.77 per cent in Sarkaghat and 63.04 per cent in Padhar.

TABLE 21: Table 21 reveals number and percentage of literates and total illiterates with male and female break up and gender gap in male female literacy rates at C.D. Block level in rural areas of the district as per Census 2011. At C.D. Block level literacy rate is highest (85.15 per cent) in Gopalpur, followed by 83.95 per cent in Balh and it is lowest (77.05 per cent) in Drang. Literacy rates of males are higher than their female counterparts in the district as a whole and also in all its C.D. Blocks. Male literacy rate in the district has been recorded as 89.24 per cent and this rate for the females comes to 72.64 per cent, reflecting a huge gender gap of 16.60 points. Literacy rates for the males are above 85.00 per cent in all C.D. Blocks of the district, and this rate is highest (91.72 per cent) in Gopalpur closely seconded by 91.46 per cent in Chauntra and lowest (87.13 per cent) in Karsog. Gender gap in literacy rates at C.D. Block level ranges between 20.64 points in Seraj and 12.75 points in Gopalpur.

District: Mandi(027)	2,850	100.00	9,37,140	100.00
Literacy rate for District:	80.84			

TABLE 22: Table 22 shows the distribution of villages by ranges of literacy rates. There are no literates in 11 villages with a population of 17 and their proportion in total rural population is negligible. In the rural areas of the district, percentage literacy range of 81-90 covers maximum (1,196) number of villages or 41.96 per cent villages which are contributing to 4,74,147 population, forming 50.60 per cent of total rural population. In total rural population 32.48 per cent share is spread over 1,004 villages or 35.23 per cent villages having range of literacy between 71-80 per cent. In 231 villages range of literacy is between 1-10 per cent and it covers 8.98 per cent of total rural population, while 5.16 per cent population is distributed over 222 villages (7.79 per cent) having literacy range of 61-70 per cent. Percentage share of literates in ranges 11-20 & 21-30 per cent is negligible which is distributed in total 4 villages with total 23 literates. Only 4, 22 & 44 villages are having literacy ranges of 31-40, 41-50 & 51-60 per cent; covering respectively, 0.06, 0.07 & 0.46 per cent share of total rural population. The highest 2 ranges of literacy between 91-99 & above 100 per cent is found in 68 & 44 villages respectively forming 2.14 & 0.06 per cent proportion in total rural population.

Table 23: Number of literates and illiterates, literacy rate by sex in towns, 2011

TABLE 23: Table 23 portrays number and percentage of literates and illiterates by sex in each town of the district. Total literacy rate of the urban areas of the district is 91.56 per cent per cent with male literacy of 94.06 per cent and female literates of 88.98 per cent, revealing gender gap of 5.08 points. Mandi Municipal Council has the highest literacy rate of 93.67 per cent with 95.25 per cent male literacy and 92.06 per cent female literacy rate, this town has the lowest gender gap of 3.19 points. The lowest (85.57 per cent) literacy rate has been recorded in Rawalsar Nagar Panchayat with male and female literacy rate of 89.78 per cent and 80.63 per cent, respectively, reflecting the second highest gender gap of 9.15 points, while highest gender gap of 9.64 points has been noticed in Jogindarnagar Nagar Panchayat. Though, in all the towns of the district literacy rates are above 85.00 per cent, but Mandi

Municipal Council is the lone town with this rate is higher to the district average rate. Male literacy rates in Rawalsar Nagar Panchayat is lowest with 89.78 per cent, in remaining 4 towns this rate is above 92.50 per cent, ranging between 95.25 per cent in Mandi Municipal Council seconded by 93.69 per cent in Sundarnagar Municipal Council, in remaining 2 towns viz. Sarkaghat Nagar Panchayat and Jogindarnagar Nagar Panchayat male literacy rates of 92.65 per cent and 92.63 per cent, respectively have been recorded. Female literacy rate in all the towns is lower to the male literacy rates, this rate only in Mandi Municipal Council is higher than the district average. Gap in male-female literacy rate in Sarkaghat Nagar Panchayat is of 7.12 points and 5.60 points in Sudarnagar Municipal Council.

TABLE 24: Table 24 shows number and percentage of literates and illiterates among the Scheduled Castes at C.D. Block level. As per Census 2011 for the district as a whole, the literacy percentage of Scheduled Castes has come to 77.11 per cent, among males 85.65 per cent and females 68.58 per cent are literates and resultant gender gap of 17.07 points in literacy. Gopalpur C.D. Block has recorded the highest literacy rate of 82.29 per cent and is followed by Balh C.D. Block with 80.56 per cent, Chauntra C.D. Block with 79.99 per cent and Dharpur C.D. Block with 79.14 per cent. The lowest (73.04 per cent) literacy among the Scheduled Castes is found in Seraj C.D. Block. In Chauntra C.D. Block male literacy is highest with 89.90 per cent, while Gopalpur C.D. Block has highest female literacy rate of 75.79 per cent. Male literacy is lowest (81.80 per cent) in Karsog C.D. Block and female literacy is lowest (63.32 per cent) in Seraj C.D. Block. Gap in male and female literacy is highest (20.61 points) in Gohar C.D. Block and is followed by Seraj C.D. Block with 19.09 points and this gap is lowest (13.18 points) in Gopalpur C.D. Block.

TABLE 25: Table 25 reflects the distribution of villages by literacy rate ranges for Scheduled Castes population in the district. In 11 villages of district which have Scheduled Castes population of 24 persons, none of them are literates. Literacy range of 100per cent is in 62 villages (3.09per cent) covering 0.11per cent of total Scheduled caste population. The largest number 781 villages (38.95per cent) embracing 48.51per cent population of Scheduled Castesfall in the literacy range of 71-80, while 594 villages (29.63per cent) sharing 32.78per cent of total Scheduled caste population are covered by the literacy range 81-90. In 360 villages (17.96per cent) which cover 15.01per cent total Scheduled caste population falls in the literacy range of 61-70. Range of 51-60 is prevailing in 88 villages (4.39per cent) and covers 1.57per cent of Scheduled caste population, 52 villages (2.59per cent) with 1.36per cent Scheduled caste population comes under literacy range of 91-99. Remaining lower literacy ranges of 1-10 to 41-50per cent literates cover only 57 villages constituting 1.5 per cent of total villages are covering a share of only 0.65per cent Scheduled caste population.

TABLE 27: Table 27 relates to number and percentage of Scheduled Tribes literates and illiterates by sex at C.D. Block level. During Census 2011, the rural literacy rate in Scheduled Tribes has come to 75.46per cent as a whole for the district. Among Scheduled Tribes population excluding age group 0-6 years 83.57per cent males and 67.69per cent females are literates. Gohar C.D. Block has shown highest

literacy rate of 85.04 per cent followed by Gopalpur C.D. Block with 83.29 per cent and the lowest (55.88 per cent) is found in Karsog C.D. Block. Male literacy is highest (100.00 per cent) in Seraj C.D. Block seconded by 95.71 per cent in Gohar C.D. Block, in female literacy Gopalpur C.D. Block ranks first with 78.22 per cent followed by 71.93 per cent in Gohar C.D. Block. This rate in Dharmpur C.D. Block is the lowest with 31.25 per cent, while for males comes to 82.14 per cent, thus reflecting very huge gap of 50.89 points in male-female literacy in this C.D. Block and this gap is lowest of 2.42 points in Karsog C.D. Block.

TABLE 30: Table 30 presents number and percentage of main workers, marginal workers and non-workers by sex in Tahsil/Sub-Tahsils. Out of total population of 9,99,777 in the district 2,84,154 or 28.42 per cent have been classified as main workers, 2,88,517 or 28.86 per cent as marginal workers, in other words 5,72,671 or 57.28 per cent of the total population is are total workers. Remaining 4,27,106 or 42.72 per cent of the population has returned as non workers. Sex-wise analysis of working population shows that among the males 37.27 per cent are main workers and 22.46 per cent are marginal workers while among the females 19.64 per cent are main workers and 35.21 per cent are marginal workers. In male population 40.28 per cent are non-workers and this proportion in females is slightly higher as 45.15 per cent. A glance at the Tahsil/Sub-Tahsil level reveals that proportion of main workers to total population varies between 45.27 per cent in Thunag Tahsil and 13.75 per cent in Dharmpur. In case of males it is highest (49.44 per cent) in Thunag and lowest (20.83 per cent) in Dharmpur. The proportion of female main workers fluctuates between (40.99 per cent) in Thunag and lowest (7.32 per cent) again in Dharmpur.

TABLE 31: Table 31 shows C.D. Blockwise number and percentage of main workers, marginal workers and non-workers in rural population of the district. Out of the total 9,37,140 rural population in the district 28.11 per cent, 30.55 per cent and 41.34 per cent; are main workers, marginal workers and non-workers, respectively. The sex-wise break-up at the district level shows that 36.51 per cent males and 19.80 per cent females in total rural population are in the category of main workers, this proportion for male and female marginal workers accounts for 23.77 per cent and 37.25 per cent, respectively. At C.D.

Block level it is observed that the percentage of female non-workers (42.95) is higher than the male non-workers of 39.72 per cent. The percentage of total workers in the rural areas for the district as a whole comes to 58.66 per cent. At the C.D. Block level, Seraj has the maximum total workers forming 71.32 per cent of the total rural population, followed by Drang C.D. Block with 66.03 per cent, Gohar C.D. Block with 61.16 per cent, 59.54 per cent in Karsog C.D. Block, Mandi Sadar C.D. Block with 59.15 per cent, 58.73 per cent in Balh C.D. Block, 57.43 per cent in Dharmpur C.D. Block, Chauntra C.D. Block with 56.63 per cent and Gopalpur C.D. Block with 56.42 per cent. The lowest percentage (50.88 per cent) of total workers at C.D. Block level is recorded in Sundarnagar C.D. Block. The proportions of male and female workers at C.D. Block level in the district are highest in Seraj C.D. Block with values of 71.77 per cent & 70.85 per cent and lowest in Sundarnagar C.D. Block with figures of 55.15 per cent & 46.52 per cent, respectively.

TABLE 32: Table 32 shows number and percentage of main workers, marginal workers and non-workers by sex in towns. In the district as a whole 33.05 per cent of urban population constitute the main workers. The proportion of male and female main workers is 48.24 per cent and 17.17 per cent, respectively. The marginal workers among the urban population constitute 3.60 per cent of total urban population. Main workers are highest (35.19 per cent) in Mandi Municipal Council, followed by 33.10 per cent in Jogindarnagar Nagar Panchayat, 31.40 per cent in Sundarnagar Municipal Council and 30.63 in Sarkaghat Nagar Panchayat; this percentage is lowest (30.26 per cent) in Rawalsar Nagar Panchayat. Highest percentage of male main workers has been registered again in Mandi Municipal Council with a value of 50.63 per cent and lowest as 44.00 per cent in Rawalsar Nagar Panchayat, this rate for females ranges between 19.46 per cent in Mandi Municipal Council and 13.82 per cent in Sarkaghat Nagar Panchayat. The percentage of marginal workers is maximum (13.00 per cent) in Sarkaghat Nagar Panchayat and minimum (1.20 per cent) in Mandi Municipal Council, among males it fluctuates between (9.12 per cent) in Sarkaghat Nagar Panchayat and 3.25 per cent in Rawalsar Nagar Panchayat. Share of marginal workers in female population in the towns of the district is again highest (17.46 per cent) in Sarkaghat Nagar Panchayat and lowest 1.06 per cent in Mandi Municipal Council. In the district as a whole, 36.65 per cent of total urban population constitutes the total workers including main and marginal workers. The proportion of males and females total workers works out to 51.60 per cent and 21.02 per cent, respectively. The highest (43.63 per cent) proportion of total workers is registered in Sarkaghat Nagar Panchayat and the lowest (34.75 per cent) is seen in Sundarnagar Municipal Council. The

proportion of male total workers varies between 54.36 per cent Sarkaghat Nagar Panchayat and 47.26 per cent Rawalsar Nagar Panchayat. The highest (31.28 per cent) proportion of female workers is recorded in Sarkaghat Nagar Panchayat and lowest (20.52 per cent) is found in Mandi Municipal Council.

Table 33: Distribution of workers by sex in four categories of economic activity in Sub-District, 2011

TABLE 33: Table 33 exhibits the distribution of workers by sex in four categories of economic activities in Tahsil/Sub-Tahsils. The relative importance of main spheres of the economic activity may be gauged from the pattern of distribution of total workers (main plus marginal) into the broad four industrial categories viz. cultivators, agricultural labourers, household industry and other workers. The economic activity of the district is primarily agriculture which is supported by the fact that the cultivators (67.74 per cent) and agricultural labourers (2.76 per cent) together constitute 70.50 per cent of total workers of the district. The agricultural sector has absorbed a major proportion of total workers. The workers engaged in Household industry constitute only 1.25 per cent and workers employed in other economic activities form 28.25 per cent of total workers in the district. The proportion of females as cultivators and agricultural labourers is higher than the males at Tahsil/Sub-Tahsils level and also for the district, while the position in case of male-female workers engaged in remaining two categories of workers in the district is reverse. A glance at the distribution of workers in 4 categories of economic activities at Tahsil/Sub-Tahsil level reveals that the proportions of both cultivators and agricultural labourers differ considerably from one unit to the other. The proportion of cultivators is highest (90.60 per cent) in Bali Chowki followed by 87.80 per cent in Thunag & 86.99 per cent in Nihri and it is lowest (50.18 per cent) in Sandhol. The proportion of agricultural labourers varies between 5.86 per cent in Baldwara and 0.72 per cent in Bhadrola. Such variations within the district might be due to the differences in fertility of soil and resultant cropping patterns. In case of household industry workers, the participation rates at Tahsil/Sub-Tahsil level is highest (2.42 per cent) in Sundarnagar and lowest (0.60 per cent) in Nihri, while workers engaged in the fourth economic activity of other workers, Sundarnagar with 48.15 per cent ranks first and Balichowki with 7.08 per cent stands last.

TABLE 34: Table 34 gives the distribution of rural workers by sex in four categories of economic activity in C.D. Blocks. The relative importance of main economic activity in 10 C.D. Blocks of Mandi district becomes clear from the distribution of total workers into four broad categories of cultivators, agricultural labourers, household industry and other economic activities. The economy of the rural area is primarily dependant on agriculture as supported by the fact that cultivators (70.36 per cent) and agricultural labourers (2.84 per cent) together constitute 73.20 per cent or almost three-fourth of total workers in the rural areas of the district. Remaining 26.80 per cent are engaged in non-agricultural activities. Among these 1.22 per cent are household industry workers and 25.58 per cent are other workers. Proportion of male workers in agricultural sector is higher than their female counterparts; percentage of male and female workers engaged in household industry is almost similar, while the number of males is higher than female workers in the category of other workers. At C.D. Block level, Seraj has recorded the highest (90.77 per cent) proportion of agriculture workers, employing cultivators and agricultural labourers together and is followed by Gohar with 82.50 per cent, Karsog with 81.82 per cent, Drang with 74.80 per cent, Dharmpur with 72.51 per cent, Gopalpur with 72.14 per cent, Mandi Sadar with 67.19 per cent, Sundarnagar with 64.43 per cent, Balh with 64.19 per cent and Chauntra with 60.79 per cent. Because agriculture is main occupation of rural population and only small proportion of workers are engaged in other activities. Proportion of workers in household industry varies between 0.84 per cent in Drang to 2.07 in Sundarnagar. This proportion for other workers is highest (37.95 per cent) in Chauntra and lowest (8.17 per cent) in Seraj.

Table 35: Distribution of workers by sex in four categories of economic activity in Towns, 2011

TABLE 35: Table 35 presents the distribution of total workers by sex in four categories of economic activity for each town of the district. In the urban areas of the district, total workers (main and marginal workers) constitute 36.65 per cent of total population. Among these workers, cultivators constitute 5.03 per cent, agricultural labourers 0.85 per cent, household industry 1.83 per cent, while the proportion of other workers is 92.29 per cent. In the urban areas of the district the percentage of other workers, is much higher than primary activities. The proportion of cultivators varies between 19.88 per cent in Sarkaghat Nagar Panchayat and 0.93 per cent in Mandi Municipal Council. Similarly for other workers the lowest proportion is 75.35 per cent in Sarkaghat Nagar Panchayat while 97.47 per cent is highest in Mandi Municipal Council. The percentage of agricultural labourers and household industry workers is quite low in all towns. Proportion of agricultural labourers is highest (2.17 per cent) in Rawalsar Nagar Panchayat and lowest (0.46 per cent) in Mandi Municipal Council. Share of workers in household

industry varies in towns between 8.22 per cent in Rawalsar Nagar Panchayat and 0.87 per cent in Mandi Municipal Council.

Note:

* Education includes all education facilities.

^ Medical includes all medical facilities.

Post office includes post office, telegraph office and Post and telegraph office.

\$ Transport communication includes bus service, rail facility and navigable waterways.

@ Bank includes Commercial Bank and Cooperative Bank.

** Telephone includes Telephone, PCO and Mobile.

TABLE 36: Table 36 shows the distribution of villages at C.D. Block level according to the availability of different amenities like education, medical, improved drinking water, post offices, telephone, transport, communications, banks, agricultural credit societies, approach by pucca road and power supply. Out of 2,850 inhabited villages in the district, 1,788 or 62.74 per cent villages have been provided with the education facility of one type or the other within the villages. Similarly 616 villages in the district constituting 21.61 per cent have medical facilities of one type or the other. Drinking water facilities and Power Supply are available in all inhabited villages of the district. Postal facilities, which include post office, telegraph office and Post and telegraph office, are available within the village in 529 villages constituting 18.56 per cent of villages. As regards telephone facility (including Telephone, PCO and Mobile, it is available in 2,682 or 94.11 per cent villages. Total 1,696 or 59.51 per cent villages have transport communication facility, which includes bus service, rail facility and navigable waterways. 130 or 4.56 per cent villages are having bank facility (Commercial Bank and Cooperative Bank), 383 or 13.44 per cent have agricultural credit societies. Similarly there are 1247 or 43.75 per cent villages which have been linked with pucca road. The percentage of educational facility available within the villages is highest (77.92 per cent) in Mandi Sadar C.D. Block and lowest (45.12 per cent) is found in Karsog C.D. Block. In case of other amenities, there is not much variation at C.D. Block level.

Table 37: Number and percentage of rural population served by different amenities, 2011

TABLE 37: Table 37 elaborates proportion of rural population served by different amenities. Out of total rural population of 9,37,140 persons in the district, 7,76,333 or 82.84 per cent have the educational facility of one type or the other within the villages. Similarly 3,65,985 or 39.05 per cent enjoy medical facility. Drinking water and Power supply facilities are available to total population of the district. Post office facility is available to 2,99,703 persons or 31.98 per cent. Telephone facility is available to 9,06,709 persons or 96.75 per cent. Transport-Communications facility is available to 7,15,797 persons or 76.38 per cent of the total population. 92,723 persons or 9.89 per cent have been provided with the bank facility. Agricultural credit societies are available to 2,13,009 persons or 22.73 per cent. 5,79,150 persons or 61.8 per cent have approach to pucca road.

Bus includes private and public

TABLE 38: Table 38 presents the distribution of villages not having certain amenities within the villages. The villagers have to go out of their villages to avail these facilities. Such villages have been presented according to various distance ranges in this table. Out of 2,850 inhabited villages 1,134 villages are not having primary school and out of this the children of 1,038 villages have to travel less than 5 Kms., the children of 90 villages have to travel for schooling between 5-10 Kms. and in remaining 6 villages children have to travel distance of more than 10 Kms. to reach the primary schools. As many as 2,043 villages are deprived of middle schools and as many as 2841 of Degree college. Of the 2,043 villages, the children of 1,692 villages have to travel less than 5 Kms, 330 between 5-10 Kms. and remaining 21 above 10 Kms. to avail the facility of middle school. In respect of degree colleges, 160 avail this facility at a distance of less than 5 Kms. 446 between a distance of 5 to 10 Kms. and rest 2,235 villages at a distance of more than 10 Kms.

Out of 2,850 inhabited villages, 2,829 villages are deprived of Hospital facility and 2,798 of Primary Health Centre facility in their villages. 636 villages have the facility of hospital within 5 Kms., while in respect of 406 villages, the habitants have to cover a distance of 5-10 Kms. to avail this facility. Similarly overwhelming number i.e. 1,787 villages have this facility at a distance of 10+ Kms. In case of PHC, it is not available in 2,798 villages, of them 734 avail this facility at a distance of less than 5 Kms., 974 at a distance between 5-10 Kms. and the habitants of remaining 1,090 villages have to travel a distance of more than 10 Kms. to avail this facility.

Regarding Post office, 2,321 villages do not have this facility in the village itself. Of these 1,518 have this facility at a distance of less than 5 Kms. Another 613 villages avail it at a distance of 5-10 Kms. In the remaining 190 villages the habitants have to travel a distance of over 10 Kms. Regarding telephone facilities, there only 168 villages in the district which are without telephone facility. Of these 95 avail this facility at a distance of less than 5 Kms., 36 at a distance of 5-10 Kms. and the remaining 37 have to traverse a distance of 10+ Kms. For bus service, total 1,170 villages do not have this facility, of them 783 avail this facility at a distance of less than 5 Kms., 315 at a distance between 5-10 Kms. and 72 at a distance of 10+ Kms.

In this entire district, 2,755 villages are deprived of Commercial and Co-operative banks. Of these 2,755 villages deprived of commercial banks, 496 avail this facility at a distance of less than 5 Kms., 820 between 5-10 Kms. and the remaining 1,439 at a distance of 10+ Kms. Regarding Cooperative banks, out of 2,755 villages 501 villages avail this facility at a distance of less than 5 Kms. ,

another 874 villages at a distance between 5-10 Kms. and remaining 1,400 at a distance of 10+ Kms. Total 2,467 villages do not have agricultural credit societies. For 724 villages this facility is available at less than 5 Kms. distance, 624 villages avail this facility at a distance of 5-10 Kms. and the remaining 1,119 villages at a distance of 10+ Kms.

TABLE 39: Table deals with the distribution of villages according to the distance from the nearest statutory towns and availability of different amenities. Of the 2,850 inhabited villages, 64 villages have nearest towns upto a distance of 5 Kms. Out of these 52 villages or 81.25 per cent are having the educational facility of one type or the other, 19 villages forming 29.69 per cent have the medical facility within the village, 11 villages forming 17.19 per cent have facility of post office within the village. All of the 64 villages have the facility of telephone, another 52 villages constituting 81.25 per cent have been linked by transport-communications service, 2 villages comprising 3.12 per cent have been provided with bank facilities, 18 villages or 28.12 per cent have agricultural credit societies and 46 villages or 71.88 per cent have been provided with the pucca road.

Total 512 inhabited villages in the district fall in the distance range of 5-15 Kms. from the nearest statutory towns, of them 372 villages comprising 72.66 per cent have been provided with the educational facility, 150 villages comprising 29.30 per cent have been provided with the medical facility, 123 villages constituting 24.02 per cent enjoy the post office facility, 497 villages constituting 97.07 per cent enjoy the telephone facility, 417 villages comprising 81.45 per cent have been linked with transport-communications service, 34 villages comprising 6.64 per cent have bank facility, 114 villages comprising 22.27 per cent are having agricultural credit societies, while 344 villages or 67.19 per cent are approachable by pucca road.

There are 1,535 villages which fall in the distance range of 16-50 Kms. Among them, 983 villages or 64.04 per cent have educational facility, 332 villages or 21.63 per cent have the medical facility, 305 villages or 19.87 per cent have post office facility, 1,477 villages or 96.22 per cent have telephone facility, 970 villages or 63.19 per cent are with transport-communications facility, 76 villages or 4.95 per cent have bank facility, 208 villages or 13.55 per cent have been provided with agricultural credit societies and 693 villages constituting 45.15 per cent have been linked by the pucca road.

Number of villages in the district which are situated beyond 50 Kms. from any statutory town is 739. Of them 381 villages comprising 51.56 per cent have been provided educational facility, 115 villages constituting 15.56 per cent have medical facility, 90 villages comprising 12.18 per cent have post office facility, 644 villages constituting 87.14 per cent have the telephone facility, 257 villages forming 34.78 per cent have been linked by transport-communications services, 18 villages constituting 2.44 per cent have been provided with the facility of bank, 43 villages or 5.82 per cent are having agricultural credit societies and 164 villages or 22.19 per cent have been connected by pucca road.

TABLE 40: Table 40 deals with the distribution of villages by population ranges and amenities available therein. In Mandi district out of total 2,850 inhabited villages 2,301 are in population range of 1-499 persons. Of these, 1,272 have educational facility, 321 have medical facility, 2,301 villages have drinking water facility, 305 have post office, 2,147 have telephone facility, 1,223 have transport facility, 63 have bank facility, 235 have agricultural credit societies, 845 have approach by pucca road and 2,301 have power supply. Out of the remaining 549 villages, 449 fall in the population range of 500-999 persons, of them 417 have educational facility, 218 have medical facility, all the villages have drinking water & power supply facilities, 167 villages have post office facility, 437 have telephone facility, 376 have transport communications facility, 39 villages have bank facility, 111 have agricultural credit societies and 312 have been linked by pucca road. Another 86 villages fall in the population range of 1,000-1,999. Of these, 85 villages have been provided with educational facility, 63 villages have medical facility, all villages have drinking water and power supply facilities, 46 have post office facility, 84 villages enjoy the benefits of both telephone and transport-communications facilities, 21 villages have bank facility, other 28 have agricultural credit societies, 76 villages have been linked by pucca road. Only 14 villages fall in the population range of 2,000-4,999. All these villages have educational, medical, drinking water, telephone, approach by pucca road and power supply facilities. Out of these 14 villages, 11 have post office facility, 13 have the facility of transport-communications, 7 have

bank facilities and 9 have agricultural credit societies. No village falls in the population ranges of 5,000 – 9,999 and 10,000+ persons.

Table 41: Distribution of villages according to land use, 2011

Sl.No.	Name of C.D. Block	Number of inhabited villages	Total area (in Hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	0030-Chauntra	271	22,765	31.72	31.34
2	0031-Drang	276	42,359	20.11	18.13
3	0032-Dharpur	258	25,177	33.55	4.90
4	0033-Gopalpur	300	21,651	42.57	32.78
5	0034-Sundarnagar	243	39,391	23.25	15.12
6	0035-Balh	184	21,700	43.13	26.40
7	0036-Mandi Sadar	308	51,436	22.86	8.06
8	0037-Gohar	235	26,924	24.53	9.55
9	0038-Seraj	252	35,919	19.51	0.88
10	0039-Karsog	523	55,345	22.80	6.58
Total		2,850	3,42,669	26.24	15.09

Note:- Culativable area= irrigated area + unirrigated area

TABLE 41: Table 41 presents C.D. Blockwise distribution of villages according to land use. It also gives details of cultivable area. Cultivable area includes irrigated as well as unirrigated area. It further elaborates the percentage of cultivable area under irrigation. Mandi district with 2,850 inhabited villages has a total area of 3,42,669 hectares according to village papers. Of this, the cultivable area is 26.24 per cent of the total land area and out of this 15.09 per cent of cultivable area is irrigated. The area figures have been collected from the revenue record maintained for each village by the State Government. A look at the land use pattern at the C.D. Block level shows that in Balh block highest proportion (43.13 per cent) of total area has been brought under cultivation followed by Gopalpur block with 42.57 per cent, Dharpur with 33.55 per cent, Chauntra block with 31.72 per cent, Gohar block with 24.53 per cent, Sundarnagar with 23.25 per cent, Mandi Sadar with 22.86 per cent, Karsog with 22.80 per cent, Drang with 20.11 per cent and Seraj with 19.51 per cent. As regards the availability of irrigational facility, its percentage varies between 32.78 per cent in Gopalpur followed by 31.34 per cent in Chauntra and only 0.88 per cent in Seraj.

Table 42: Schools/ colleges per 10,000 population in towns, 2011

Sl. No.	Name of the town	Type of educational institution (Approx. numbers)				
		Primary	Middle	Secondary / matriculation	Senior secondary	College*
1	2	3	4	5	6	7
1	800104-Jogindarnagar (NP)	17	13	11	7	2
2	800105-Sarkaghat (NP)	19	11	11	11	2
3	800106-Sundarnagar (M Cl)	9	6	4	2	-
4	800107-Mandi (M Cl)	6	5	4	4	-
5	800108-Rawalsar (NP)	22	22	11	5	-
District: Mandi (027)		10	7	5	4	1

Note- * College includes Arts/ Science/ Commerce College (Degree Level and above)

TABLE 42: Table 42 shows various types of educational institutions for every 10,000 population in each town of the district. In all the 5 towns of the district, on an average there are 10 Primary schools, 9 Middle schools, 7 Secondary/Matriculation schools, 5 Senior Secondary schools and 1 College. Among the towns of the district the number of Primary schools per 10,000 population is highest (22) in Rawalsar followed by 19 in Sarkaghat, 17 in Jogindarnagar, 9 in Sundarnagar and only 6 in Mandi. The number of Middle schools varies between 22 in Rawalsar and 5 in Mandi, in remaining towns viz. Jogindarnagar, Sarkaghat and Sundarnagar the number of middle schools per 10,000 persons is 14, 11 and 6, respectively. Number of Secondary/matriculation school per 10,000 persons in towns is 11 each in Jogindarnagar, Sarkaghat and Rawalsar, 4 each in Sundarnagar and Mandi. Number of colleges per

10,000 of population in Jogindarnagar and Sarkaghat towns is 2, in remaining towns of the district this proportion is negligible.

Table 43: Number of beds in medical institutions in towns, 2011

Sl. No.	Name of the town	Number of beds in medical institutions per 10,000 population (Approx. numbers)
1	2	3
1	800104-Jogindarnagar (NP)	287
2	800105-Sarkaghat (NP)	235
3	800106-Sundarnagar (M CI)	83
4	800107-Mandi (M CI)	156
5	800108-Rawalsar (NP)	115
District: Mandi (027)		144

TABLE 43: Table 43 exhibits the number of beds per 10,000 population available in the medical institutions of the towns. For the district as a whole, the number of beds in medical institutions per 10,000 population comes to 144. Townwise break-up reveals that this number in Jogindarnagar Nagar Panchayat is highest 287 followed by 253 in Sarkaghat Nagar Panchayat, 156 in Mandi Municipal Council, 115 in Rawalsar Nagar Panchayat and lastly with 83 beds per 10,000 population in Sundarnagar Municipal Council.

Table 44: Proportion of slum population in towns, 2011

Sl.No.	Name of the town having slum	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	800105-Sarkaghat (NP)	4,715	2,241	47.53
2	800106-Sundarnagar (M CI)	24,344	1,590	6.53
3	800108-Rawalsar (NP)	1,821	709	38.93
Total		30,880	4,540	14.70

TABLE 44: Table 44 depicts townwise slum population & percentage of slum population in total population of the respective town. Total urban population of the district has been recorded as 62,637. Slum population has been reported from 3 towns with population of 30,880 of which 14.70 per cent has been categorized as slum population. In 2 towns namely Jogindarnagar Nagar Panchayat and Mandi Municipal Council no slum population has been reported. In remaining 3 towns highest proportion (38.93 per cent) of slum population has been recorded in Rawalsar Nagar Panchayat, followed by 11.79 per cent in Sarkaghat Nagar Panchayat and 8.22 per cent in Sundarnagar Municipal Council.

Table 45: Most important commodity manufactured in towns, 2011

Sl. No.	Name of the town	Name of three most important commodities manufactured
1	2	3
1	800104-Jogindarnagar (NP)	Wooden Furniture, Metal Seet Almira
2	800105-Sarkaghat (NP)	Wooden Furniture, Bakery Product
3	800106-Sundarnagar (M CI)	Shoe, Woollen Cloths, Furniture
4	800107-Mandi (M CI)	Guns, Woollen Garments
5	800108-Rawalsar (NP)	Woolen Shawl, Metal Sheet Material, Wooden Furniture

TABLE 45: Table 45 displays three most important commodities manufactured in each town of the district. Mandi Municipal Council is famous for gun manufacturing woollen garments are also manufactured in this town. Shoes, woollen cloths and furniture is manufactured in Sundarnagar Municipal Council. Sarkaghat is known for the manufacturing of wooden furniture and bakery products. In Jogindarnagar Nagar Panchayat wooden furniture & metal sheet almiras are manufactured and in Rawalsar Nagar Panchayat woollen shawls, metal sheet almira & wooden furniture is being manufactured.

(vii) Major social and cultural events, natural and administrative developments and significant activities during the decade:

Major social and cultural events fair and festivals: The people of the district celebrate various festivals almost round the year. As Hindus constitute the major population of the district, all the Hindu festivals like Dussehra, Diwali, Holi, Baishakhi and Shivratri etc. are celebrated with great pump and show. Some of the important fairs and festivals being celebrated in the district are briefly hereunder:-

Shivratri fair of Mandi: Shivratri fair of Mandi is one of the most colourful State fairs of Himachal Pradesh. This fair is held in the month of Phalguna (February/March) on the Krishna Chaturdashi or the 14th day of waning moon and continues for eight to ten days. According to the legend the Shivratri fair of Mandi was started by Raja Ajber Sen 300-400 years ago at Purani Mandi. There was no other temple of Lord Shiva except that of Trilok Nath built by Raja Ajber Sen. Thereafter, many Shiva temples were built in the town. On the Shivratri day, a colourful procession is taken out. Madhorai, the presiding deity leads the procession followed by the Raja during the state times and by the high dignitaries after independence. This procession is preceded by a party of musicians who play on the traditional musical instruments like Hiran Singha, Karnal, Dhol and Nagara. The gods, goddesses and deities are brought to this place from the various parts of the district to pay their homage to the deity Madhorai. The dancing devotees and other hill folks in their colourful dresses follow the procession. The procession terminates at Padal ground. Various cultural programmes are also held during the nights where parties from various parts of the district and even from outside of the district give their performances.

Mamail fair: The temple of Mamleshwar at Mamail is at a distance of 2 Kms. from Karsog. Vijay Dashmi fair is held there every year on the 11th day of the bright half of the lunar month in Asavina (October). According to the local legend, Lord Parshu Ram placed 80 Shivlingas in various parts of Karsog tahsil and the 81st was the image of Mamleshwar Mahadev which emerged itself from the ground. The temple, it is believed, was constructed by the Pandvas. On the festival day of Vijay Dashmi two decorated palanquins, called 'raths' one of Mahadev Mamail and other of Nag Kajauni which are enshrined in the same temple are taken out to the courtyard with the beat of drums and by playing musical instruments and the deities are worshipped in the traditional manner and thereafter the procession starts with great gusto and the people shower walnuts on the 'raths' as their offerings. Here the deities dance for some time and take rest. The fair is held to commemorate the victory of the Lord Rama over the demon Ravana and attended by the villagers of the surrounding areas. Women and the children are attired in colorful dresses. The people look cheerful, happy and gay. Before the sun sets the deities return to the temple.

Mahunag Fair: Bakhari is a small hamlet in Mahu Panchayat circle about 13 kms. from Churag on Shimla-Karsog road where the temple of Mahunag is situated at a height of about 2,000 metres. A fair is held on a rectangular piece of land surrounded by tall pine trees, about 2 kms. away from the temple, known as Bagra Dhar on the 2nd and 3rd Jaistah (May) every year. According to a legend, one day, a person was ploughing his field in village Shaindal when the poignants knob of his plough struck an image, which came out. The spirit of the god appeared in person and spoke, "I was Raja Karana and now I have assumed the form of Nag. I should be installed in a proper place". So, the idol was taken to village Bhamnala about 2 kms. from Bakhari. But, the God refused to stay there and went to Bakhari. On reaching the village there was lightening and a tree caught fire. The god stayed there and a temple was erected. The fire caused by the lightening was kept alive and still smoulders round the clock, but, it is not known as to when and by whom the temple was constructed. According to another legend, Raja Shyam Sen of Suket was imprisoned by the Mughal emperor of Delhi and while in captivity he prayed to Mahunag who appeared to him in the form of a bee and promised an early release. It is stated that Raja Shyam Sen on his return from Delhi granted a jagir of Rs. 400 to the temple of Mahunag. Mahunag is the popular god of the tahsil Karsog and is worshipped by good number of people in other parts of Mandi, Shimla and Sirmaur districts. The temple is made of stone and wood. In one small apartment anthropomorphic images made of silver and brass sheets representing the deity are fixed on the walls and are worshipped daily in the morning. The people have great faith in Mahunag especially in the cure of

snakebites. It is stated that no one dies of snakebite if Mahunag is invoked. In the fair Nati folk dances are organized in addition to the various other games.

Rawalsar Fair: Rawalsar fair has a great religious importance and is celebrated on the 10th day of every new year according to the Tibetan calendar. Tibetan year starts sometimes in February/March. Rawalsar fair is also known as Tsechu fair which literally means 10th of Dawa Thangpo (1st month). The Buddhists from various parts of the country come to this place to celebrate the birthday of their Guru Padma Sambhav. The festival of Tsechu takes place twice a year known as Chhota Tsechu and Bara Tsechu. The former takes place on Shukla Dashmi of pausa month of the Bikrami era (December/January) whereas the later on the Shukla Dashmi of the month of Phalguna (February/March). The Chhota Tsechu heralds the beginning of the festival season and the degree of pomp and show is on a lesser scale than what is witnessed during Bara Tsechu. The fair starts with a big 'Puja' in the Gompa or Buddhist monastery. The followers of the two sects of Buddhism, Neisrapa and Kandgupa participate in this puja. Hundreds of Lamas sit in meditation on the 7th day or 'Satvin' which continues upto the day of 'puranmashi'. Apart from Padma Sambhava, homages are also paid to other Tibetan deities, the principal of them being Shardur Samdia and Nubnawathay. The flag is also changed and there is a great scramble to collect the pieces of old flag. On the day of Chhota Tsechu only limited number of Lamas participate in the meditation and 1,000 wicks of ghee (butter) are lit up. A Tibetan preparation called Tsog, which is made, by mixing barley, ghee and gur is distributed. The five coloured buntings of cloth printed with Buddhist 'mantras' are hung all along with the belief that the wind which comes in contact with these gets purified which in turn purifies the atmosphere as well. Numbers of folk dances are performed in honour of Padma Sambhava and other Buddhist deities. Besides the above stated main fairs, a number of other fairs are also held in the district. Prashar fair is held near the lake of same name located at a distance of about 40 kms. from Mandi town in the month of June. Kau fair is held in the honour of Kamaksha Devi at Kau village located at a distance of 6 kms. from Karsog in the month of June. Kuthah fair is held in honour of Tangwasi deity at Kuthah village located at a distance of 12 kms. from Thunag in the month of May. Again in the month of May, a fair is held at Bali Chowki in the honour of Markandya Rishi. In the month of July/August, a fair is held in Hurang village in Chuhar valley in the honour of deity Hurang Narain. This fair is known as Narkhan fair and held for three days after every five years. In the month of April, a fair is held in the honour of the deities of Chuhar valley at Jogindarnagar. Various cultural programmes are also organized in these five days fair in which cultural troupes from various parts of the state as well as from other states participate. In addition of the above stated Hindu fairs, an important Buddhist festival is also held in Mandi district. In the month of February/March on the tenth day of bright moon of the first month of every New Year, according to the Tibetan lunar-based calendar, Tseshu or Chheshu festival is celebrated in Rawalsar. The Buddhists from different parts of the country come to Rawalsar to pay their homage to Guru Padma Sambhava. The fair starts with a 'puja' in the gompa, Buddhist monastery. The followers of the two sects of Buddhism, namely Neisrapa and Kandgupa participate in this 'puja' ceremony. Hundreds of Buddhist monks meditate on this occasion and folk dances are performed in the honour of Guru Padma Sambhava. The fairs described in the foregoing accounts are, by and large, religious in nature and held in the honour of gods, goddesses and deities. However, a cattle fair is also held in the month of March at Sundarnagar. This fair is known as Nalwar fair. In this fair traders and farmers, mostly from Kullu and Kangra districts, come to buy and sell bullocks and other cattles. The fair is organized near Lindi Khad. Nalwar fair is known as a very old cattle fair of Mandi district.

(viii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district:

Places of religious, historical and archaeological importance and tourist interest:

Among the notable places of historical, archaeological and religious importance and those of tourist interest in Mandi district, the following need mention:-

Mandi town: This historic town was the capital of the former princely state of Mandi and now it is the district headquarters of Mandi district. Along the banks of river Beas, the town is situated in a somewhat plain valley surrounded by hill ranges at an altitude of about 800 metres. It is considered as the gateway of Kullu and Manali. Mandi town has long been an important commercial centre. It is connected with Shimla, Kullu, Pathankot and Chandigarh and all the tahsils/sub-tahsils of the district by road. Mandi is a fast developing town that still retains much of its original charm and character. Mandi is known for its old stone temples depicting a range of fine carvings. Bhutnath temple is practically synonymous with Mandi. It is located in the heart of the town and is as old as the town itself. In March, the festival of Shivratri is a major event and the Bhutnath temple is its focus. For an entire week, the town celebrates the arrival of hundreds of local deities on elaborately decorated palanquins. The Tarna Devi temple, which is also known as Shamkali temple, is located on Tarna hill, which rises above the town. This temple was built by Raja Shyam Sen in 17th century. Besides these two temples, there are a number of other temples and shrines in the town that have a wealth of classical architecture and ornate sculpture. Many of these are devoted to Lord Shiva, at Triloknath temple he is depicted as the lord of three worlds; at the Panchvaktra he has five faces expressing his five aspects. At the Ardhanarisvara temple, Lord Shiva appears in a composite form with the right half as male and left half as female-symbolising the male and female principles of cosmic evolution. There are several exquisite temples along the college road and the banks of the Beas are lined with many more. At Gyarah Rudra temple, the day the famous 'Amarnath darshan' takes place; the temple is decorated to resemble the Amarnath cave. The other places of interest within Mandi are the Rani Amrit Kaur Park, the district library building and the empress bridge.

Rawalsar: Rawalsar is located at a distance of 24 kms. in south-west from Mandi. This place is sacred for Hindus, Buddhist and Sikhs. Located on a mountain spur at an altitude of about 1,300 metres, Rawalsar presents a variety of natural beauty. It has a dark jewel-like lake, green woodland and high hills. It is said that it was from here that the great Indian teacher and 'tantric', Padma Sambhava left for Tibet. Known to the Tibetans as Guru Rimpoche, the Precious Master, it was under Padma Sambhava's influence that Mahayan Buddhism spread over Tibet. There are islands of floating reed in Rawalsar Lake and the spirit of Padma Sambhava is said to reside in them. It is here that the sage Lomas did penance in devotion to Lord Shiva and the Sikh Guru Govind Singh also resided here for one month. The Chheshu fair held in February/March and the festival of Baisakhi is important event of Rawalsar. At opposite ends of Rawalsar Lake there are two Tibetan monasteries. The Bhutanese also have one Gurudwara at Rawalsar was built in 1930 by Raja Joginder Sen of Mandi. It commemorates Guru Govind Singh's visit, where he sought to evolve a common strategy with the hill rulers against the Mughal emperor Aurangzeb. At Rawalsar there are three Hindu temples. These are dedicated to sage Lomas, to Lord Krishna and to Lord Shiva. Besides Rawalsar lake, there is another famous lake known as Kunhbhi lake located at a distance of about 5 kms. from Rawalsar on Mandi-Dharmpur road. The forest department maintains a small zoo at Rawalsar.

Kamlah Fort: Among the old forts of the erstwhile Mandi state, Kamlah fort is more famous. It is situated in Sarkaghat sub-division at a distance of about 35 kms. from Sarkaghat on the border with Hamirpur. This fort was built in 1625 A.D. by Raja Suraj Sen of Mandi State.

Sundarnagar: This attractive town is located at a distance of 25 kms. from Mandi on Chandigarh-Mandi National Highway No.21. The balancing reservoir of Beas-Satluj link canal is located in this town. Sundarnagar was the state capital of former Suket state and now it is the headquarters of Sundarnagar sub-division of Mandi district. Sundarnagar has now developed as a modern town. It comprises of four small bazars viz., Chatrokhari, Pungh, Purana Bazar and Bhojpur. Besides these, new colony of Beas-Satluj Link Project complex has also emerged which has added to its development. It is believed that Rishi Suk Dev did his meditation at Sundarnagar. The town was named as Suket after this great Rishi and the place where he did meditation is now known as Shuk Dev Vatika. Apart from this, there is a famous temple of Goddess Mahamaya atop a hill. Thousands of devotees visit the temple from far-flung areas to offer their prayers to the goddess. There is also a famous temple of Mahadev located at

a distance of 3 kms. from the town in a village known as Mahadev. Thousands of people visit this temple also to offer their prayers to the Lord Shiva and seek his blessings.

Jogindarnagar: This town is situated at a distance of 56 kms. from Mandi at an altitude of 1,220 metres on Pathankot-Kullu road. In 1925, the enterprising Raja Joginder Sen of Mandi created an elaborate hydel power scheme near the village of Sukrahatti, which was then renamed Jogindarnagar after him. After tunneling and piping the water over several kilometers from the river Uhl to Jogindarnagar, the Shanan power house was built and commissioned in 1932. The second stage of this project was commissioned in the year 1971 in the shape of Bassi Power house. This is the only town in Mandi district connected with Pathankot-Jogindarnagar narrow gauge railway line. A ride in the trolley operated mechanically from Shanan to Wintch camp and then down to Barot via Khooni Ghati and a visit to the electric works and the reservoir of Barot via Haulage way is a thrilling experience. Barot is a very beautiful place and hill resort situated at a distance of 75 kms. from Mandi. A beautiful man-made lake which feeds the Shanan power house and trout fish hatchery are worth seeing places at Barot. Besides this, another place Gumma is situated about 11 kms. away towards Mandi from Jogindarnagar which is known for its salt quarries. Balakrupi is a famous religious place and Karamgarh and Ahju Garh are places of historical importance near Chauntra. Chauntra village nestled in charming surroundings with chil pine forests and snow-clad mountains at a distance of about 9 kms. from Jogindarnagar, is known for the manufacturing of black and green tea.

Pandoh: Pandoh is situated 17 kms. away from Mandi on Mandi-Kullu road. This place came into prominence with the dam, which was constructed over the river Beas and channeling of its water in a very long tunnel for augmenting the discharge of the Satluj for feeding Bhakra Dam by the famous Beas Satluj Link Project. The dam site and its beautiful natural surroundings make Pandoh picturesque.

Tattapani: Tattapani is a famous place for hot water springs. It is situated in Karsog sub-division on the right bank of river Satluj, 50 kms. away from Karsog on Karsog-Shimla road and 56 kms. away from the state capital Shimla. There is a belief that this place was the seat of meditation of a great saint Maharishi Jamdagni, the father of Lord Parshu Ram. The hot water springs of this place were being used for curing gout and rheumatic pains, recently the reservoir made for a hydro power project of Kol Dam has covered under water most of these hot water springs.

Pangana: Pangana was the capital of the former Suket state which was established by Raja Bir Sen during 13th century. The old places are still in existence and there is fine well preserved fort which is now known as Mahamaya Kot having a temple named after Mahamaya Goddess. The village is situated in Karsog sub-division at a distance of 25 kms. from Karsog. The fort and palace present varied interest for the visitors from the archaeological point of view.

Janjehli: It is situated in Thunag tahsil and this place is one of the most picturesque of the Mandi district. The high mountainous and lush deodar trees with dense forests accompanied with sparkling water of Bakhli River adds to the charming beauty of this area. It is a foot hold for trekkers to the Shikari Devi which is 20 kms. away from this place and situated at a height of 11,550 feet from mean sea level. Apart from trekking and resort, Shikari Devi is also a religious place and a seat of Goddess Durga.

Kamru Nag Temple: Kamru Nag temple is a very famous religious place in the Mandi district. It is situated in Chachyot tahsil and connected with motorable road upto Rohanda on the Mandi-Karsog road. Beyond it, one has to walk up to about eight kms. on bridle-path to reach Kamru Nag temple. There is a beautiful lake laid amidst the hills and deodar trees. A wooden temple of Kamru Nag is built on the bank of the lake. Devotees of Kamru Nag throw their offerings in the lake. A large number of devotees gathered here with great enthusiasm, take bath on the first day of Ashad (June) every year.

Barot: It is situated at a distance of 75 kms. from Mandi town at a height of about 1,900 metres above mean sea level. It is a beautiful hill resort and can be approached from Jogindarnagar either by covering a distance of 18 kms. on foot or in a haulage way trolley or by road via Jhattingri. The beautiful man made lake which feeds the Shanan power house and trout fish hatchery are worth seeing. The place is having a rest house, high school, dispensary and a library.

Chauntra: It is a picturesque and lovely village about 9 kms. from Jogindarnagar and sprawls over gentle and fertile hills. The surroundings are charming with snow clad mountains and chil pine forests. The village is known for the manufacture of black and green tea.

Guma: It is situated at a distance of 46 kms. on the Baijnath-Mandi road and is known for its salt quarries. Once it was a separate state, but, during the times of Raja Narayan Sen it was annexed to Mandi. Again the Raja of Kullu captured it during the reign of Raja Suraj Sen, it was again recaptured by Raja Sidh Sen of Mandi.

Karsog: It serves the tahsil and sub-divisional headquarters by the same name. It is situated at a distance of 129 kms. from Mandi. It is also approachable from Shimla via Tattapani. It has a degree college, senior secondary school, civil hospital, rest house and an ancient temple of Lord Shiva.

Aut: It is situated on the Mandi-Kullu road about 32 kms. from Mandi town. It is a small, but, lovely place on the right bank of the Beas. A road to Banjar and Shimla via Jalori pass starts from this place. There is a rest house, police out-post and an ayurvedic dispensary.

Parasar: It is about 32 kms. north-west of Mandi town. It has a lake with a pagoda shaped wooden temple on its edge. This lake contains floating islands. A large fair is also held here in the month of June where wool and blankets are largely sold.

(ix) Major Characteristics of the District, contribution of the district in the form of any historical figure associated with the district:

(a) Major characteristics of the district: The district is endowed with economic resources viz agricultural land growing of cereals, pulses, off season vegetables etc. enriched forest products, various types of roofing slate, salt and ore mines and perennial rivers and streams for generating powers. The Irrigation projects have also been set up for ample supply of water to the fields. The district is well connected with road transport and narrow gauge railway lines. The main agricultural products are wheat, paddy, barley, maize, peas, potato and off season vegetables besides the production of apple, temperate fruits, sub-tropical fruits, nuts and dry fruits and citrus fruits. The famous lakes of Rawalsar, Prasher and Kamru Nag are located in the district. The 'Mandials' are a shrewd and business-minded people. Being situated on the trade route from Tibet to plains in the early period, the people of this district are well awakened. Mandiali is the principal dialect in the district. The staple food of the people is wheat, maize and rice. They have three meals a day; morning meal is locally called kalwar or 'nuhari'. Lunch is called dupehri, whereas dinner or super is called biali. The houses are constructed by using raw materials like soil, rocky stone, local wood, stone coated with cement, slate and tin. Houses are constructed of two or three storeyed. Economically well to do households have started to build the houses by using cement, corrugated sheets and bricks. Special dishes or feast menu differ according to caste, class, status and economic conditions of the households. They celebrate various social and religious fair and festivals. In general, the social and cultural life of the people has been quite pleasant. The district exports guns, which are locally made to the other districts of the state. The milk production is another characteristics of the district. A dairy plant at Chakkar with its five chilling centers at Bhambala, Sidhiani, Kunnu, Kotli and Katanla are functioning in the district. The milk is supplied to the other districts of the state. The excess milk produced is converted into ghee and table butter during the slack season. The first power house in the state on the hydro electric energy was commissioned at Jogindarnagar as Shanan Power House in 1933.

(b) Contribution of the district: This district has given many saints, scholars and preachers. It is believed that the name of Mandi was derived from Mandav Rishi who devoted his time to meditation at Kilsar, a place about one and half kilometre to the east of present Mandi town. Rishi Lomas, Shuk Dev and Prashar also traced their originity from Mandi district. Among the Tibetans, Mandi is known by the name of Zohar and it has an interesting association with the great Buddhist teacher and missionary, Padam Sambhava (AD 750-800), for it was from Zahor or Mandi that he went at the request of the Tibetan King Srongldebtzen to preach the doctorines of Buddhism in Tibet. It is stated that in his Lamaist representations, Padam Sambhava appears in the ancient Mandi garb and the special head dress

worn by him is still called Zohorma in Tibet. Mandi Shivratri Fair is famous for its celebration with international fame. The village deities from various villages of district assemble in this fair. The District has produced the national and international famed players like Shrimati Suman Rawat Mehta, S/Shri Des Raj Sharma and Hem Singh who participated in international competitions and Asiad games and won medals.

(x) Scope of Village Directory and Town Directory:

Village Directory: The Village Directory is one of the traditional compilations of the census and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. It is being compiled for both inhabited and un-inhabited villages. Facilities whether provided by the government or private institutions are presented in the village directory. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 121 columns. The Appendices to village directory and Inset Tables based on village directory data are also prepared and presented for inhabited villages.

Every village whether inhabited or un-inhabited has been assigned a location code number. During 2001 Census permanent location code number (PLCN) were assigned to each village. Under the system of PLCN eight digits number starting from the first village of the first tahsil of the first district of the state ending at the last village of the last tahsil of the last district were assigned to each village. But in Census 2011 PLCN has been replaced by Meta Data and Data Standard (MDDS) system. Under MDDS the location code number, name and area of the village is being given universally in village directory and village PCA. Now the villages of the state of Himachal Pradesh will be starting with R.F.Luj the first village of the first tahsil of the first district of the state which has assigned 006673 six digits number MDDS code and ending with Dhar Chaling Gaarh the last village of last tahsil of the last district of the state with 027373 MDDS code number.

In addition to name of village, location code number, area, total population and number of households the information regarding availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the village directory and in case where the amenities are not available in the village, the distance range code viz; 'a' for <5 Kms, 'b' for 5-10 Kms and 'c' for 10+ Kms of the nearest place where the facility is available has also been provided.

Town Directory: The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. Statement-I contain the information for Status and Growth of the town, Statement –II presents the Physical Aspects and Location, Statement –III gives the information for Civic and other Amenities, Statement-IV Medical Facility, Statement-V narrates Educational, Recreational and Cultural Facilities, Statement-VI depicts the information for Industry and Banking whereas Statement –VII shows Civic and other Amenities in Slums for 2009. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order. The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

VILLAGE AND TOWN DIRECTORY

Brief Note on the Village and Town Directory for the DCHB, Census of India, 2011

Village Directory Census 2011:

The Village Directory is being compiled for both inhabited and un-inhabited villages. In the village directory both private and government facilities/institutions have been given. In case of un-inhabited /depopulated villages, the location code number, name and area of the village is being given universally in Village Directory and Village PCA. The columns relating to the amenities and land use pattern, etc. being left blank and it will be noted against the name of the village that it is un-inhabited/depopulated. The Appendices to Village Directory and Inset Tables based on village Directory data are also prepared for inhabited villages.

In the Village Directory format for Census 2011 there are 121 columns and the details thereon are as follows:

Column 1: Serial Number: Self-explanatory. All the villages within the CD block are presented serially in the ascending order of their location code number.

Column 2: Name of village: Self-explanatory. The name of the villages is shown against this column. This also includes the forest and uninhabited villages.

Column 3: Location Code Number of village: The location code number of the villages is shown against this column.

Column 4: Area of the Village: The area of the villages has been given in hectares.

Column 5: Total Population: The total population of the village as per Census 2011 has been given against this column.

Column 6: Number of Households: The number of households as per Census 2011 has been given in this column.

Amenities: The availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the Village Directory. Wherever the amenities are not available in the village, the distance range code viz; 'a' for <5 Kms, 'b' for 5-10 Kms and 'c' for 10+ Kms of the nearest where facility is available is given. Column wise details are given below:

Columns No. 7 – 20 Educational Facilities: All the different educational facilities available in the village have been given under these columns. Nursery/LKG//UKG classes are included in Pre-Primary Schools, Classes up to class V included in Primary School; Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary School. Classes from XI and XII are included in Senior Secondary School. In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively. The information on the entire educational institutes is given under these columns.

Columns No. 21 to 38 - Medical Facilities: All the different medical facilities available in the village have been given under these columns.

Columns No. 39 to 46 -Drinking Water: The information on availability of various types of the drinking water facility within the village has been given under these columns.

Columns No. 47 to 50 – Availability of Toilet and others: The information on availability of toilet and Bio-Gas etc. available in the village has been given under these columns.

Columns No. 51 to 67 Communication (Post & Telegraph and transport): The information on communication and Post Office, Sub-Post Office, & Telegraph Office, Village PIN Code number, Phone-Landlines, Mobile Phone, Private Courier Facility, Internet Café, etc; available in the village has been given under these columns. The information on all various transport facilities whether public/private transport like Bus, Railway Station, or Navigable waterways, Taxi , Van, Tractors etc. available in the village has also been given under these columns.

Columns No.68 to 79 – Village connected to High ways, Village Roads, Banks and Credit Societies: The information on all roads connected to village has been given under these columns. These include National Highway, State Highway, District Roads and other district roads connected to the village, Pucca roads, Kutchcha Roads, Water Bounded Macadam Roads, Navigable Water Ways and Foot Paths has been given under these columns. Further, the information on availability of banks, ATM and Agricultural Credit societies in the village has been given under these columns.

Columns No. 80 to 96 Miscellaneous Facilities: The information on various miscellaneous facilities available in the village has been given under these columns. These includes Self -Help Group, Public Distribution Shop (PDS), Mandi /Regular Market, Weekly Haat, Agricultural Marketing Society, Nutrition Centre(ICDS),Anganwadi Centre, ASHA, Community Centre, Sports Fields, Sports Club/Recreation Centre, Cinema/Video Halls, Public Library, Public Reading Room, News Paper Supply, Assembly Polling Station, Birth and Death Registration Office.

Columns No. 97 to 100 – Electricity: Availability of Power Supply in the village, whatever may be the form of its use has been given in these columns. These include Electricity for Domestic Use, Electricity for Agriculture Use Electricity for Commercial Use, and Electricity for all purpose Domestic Uses.

Columns No. 101 and 102 -Nearest Town: The name of the nearest town along with the distance range code has been in these columns.

Land use and Irrigation: The land use pattern in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the following 9 categories.

(i)-Column No. 103 -Forests: This includes all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the forest area.

(ii)-Column No. 104- Area under non-agricultural use: This includes all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agriculture.

(iii)-Column No. 105- Barren and un-culturable land: This includes all barren and unculturable land like mountains, deserts, etc. Land which cannot be brought under cultivation except at

an exorbitant cost should be classed as unculturable whether such land is in isolated blocks or within cultivated holdings.

(iv)-Column No. 106- Permanent Pastures and other Grazing Lands: This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

(v)-Column No. 107- Land under Miscellaneous Tree Crops, etc.: This includes all cultivable land which is not included in 'Net area sown' but is put to some agricultural uses. Lands under Causing trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under 'Orchards' are classed under this category.

(vi)-Column No. 108- Culturable Waste Land: This includes lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category at the end of the five years.

(vii)-Column No. 109- Fallow Lands other than Current Fallows: This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

(viii)-Column No. 110- Current Fallows: This represents cropped area, which is kept fallow during the current year. For example, if any seeding area is not cropped against the same year it may be treated as current fallow.

(ix)-Column No. 111- Net Area Sown: This represents the total area sown with crops and orchards. Area sown more than once; in the same year is counted only once.

Column No. 112- Total Irrigated Land Area: It includes all land which is cultivable and irrigated by any source of irrigation. The total irrigated area of the village has been given under this column.

Column No. 113- Total Un-Irrigated land Area: Un-Irrigated area includes all land which is cultivable but not irrigated by any source of irrigation. The total un-irrigated land area of the village has been given under this column.

Column No. 114 to 118 Area Irrigated by source: The area irrigated by various source of irrigation in the village have been given under these columns. The different source of irrigation facilities available in the village are as follows:

(i)-Canals(C)-Govt. or Pvt., (ii)-Wells/Tube-wells (W/TW), (iii)-Tanks/Lake(T/L), (iv)-Waterfall,(WF) and (v)-Others(O).

Columns No.119 to 121-Three most important commodities manufactured: The names of three most important commodities manufactured in the village are indicated in this column.

C.D. Block level totals of the Village Directory: At the end of entries for the Village Directory of each C.D. Block, the totals of different columns are being given wherever possible.

However, in case of some of the columns, it may not be possible to work out the CD Block level totals, in such cases the particular of relevant columns are being left blank against C.D. Block level.

Appendices to Village Directory:—The Village Directory also includes the following appendices:

Appendix –I: Summary showing total number of villages having Educational, Medical and other amenities in villages – C.D. Block level.

Appendix I A: Villages by number of Primary Schools.

Appendix I B: Villages by Primary, Middle and Secondary Schools.

Appendix I C: Villages with different sources of drinking water facilities available.

Appendix II: Villages with 5,000 and above population which do not have one or more amenities available.

Appendix -III: Land utilization data in respect of Census towns.

Appendix -IV: C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix -V: Summary showing number of Villages not having Scheduled Castes population.

Appendix -VI: Summary showing number of Villages not having Scheduled Tribes population.

Appendix -VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix- VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix -VIII: Number of villages under each Gram Panchayat (C.D. block wise).

Note explaining the abbreviations used in Town Directory Census 2011:-

Statement I : Status and Growth History:

Column 1 – Serial Number: Self explanatory

Column 2:- Class, Name and civic status of town; The Class is presented according to population of the towns in Census 2011 as follows:

Population	Class	Population	Class
100,000 and above	I	10,000 – 19,999	IV
50,000 – 99,999	II	5,000 – 9,999	V
20,000 – 49,999	III	Below - 5,000	VI

The following abbreviations are used to denote the Civic Status of the town.

Civic Status	Codes	Civic Status	Codes
i-Municipal Corporation	M.Corp.	xii – Notified Town Area	NTA
ii-Municipal Committee	MC	xiii – Industrial Notified Area	INA
iii-Municipal Council	M Cl	xiv – Industrial Township	ITS
iv-City Municipal Council	CMC	xv – Township	TS
v-Town Municipal Council	TMC	xvi – Town Panchayat	TP
vi- Municipal Board	MB	xvii – Nagar Panchayat	NP
vii –Municipality	M	xviii – Town Committee/ Town Area Committee	TC
viii- Cantonment board/ Cantonment	CB	xix – Small Town Committee	ST
ix- Notified Area	NA	xx – Estate Office	EO
x –Notified Town	NT	xxi –Gram Panchayat	GP
xi - Notified Area Committee/ Notified Area Council	NAC	xxii – Census Town	CT

Column 3 - 25: These columns are self-explanatory

Statement II: Physical Aspects and Location of town, 2009:

Columns 1 - 2 Serial number and Name of town: Self explanatory

Columns 3 to 5 - Physical Aspects: In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Columns 6 to 12: Name and road distance of the town (in kms.) from the State headquarters, District headquarters, Sub-divisional/Taluk/Tahsil/ Police station/Development Block/Island HQ., Nearest city with population of one lakh and more, Nearest city with population of five lakh and more, Railway station and Bus route is recorded in these columns respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Statement III – Civic and other Amenities, 2009:

Column 1 - 2 Serial number and Name of town: Self explanatory

Column 3 – Road length (in km.): The information about the road length (in km.) within the limit of the town is recorded in this column.

Columns 4 to 7- System of drainage: The system of drainage available in the town is indicated in these columns by the following codes:

System of drainage	Codes
Open drains	OD
Closed drains	CD
Both drains	BD

Columns 8 to 11-Number of latrines: The number of various types of latrines available in the town is indicated in these columns.

Columns No. 12 & 13 – Protected water supply: The information on source of water supply and system of water storage with capacity available in the town are given in these columns in the following codes:

Column 12 (Source of water supply):	Tap water	T
Tube-well water	TW	
Tank Water	TK	
Well water	W	

Column 13 (System of water storage):	
Over Head Tank	OHT
Service Reservoir	SR
River Infiltration Gallery	RIG
Bore Well Pumping System	BWP
Pressure Tank	PT

The information on 2 major source of water supply is given in column 12 and the system of water storage with capacity against each in kilo-litres (in bracket) is presented in column 13.

Column 14 Fire Fighting Service: In case the fire fighting service is available in the referent town, 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Columns 15 to 19- Electrification (Number of connections): Different types of electric connections have been shown in these columns, i.e., Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement IV: Medical Facilities, 2009:

Columns 1 - 2 Serial number and Name of town: Self explanatory

Columns 3 to 13 : The number of various medical institutions such as Hospitals, Dispensaries, Health Center, Family Welfare Center, Maternity and Child Welfare Center, Maternity Homes, T.B. Hospital/clinic, Nursing Homes, Charitable Hospital/Nursing Home, Mobile Health Clinic and Others as available in the town, are indicated in these columns (along with number of beds in brackets).

If a medical facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Column 14 - Veterinary Hospital: The Number of Veterinary Hospitals available in the town is given in this column.

Column 15 - Medicine Shop: The number of Medicine shops available in the town is given in this column.

Statement V: Educational, Recreational and Cultural Facilities, 2009:

Columns 1 - 2 Serial number and Name of town: Self explanatory

Columns 3 to 15 Educational Facilities: The information on number of Primary school, Middle school, Secondary school, Senior Secondary school, Arts/Science/ Commerce colleges (of degree level and above), Medical colleges, Engineering colleges, Management Institute/Colleges, Polytechnics, Recognized Shorthand, Typewriting and vocational training Institutions, Non-formal Education Center (Sarva Shiksha Abhiyan Center), Special School for disabled and Others available in the town, are indicated in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Columns 16 to 23 – Number of Social, Recreational and Culture Facilities : The information on No. of Home Orphanage, Working women's hostels (with No. of seats in bracket), No. of Old Age Home, Stadium, Cinema Theatre, Auditorium/Community halls, Public libraries and Reading rooms available in the town are given under these column.

Statement VI: Industry and Banking 2009:

The names of three most important commodities manufactured in the town are given under these columns.

Columns 6 to 8 - Number of banks: The number of banks available in the referent town both

Commercial and Co-operative banks are recorded against these columns.

Columns 9 & 10 – Number of Agricultural and Non Agricultural Credit Societies:_The number of Agricultural and Non Agricultural Credit Societies available in the referent town are given in these columns.

Statement VII: Civic and other Amenities in Slums, 2009:

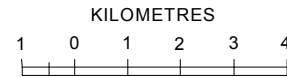

This statement VII provides information on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

SECTION- I VILLAGE DIRECTORY

(a) List of villages merged in towns and outgrowths at Census 2011:

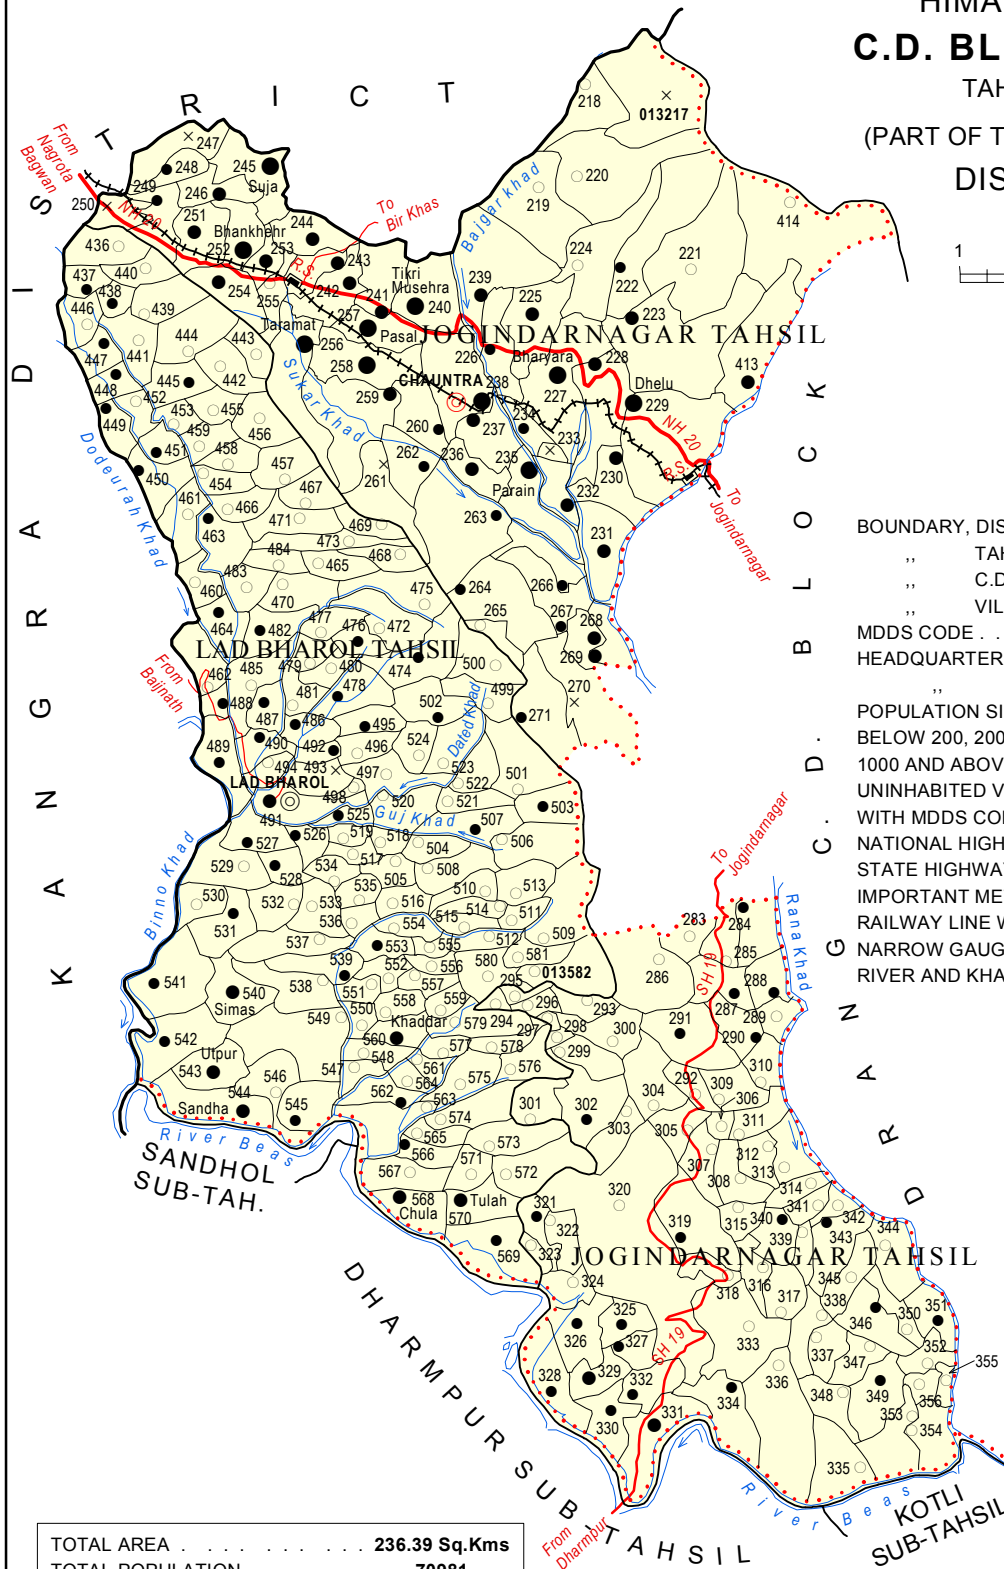

No village has been merged in any of the town in the district during 2001-2011.

Appendices to village directory

Appendix I: Appendix I of the Village Directory exhibits C.D. Blockwise summary of availability of educational, medical, drinking water, post & telegraph, phone, communications, banks, power supply, credit societies, recreations and miscellaneous facilities in the total 2,850 inhabited villages. Out of total 2,850 inhabited villages of the district, 387 villages have pre-primary schools, 1,716 villages have primary schools. In case of middle schools, these are available in 807 villages, 390 villages have secondary and 257 villages have senior secondary schools. There are 7 villages having one degree college each, no village has medical college, while 3 villages each are having engineering college, one has management institute and 2 villages have polytechnic. In all, 6 villages have vocational training school or ITI & 10 villages have Non-formal Training Centres. Of the total inhabited villages, 1,062 villages are such which do not have any type of educational institutions. The highest (287) number of villages without any educational institutions are in Karsog C.D. Block followed by Gopalpur with 117, Chauntra and Gohar with 113 each, Seraj with 87, Sundarnagar with 84 and in remaining C.D. Blocks namely, Dharmpur, Mandi, Drang and Balh this number has been reported as 76, 68, 67 and 50, respectively.

Regarding the medical facilities, among the total 2,850 inhabited villages of the district Primary Health Sub Centre are available in 159 villages, Dispensaries are available in 277 villages, 202 villages have Veterinary Hospitals, 52 villages have Primary Health Centres, Family Welfare Centres are available in 42 villages, 37 villages have Maternity and Child Welfare Centres and 9 villages are having Community Health Centres and in 82 villages have Medical Practitioner (With MBBS Degree) & in 68 villages Medical Practitioner (With other degree) are working. Medicine Shops are available in 127 villages. Allopathic hospitals are available in 12 villages, Hospital-Alternative Medicine are in 11 villages. No Medical Facility is available in 2244 villages of the district, highest (469) number of such villages are in Karsog C.D. Block, followed by Gopalpur with 241, Drang with 218, Chauntra & Mandi Sadar with 216 each, & Dharmpur with 207. In remaining C.D. Blocks viz. Seraj, Gohar, Sundarnagar and Balh C.D. Blocks the number of villages without any medical facility have been registered as 200, 190, 176 and 111, respectively. Though, 3 villages of the district are in the approach of Mobile Health Clinics, 2 villages have T.B. Clinics.

In this district, the most common source of drinking water has turned out handpump which is available in 986 villages, in 328 villages water of wells is used as drinking water, 273 villages use springs, 181 villages use drinking water from Tank/Pond/Lakes, 93 villages from River/Canals and in 363 villages drinking water is obtained from other sources. All villages in the district have one or another source of drinking water.

Amongst total 2,850 inhabited villages in the district 433 have post office, 132 have sub post office & 87 have post and telegraph office. Public call office are available in 807 villages, landline phones in 2,345 villages, mobile phone coverage in 2,529 villages and Internet cafes/ Common service centre exist in 58 villages. In case of connectivity of villages with roads in the district, it is observed that 1,247 villages are connected with pucca road, 1,680 villages have the Bus Service (Public/Private) facility, 40 villages have the facility of railway station, 333 villages have auto/modified autos and in 871 villages facilities of taxi and vans are available. Tractors are used as transport in 698 villages. In case of banking services it is seen that Commercial & Co-operative are available in 130 villages & 31 villages have the facility of ATMs. Credit societies are available in 383 villages. For recreational facility, 4 villages in the district have cinema/video halls and newspaper is available in 327 villages. As far as miscellaneous services are concerned 614 villages have shops under public distribution system (PDS), weekly haats are found in 9 villages, 962 villages have assembly polling stations and 473 villages have Birth & Death Registration Offices. Power supply is available in all villages of the district.

Appendix I-A: Appendix I-A is displaying the villages by number of primary schools at C.D. Block level in the district. Out of the total 2,850 inhabited, in 1,134 villages of the district there is no primary school, one primary school each is available in 1,402 villages 2 primary schools each are available in 266 villages of the district, 39 villages each are having 3 primary schools. There are 9 such villages where more than 4 primary schools in each village are available. A glance at the distribution of villages at C.D. Block level, each having one primary schools reveals that this number is highest (196) in Karsog, followed by 193 in Mandi Sadar, 158 in Gopalpur and lowest (93) in Gohar, in remaining C.D. Blocks the number of such villages is between 158 in Chauntra and 100 in Sundarnagar.

Appendix I-B: Appendix I-B is showing C.D. Blockwise villages by number of primary, middle and secondary schools available in each village. Out of the total 2,850 inhabited village in this district, there are 1,122 villages which are without primary, middle and secondary school. A glance at the distribution of such villages at C.D. Block level shows that highest (291) number of such villages fall in Karsog, followed by 128 in Gopalpur, 119 in Chauntra, 118 in Gohar, 88 in Seraj, 87 in Sundarnagar, 81 in Dharmpur, 80 in Drang, 77 in Mandi Sadar and 53 in Balh. There are 920 villages which have at least 1 primary and no middle school in each village, of which 145 villages fall in Karsog C.D. Block, 117 in Madi Sadar and 112 in Drang, in remaining C.D. Blocks number of such villages fluctuates between 61 in Gohar to 92 in Gopalpur. At least one primary school and one middle school are in 796 villages of the district, of which highest (114) number of villages are in Mandi Sadar C.D. Block and lowest (56) in Gohar C.D. Block, in remaining C.D. Blocks this proportion ranges between 68 in Chauntra to 85 in Karsog. The number of villages with one middle school and one secondary school is 385 villages of the district, of which maximum (50) are in Dharmpur C.D. Block seconded by 48 in Mandi Sadar C.D. Block and least (32) number of such villages are in Gohar C.D. Block, C.D. Blocks their number vary between 33 each in Drang & Karsog and 41 in Chauntra C.D. Block.

Appendix I-C: Appendix I-C is portraying the number of villages with different sources of drinking water facilities available at C.D Block level. In district as a whole, there are 1,754 villages where source of drinking water is only tap (Treated/Untreated). At C.D. Block level such villages is highest (480) in Karsog and lowest (56) in Balh, in remaining C.D. Blocks the number of such villages fluctuates between 72 in Dharmpur to 209 in Drang. There is no village in the district where only tubewell/borewell or handpump is used as source of drinking water. Number of villages with more than one source (tap, well, tubewell, hand pump) of drinking water in the district is 1,096 of which highest (244) are in Gopalpur C.D. Block, seconded by Dharmpur with 186. Number of such villages in remaining C.D. Blocks, namely Balh, Mandi Sadar, Sundarnagar, Chauntra, Drang, Gohar, Karsog and Seraj is 128, 114, 110, 108, 67, 61, 43 and 35 respectively.

Appendix II: Appendix II deals with the villages having 5,000 & above population which do not have one or more amenities in the district. In this district there is no village with population of 5000 and above, therefore the data has not been compiled.

Appendix III: Appendix III of the Village Directory deals with the land utilization data of Census Towns, as there is no census town in the district during Census 2011; therefore the data has not been compiled.

Appendix IV: Appendix IV of the Village Directory gives C.D. block wise list of inhabited villages where no amenity other than drinking water facility is available. In the entire district there is no such village which is having only drinking water facility.

Appendix V: Appendix V of the Village Directory shows C.D. Blockwise gives the list of number of villages not having Scheduled Castes population. Out of 3,338 villages in the district, 488 villages are uninhabited and remaining 2,850 villages are inhabited. Among the 2,850 inhabited villages, 845 villages do not have any Scheduled Castes population. Karsog C.D. Block has the largest (175) number of villages without any Scheduled Castes population, 118 in Drang C.D. Block and 110 in Chauntra C.D. Block, while in other C.D. Blocks the number of villages without Scheduled Castes population is below 100 which varies between 98 in Gohar C.D. Block and 16 in Balh C.D. Block.

Appendix VI: Appendix VI shows number of villages not having Scheduled Tribes population. In 2,850 inhabited villages there are 2,509 villages which are not having any Scheduled Tribes Population. The largest (484) number of villages without any Scheduled Castes population are in Karsog C.D. Block seconded by 258 villages in Gopalpur C.D. Block and least (139) number of such villages are in Balh C.D. Block. In remaining C.D. Blocks number of such villages is fluctuating between 215 in Sundarnagar and 258 in Gopalpur.

Appendix VII-A: Appendix VII-A depicts the list of villages in each C.D Block according to the proportion of the Scheduled Castes to the total population by percentage ranges as recorded in Census 2011. These percentage ranges are as nil, less than 5, 5-10, 11-20, 21-30, 31-40, 41-50, 51-75 and 76 and above to total population of villages.

Appendix VII-B: Appendix VII-B exhibits the list of villages according to the proportion of Scheduled Tribes to total population by percentage ranges in the villages where Scheduled Tribes population has been recorded in Census 2011, such as nil, less than 5, 5-10, 11-20, 21-30, 31-40, 41-50, 51-75 and 76 and above to total population of villages.

Appendix VIII: Appendix VIII shows the list of villages under each. This appendix could not be generated because in Himachal Pradesh a few villages fall in more than one Gram Panchayat.

TOWN DIRECTORY

A brief analysis of Statements of the Town Directory

Statement I to VII of the Town Directory deals with the various aspects of socio economic status of the urban areas in the district. The statement-wise discussion is given hereunder:

Statement-I: Statement I deals with the status and growth history of the towns in the district. Mandi and Sundarnagar were declared urban areas in 1901 Census, but in 1911 Census Sundarnagar was no more an urban area, though it once again was declared an urban area in 1921 Census. Mandi town experienced highest increase of 46.3 per cent during 1951-1961 Censuses, its population declined from 26,873 in 2001 Census to 26,422 in Census 2011, showing negative growth rate of 1.7per cent. Mandi Municipal Council has an area of 4.3 Sq. Kms. with a density of population as 6,202, while sex ratio comes as 981 in Census 2011 showing an increase over 891 in 2001 Census. Sundarnagar town experienced quite high growth rate of 204.8per cent during 1941-1951 Censuses and this increase rose to a whopping high of 268.4per cent during 1961-1971 Censuses which was the result of in migration of many skilled/unskilled workers engaged in the up coming BSL Project of that period. During 2001-Census 2011es this town experienced very low growth rate of only 1.5 per cent as the population has risen from 23,986 in 2001 Census to 24,344 in Census 2011. In the present Census this is the largest town in the district with an area of 12.33 Sq. Kms. and has density of population as 1974 and sex ratio of 954 which has seen a gradual increase since 1991 Census. Jogindarnagar Town has been notified for the first time in 1931 Census with a population of 5,963 persons. The population of Jogindarnagar (N.P.) was 5,048 persons in 2001 census which rose to 5,335 persons in 2011, showing the growth of 5.7 per cent. The town witnessed negative growth rate during 1941-1951 and 1981-1991 Censuses. The density of population comes to 1,241 persons per Sq. Km. The town is spread over in an area of 4.3 Sq. Kms. The sex ratio or the number of females per 1,000 males in the town was 919 during 1991 which declined to 896 at 2001 Census, it has risen to 971 in Census 2011. Being the smaller & younger towns in the district, Sarkaghat & Rawalsar towns came in to existence in 1991 Census. Sarkaghat had a population of 3,093 in 1991 Census, it increased to 3,706 in 2001 Census and 4,715 in Census 2011, experiencing a growth rate of 19.8per cent & 27.2 per cent in 1991-2001 & 2001-Census 2011, respectively. Sarkaghat has an area of 3 Sq. Kms., as per Census 2011 density of population in this town has been recorded as 870, in the previous Census it was 982. In Rawalsar Nagar Panchayat population has been recorded as 1045, 1369 & 1821 in 1991, 2001 & Census 2011es, respectively. The town experienced 31per cent growth rate during 1991-2001 Censuses and 33per cent during 2001-Census 2011es. Sex ratio in the present Census has turned up as 851 against this figure as 838 in 2001 Census.

Statement-II: Statement II exhibits the physical aspects and location of towns as in 2009. Jogindarnagar N.P. is connected with the bus route and is 214 Kms. away from Shimla the state headquarters and 56 Kms. away from the district headquarters of Mandi. The town is having tahsil as well as sub-division headquarters. The railway station is also situated within the town. The nearest city for the town with a population of one lakh and more is Shimla Pathankot in Punjab state at the distance of 153 Kms. and nearest city to the town with five lakhs and above population is Chandigarh at a distance of 256 Kms. The town experienced 1500 mm. rainfall during the year 2009 with maximum temperature of 36.6 Centigrade and minimum temperature of 0.4 Centigrade.

Sarkaghat N.P. is situated at a distance of 188 Kms. from the state headquarters Shimla and 64 Kms. away from the district headquarters Mandi. The sub-divisional and tahsil headquarters are located at Sarkaghat town itself. The nearest city with a population of one lakh and more is Shimla at a distance of 188 Kms. and nearest city to the town with five lakhs and above population is Chandigarh at a distance of 185 Kms. and the nearest railway station is Jogindarnagar at a distance of 60 Kms. The town has bus service route. Sarkaghat town experienced annual rainfall of 723 mm during the year 2009 with maximum temperature of 42 Centigrade and minimum temperature of 10 Centigrade.

Sundarnagar M.Cl. is situated at a distance of 132 Kms. from Shimla the state headquarters and 25 Kms. from Mandi the district headquarters. Both tahsil and sub-divisional headquarters are situated within the town. The nearest town with population above one lakh is Shimla at a distance of 132 Kms. and nearest city to the town with five lakhs and above population is Chandigarh at a distance of 176 Kms. The nearest railway station is Jogindarnagar which is 76 Kms. from the town. The town has bus service route and navigable canal in itself. Sundarnagar experienced annual rainfall of 1012.2 mm. with highest temperature of 31 Centigrade and lowest temperature of 1 Centigrade in the year 2009.

Mandi M.Cl. is situated at a distance of 158 Kms. from the state headquarters Shimla. Mandi town itself is tahsil as well as district headquarters. The nearest railway station for Mandi is at Jogindarnagar at a distance of 56 Kms. The town is provided with the bus service. The nearest city for the town with a population of one lakh and more is Shimla at a distance of 158 Kms. and nearest city to the town with five lakhs and above population is Chandigarh at a distance of 200 Kms. The navigable river is available in the town itself. Mandi town experienced annual rainfall of 775 mm. with maximum temperature of 38 Centigrade and minimum temperature of 1.1 Centigrade.

Rawalsar N.P. is situated at a distance of 175 Kms. from the state headquarters Shimla and 24 Kms. from district headquarter Mandi. The sub-divisional headquarters is at Mandi. The nearest city with a population of one lakh and more is Shimla at a distance of 175 Kms. and nearest city to the town with five lakhs and above population is Chandigarh at a distance of 207 Kms. The nearest railway station is Jogindarnagar, at a distance of 80 Kms. The town is linked with the bus service. The town experienced annual rainfall of 702 mm. with maximum temperature of 38 Centigrade and minimum temperature of 5 centigrade in the year 2009.

Statement-III: Statement III deals with civic and other amenities available in 2009. Jogindarnagar Nagar Panchayat has a road length of 23.1 Kms. The sewerage system in the town is open and both open & closed surface drains. There are 325 water borne latrines. There is no fire fighting service in the town, for this service depends upon Palampur which is at a distance of 40 Kms. from Jogindarnagar. The town has 2,628 domestic, 48 industrial, 748 commercial and 130 road lighting points and 8 other connections.

Sarkaghat town has a road length of 7.4 Kms. The system of sewerage is open surface drains. There are 1,582 latrines all water borne. For fire fighting service the town depends upon Sundarnagar which is 55 Kms. away. The town has 1,724 domestic, 227 industrial, 651 commercial and 650 road lighting points.

Sundarnagar town has a road length of 73.7 Kms. There are 5,926 latrines all water borne. The town has a fire fighting service of its own. There are 13,839 domestic, 320 industrial, 2,013 commercial and 1,244 road lighting points.
